FUND HISTORY

Weitz Funds (the "Trust") is a Delaware statutory trust established on August 4, 2003, whose shares are offered in series with each series representing a separate fund of investments with its own investment objectives, policies and restrictions. The Trust currently has seven investment series, the Conservative Allocation Fund ("Conservative Allocation Fund"), Core Plus Income Fund ("Core Plus Fund"), Large Cap Equity Fund, ("Large Cap Fund"), Multi Cap Equity Fund ("Multi Cap Fund"), Partners III Opportunity Fund ("Partners III Fund"), Short Duration Income Fund ("Short Duration Fund") and Ultra Short Government Fund (each, a "Fund"). The Conservative Allocation Fund was the Trust's initial series and it commenced operations on October 1, 2003. As of December 30, 2005, Partners III Fund succeeded to substantially all the assets of Weitz Partners III Limited Partnership, an investment limited partnership which was managed at all times with full investment authority by Weitz Investment Management, Inc. ("Weitz Inc." or the "Adviser"), the Trust's investment adviser. The Core Plus Fund commenced operations as a series of the Trust on July 31, 2014. Each other Fund is a successor in interest to certain funds having the same investment objectives that were included as series of two other investment companies previously managed by Weitz Inc.: Weitz Series Fund, Inc. and Weitz Partners, Inc. (the "Predecessor Funds"). Effective April 1, 2004, the assets and liabilities of the Predecessor Funds were transferred to the Trust in exchange for shares of certain Funds. For each of the Partners III Fund and the Short Duration Fund, two classes of shares (an Institutional Class and an Investor Class) were authorized in 2011 and Investor Class shares became available for sale on August 1, 2011. For the Core Plus Fund, two classes of shares (an Institutional Class and an Investor Class) were authorized in 2014 and both classes of shares became available for sale on July 31, 2014. For each of the Multi Cap Fund and the Large Cap Fund, two classes of shares (an Institutional Class and an Investor Class) were authorized in 2014 and Institutional Class shares became available for sale on July 31, 2014. Effective December 16, 2016, the Short Duration Fund changed its name from the Short-Intermediate Income Fund and revised its principal investment strategies. Effective December 16, 2016, the Ultra Short Government Fund changed its name from the Government Money Market and revised its principal investment strategies and policies. For the Conservative Allocation Fund, two classes of shares (an Institutional Class and an Investor Class) were authorized in 2019 and Institutional Class shares became available for sale on March 29, 2019. Effective July 31, 2023, the Conservative Allocation Fund changed its name from the Balanced Fund, the Large Cap Equity Fund changed its name from the Value Fund, and the Multi Cap Equity Fund changed its name from the Partners Value Fund.

INVESTMENT OBJECTIVE, POLICIES AND RESTRICTIONS- LARGE CAP, MULTI CAP AND PARTNERS III OPPORTUNITY FUNDS

Classification

The Large Cap, Multi Cap and Partners III Funds (the "Weitz Equity Funds") are each open-end investment management companies under the federal securities laws. The Large Cap and Multi Cap Funds are each diversified under the Investment Company Act of 1940, as amended (the "1940 Act"). The Partners III Fund is non-diversified under the 1940 Act. Because the Partners III Fund is non-diversified, it may have larger positions in fewer companies or industries than a diversified fund. A non-diversified portfolio is more likely to experience significant fluctuations in value, exposing a non-diversified fund to a greater risk of loss in any given period than a diversified fund.

Investment Objective and Strategy

The investment objective of each Weitz Equity Fund is capital appreciation. The investment objective of each Weitz Equity Fund may be changed without a shareholder vote. Each of the Weitz Equity Funds seeks to achieve its objective by investing primarily in common stocks, including securities issued by non-U.S. companies and denominated in U.S. dollars. Each of the Weitz Equity Funds may also make investments or engage in investment techniques, to a limited extent, that are not part of their principal investment strategies. For example, each of the Weitz Funds may invest in a variety of (a) securities of a company convertible into common stocks such as rights, warrants, convertible preferred stock and convertible bonds, (b) securities of a company not convertible into common stock, such as bonds and preferred stock, and (c) securities issued by non-U.S. companies and denominated in foreign currencies, in each case which we determine may offer the opportunity for capital appreciation. The Weitz Equity Funds may invest in put and call options. Each Weitz Equity Fund may also invest in the securities of other investment companies, which may include exchange-traded funds ("ETFs"). In addition, the Partners III Fund may also engage in short selling of securities, including short selling of ETFs, invest in commodities contracts and futures transactions such as stock index futures, borrow money and purchase securities on margin. Each Weitz Equity Fund considers long-term capital gains preferable to short-term capital gains and dividend and interest income, but all gains and income are acceptable.

