

Ultra Short Government Fund

For period ended March 31, 2018

Fund Overview

The Ultra Short Government Fund is an 'ultra short-term' fund which strives to generate current income consistent with the preservation of capital and the maintenance of liquidity. The fund invests at least 80% of its assets in debt obligations issued or guaranteed by the U.S. Government and the balance of the Fund's assets may be invested in U.S. dollar-denominated investment grade debt securities. The effective duration of the portfolio is expected to be one year or less.

Investment Strategy

At Weitz we cast a wide net to find fixed income investment opportunities that meet our stringent criteria. Instead of focusing solely on yield, we search for investments that we think will provide a reasonable risk-adjusted return. We examine potential opportunities until we find what we believe is the right investment at the right price.

Performance data represents past performance, which does not guarantee future results. The investment return and the principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be higher or lower than the performance data quoted. Performance data current to the most recent month end may be obtained at weitzinvestments.com.

Returns assume reinvestment of dividends and redemption at the end of each period, and reflect the deduction of annual operating expenses, which as stated in the most recent Prospectus are 0.60% (gross) of the Fund's Institutional Class net assets. Returns also include fee waivers and/or expense reimbursements, if any; total returns would have been lower had there been no waivers or reimbursements. The Investment Adviser has agreed in writing to limit the total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) to 0.20% of the Institutional Class shares' average daily net assets through July 31, 2018.

Index performance is hypothetical and is shown for illustrative purposes only. Comparative returns are the average returns for the reflected index. The Bank of America Merrill Lynch 6-Month Treasury Bill Index is an unmanaged index that is generally representative of the market for U.S. Treasury Bills.

Investment Risks

An investment in the Fund involves certain risks, such as: when interest rates rise, bond prices generally fall, and the Fund's share prices can fall. See the Fund's Prospectus for a further discussion of risks.

Portfolio composition is subject to change at any time. Current and future portfolio holdings are subject to risk.

²**Definitions: Relative Results:** difference between the Fund's performance and the performance of the reflected benchmark.
