All data is as of 9/30/2026 unless otherwise indicated.

This material must be preceded or accompanied by a prospectus or summary prospectus.

The Fund has entered into a fee waiver and/or expense reimbursement arrangement with the Investment Advisor by which the Advisor has contractually agreed to waive a portion of the Advisor's fee and reimburse certain expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) to limit the total annual fund operating expenses of the Fund's average daily net assets through 7/31/2027. The **gross expense ratio** reflects the total annual operating expenses of the fund, before any fee waivers or reimbursements. The **net expense ratio** reflects the total annual operating expenses of the fund after taking into account any fee waiver and/or expense reimbursement. The net expense ratio represents what investors are ultimately charged to be invested in a mutual fund.

Holdings are subject to change and may not be representative of the Fund's current or future investments. Totals may not add up to 100% due to rounding.

Credit ratings are assigned to underlying securities utilizing ratings from a Nationally Recognized Statistical Rating Organization (NRSRO) such as Moody's and Fitch, or other rating agencies and applying the following hierarchy: security is determined to be Investment Grade if it has been rated at least BBB- by one credit rating agency; once determined to be Investment Grade (BBB- and above) or Non-Investment Grade (BB+ and below) where multiple ratings are available, then the lowest rating is assigned. Mortgage-related securities issued and guaranteed by government-sponsored agencies such as Fannie Mae and Freddie Mac are generally not rated by rating agencies. Securities that are not rated do not necessarily indicate low quality. Ratings are shown in the Fitch scale (e.g., AAA). Ratings and portfolio credit quality may change over time. The Fund itself has not been rated by a credit rating agency.

Investors should consider carefully the investment objectives, risks, and charges and expenses of a fund before investing. This and other important information is contained in the prospectus and summary prospectus, which may be obtained at weitzinvestments.com or from a financial advisor. Please read the prospectus carefully before investing.

All data is as of 9/30/2026 unless otherwise indicated. Data quoted is past performance and current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Please visit weitzinvestments.com for the most recent month-end performance.

Investment results reflect applicable fees and expenses and assume all distributions are reinvested but do not reflect the deduction of taxes an investor would pay on distributions or share redemptions. Results also include the effect of a fee waiver and/or expense reimbursement arrangement. If this arrangement had not been in place, the performance results would have been lower.

Index performance is hypothetical and is shown for illustrative purposes only. You cannot invest directly in an index. **The Bloomberg U.S. Aggregate Bond Index** is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market.

Definitions: Investment Grade Bonds are those securities rated at least BBB-. **Non-Investment Grade Bonds** are those securities (commonly referred to as "high yield" or "junk" bonds) rated BB+ and below. **30-Day SEC Yield** represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. **Subsidized yield** reflects fee waivers and/or expense reimbursements during the period. Without such fee waivers and/or expense reimbursements, if any; yields would have been lower. **Unsubsidized yield** does not adjust for any fee waivers and/or expense reimbursements in effect. **Distribution Yield** measures the annualized cash distributions paid by a fund relative to its NAV. This rate does not represent the total return of a fund. Distribution Yield is calculated by annualizing the fund's most recent distribution and dividing it by the fund's NAV as of the date of the distribution. Because the calculation is based on the most recent distribution, it may not be indicative of future distributions or the fund's long-term yield. The distribution yield calculation does not include long-term or short-term capital gains distributions. **Average Effective Duration** provides a measure of a fund's interest-rate sensitivity. The longer a fund's duration, the more sensitive the fund is to shifts in interest rates. **Average Effective Maturity** is a measure of maturity that takes into account the possibility that a bond might be called back by the issuer. **Yield to Maturity (YTM)** is the total return anticipated on a bond portfolio if the bonds are held to maturity. **Yield to Worst (YTW)** is the lowest potential yield that can be received on a bond portfolio without the issuers actually defaulting. **Average Coupon** is the weighted average coupon rate of each bond in the portfolio. **R-Squared** is a measure that represents the percentage of a portfolio's movements that can be explained by movements in a benchmark. **Beta measures** volatility in relation to the fund's benchmark. **Alpha** measures the difference between a fund's actual returns and its expected performance, given its level of risk as measured by beta. **Upside Capture Ratio** measures performance in up markets relative to the benchmark. **Downside Capture Ratio** measures performance in down markets relative to the benchmark. **Standard Deviation** measures the degree to which a fund's performance has varied from its average performance over a particular time period. The greater the standard deviation, the greater a fund's volatility. **Sharpe Ratio** is a risk-adjusted performance statistic that measures reward per unit of risk. The higher the Sharpe ratio, the better a fund's risk adjusted performance.

The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar rated the Core Plus Income Fund Institutional and Investor Class shares 4, 5 and 5 stars, among 495, 453 and 351 Intermediate Core-Plus Bond funds for the 3-, 5-, and 10-year periods ended 9/30/2026, respectively.

Consider these risks before investing: All investments involve risks, including possible loss of principal. Market risk includes political, regulatory, economic, social and health risks (including the risks presented by the spread of infectious diseases). Changing interest rates may have sudden and unpredictable effects in the markets and on the Fund's investments. The Fund may purchase lower-rated and unrated fixed-income securities, which involve an increased possibility that the issuers of these may not be able to make payments of interest and principal. See the Fund's prospectus for a further discussion of risks.

Investors should consider carefully the investment objectives, risks, and charges and expenses of a fund before investing. This and other important information is contained in the prospectus and summary prospectus, which may be obtained at weitzinvestments.com or from a financial advisor. Please read the prospectus carefully before investing.