Under normal circumstances, the Large Cap Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities of large-cap companies and related derivative instruments. The Fund considers large-cap companies to be those with market capitalizations that would be included in the Bloomberg 1000 Index. This policy, which is non-fundamental, may be changed without shareholder approval and the Fund will notify its shareholders at least 60 days before any change to this policy.

The Multi Cap and Partners III Funds are "multi-cap" funds and may invest in the securities and related derivative instruments of any market capitalization.

Under normal circumstances, the Multi Cap Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities of companies with market capitalizations that would be included in the Bloomberg 3000 Index and related derivative instruments. This policy, which is non-fundamental, may be changed without shareholder approval and the Fund will notify its shareholders at least 60 days before any change to this policy.

The Large Cap and Multi Cap Funds may, but are not required to, use derivatives, such as options, futures and forward contracts, including interest rate futures, and options on futures. The Large Cap and Multi Cap Funds may use derivatives for a variety of purposes, including to attempt to hedge against adverse changes in the market price of securities, interest rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return; to manage portfolio characteristics; and as a cash flow management technique. The Funds may choose not to make use of derivatives for a variety of reasons, and any use may be limited by applicable law and regulations. These derivative instruments will count toward the Large Cap and Multi Cap Funds' 80% policies only if they have economic characteristics similar to the securities included within each respective policy.

The portfolios of each of the Weitz Equity Funds are generally more concentrated than many mutual funds.

Tax considerations are secondary to the primary goal of capital appreciation, but all things being equal, the portfolios are managed to maximize after-tax returns for tax-paying shareholders. For example, we prefer long-term capital gains to short-term gains and we optimize the realization of capital losses when possible.

The investment strategy of Large Cap, Multi Cap and Partners III (with respect to its long positions) Funds (which we call "Quality at a Discount") is to buy above-average to highest-quality businesses, at prices that we believe are less than what the companies are worth. We assess a company's quality based on its competitive position, return on invested capital, ability to redeploy capital, cash flow consistency, financial leverage and management team. We compare the company's stock price to our estimate of business value, i.e., all the cash that the company will generate for its owners in the future. For each company, we look at a range of business value estimates. We then seek to buy stocks of companies that meet our quality criteria when they are priced at a discount to our estimates of business value. We invest with a multiple-year time horizon. We believe that purchasing stocks at prices less than our business value estimates provides opportunities for stock price appreciation, both as business values grow and as the market recognizes companies' values. Typically, we consider selling stocks as they approach or exceed our business value estimates. We may also sell stocks for other reasons, including for the purchase of stocks that we believe offer better investment opportunities. We do not try to "time" the market. However, if there is cash available for investment and there are not securities that meet the Fund's investment criteria, the Fund may invest without limitation in high-quality cash and cash equivalents such as U.S. government securities or government money market fund shares.

The Partners III Fund invests in long positions in stocks and other securities, when we anticipate that the value of such securities will increase. The Partners III Fund also invests in short positions in stocks and other securities, including short sales of ETFs, when we anticipate a decline in the value of such securities. The Partners III Fund's mix of long positions and short positions will change from time to time based on Weitz Inc.'s assessment of market conditions.

Each of the Weitz Equity Funds has adopted a policy which allows the Fund to invest for temporary defensive purposes a portion or all of its assets in high-quality nonconvertible preferred stock, high-quality nonconvertible debt securities and high-quality U.S. Government, state and municipal and governmental agency and instrumentality obligations, or retain funds in cash or cash equivalents, such as money market fund shares, when Weitz Inc. believes that circumstances warrant such a temporary defensive investment position.

Some of the obligations purchased by the Weitz Equity Funds are backed by the full faith and credit of the U.S. Government and are guaranteed as to both principal and interest by the U.S. Treasury. Examples of these include direct obligations of the U.S. Treasury, such as U.S. Treasury bills, notes and bonds, and indirect obligations of the U.S. Treasury, such as obligations of the Government National Mortgage Association, Small Business Administration, Maritime Administration, Farmers Home Administration and Department of Veterans Affairs.

While the obligations of many U.S. Government agencies are not direct obligations of the U.S. Treasury, they may be backed indirectly by the U.S. Government, in some cases by a right to borrow from the U.S. Government. Other agencies and Government-Sponsored Enterprises ("GSEs") are supported solely by the credit of the agency or GSE itself, or may be given additional support from U.S. Treasury authority to purchase outstanding debt obligations. GSEs include, among others, Federal Home Loan Banks, Federal Farm Credit Banks, Fannie Mae and Freddie Mac; and debt and mortgage-backed securities of these four entities are neither guaranteed nor insured by the U.S. Government.

Furthermore, with respect to U.S. Government securities purchased by the Weitz Equity Funds, guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities, nor do they extend to the value of a Fund's shares.

State and municipal obligations, which can be taxable or tax exempt, may include both general obligation and revenue obligations, issued for a variety of public purposes such as highways, schools, sewer and water facilities, as well as industrial revenue bonds issued by public bodies to finance private commercial and industrial facilities.

Securities and Other Investment Practices

This section provides a more detailed description of some of the types of securities and other instruments in which the Weitz Equity Funds may invest. The Weitz Equity Funds may invest in these instruments to the extent permitted by their investment objective and policies and by applicable law. The Weitz Equity Funds are not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in the Prospectus or Statement of Additional Information.

Industry Concentration

Although each Weitz Equity Fund has adopted a fundamental investment restriction which does not allow it to concentrate its investments in any one industry, each Weitz Equity Fund reserves the right to invest up to 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies or instrumentalities and repurchase agreements relating thereto.

Convertible Securities

In addition to common stocks, each Weitz Equity Fund may invest in other securities having equity features because they are convertible into, or represent the right to purchase, common stock. Convertible bonds and debentures are corporate debt instruments, frequently unsecured and subordinated to senior corporate debt, which may be converted into common stock at a specified price. Such securities may trade at a premium over their face amount when the price of the underlying common stock exceeds the conversion price, but otherwise will normally trade at prices reflecting current interest rate levels.

Warrants and Rights

Warrants and rights are options to purchase common stock at a specified price for a specified period of time. Their trading price will normally reflect the relationship between the option price and the current market price of the underlying common stock. If not sold or exercised before their expiration date they become valueless.

Investment Company Shares

The Weitz Equity Funds may purchase securities of other investment companies, subject to the restrictions of the 1940 Act. Investing in the shares of other registered investment companies involves the risk that such other registered investment companies will not achieve their objectives or will achieve a yield or return that is lower than that of the respective Fund. To the extent that the Weitz Equity Funds are invested in shares of other investment companies, the Weitz Equity Funds will incur additional expenses as a result of investing in investment company shares.

Investments in Exchange Traded Funds ("ETFs")

The Weitz Equity Funds may invest in, or sell short, ETFs including ETFs that are designed to appreciate in value when the value of a broad or narrow market index declines. ETFs that are based on an index may not be able to replicate and maintain exactly the composition and relative weightings of securities in the applicable index. ETFs that are based on an index also incur certain expenses not incurred by their applicable index. Additionally, certain securities comprising the index tracked by an ETF may, at times, be temporarily unavailable, which may impede an ETF's ability to track its index. As a holder of interests in an ETF, a Weitz Equity Fund would indirectly bear its ratable share of that fund's expenses, including applicable management fees. At the same time, a Weitz Equity Fund would continue to pay its own management and advisory fees and other expenses, as a result of which the Weitz Equity Fund and its shareholders in effect may be absorbing multiple levels of certain fees with respect to investments in such ETFs.

Borrowing

The Weitz Equity Funds are each authorized to borrow money. Borrowing may be considered to be a form of leverage. The 1940 Act requires a Fund to maintain continuous asset coverage of 300% of the amount borrowed. If the 300% asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) should decline as a result of market fluctuations or for other reasons, a Fund may be required to sell some of its portfolio holdings within three days in order to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. Borrowed funds are subject to interest costs that may or may not be offset by amounts earned on the borrowed funds. A Fund may be required to maintain minimum average balances in connection with its borrowing or pay a commitment or other fee to maintain a line of credit, and either of these requirements would serve to increase the cost of borrowing over the stated interest rate.

Securities Lending

The Weitz Equity Funds are permitted to engage in securities lending to the extent permitted by Securities and Exchange Commission ("SEC") policy. Qualified institutions may borrow portfolio securities on a short-term basis. By reinvesting any cash collateral received in these transactions, additional income gains or losses may be realized. Although voting rights of the loaned securities may pass to the borrower, if a material event affecting the investment in the loaned securities is to occur, the respective Fund must terminate the loan and vote the securities. Alternatively, the respective Fund may enter into an arrangement that ensures that it can vote the proxy even while the borrower continues to hold the securities.

Under the Agency Securities Lending Agreement (the "Lending Agreement") between the Weitz Investment Management, Inc., on behalf of the Funds, and Mitsubishi UFJ Trust and Banking Corporation ("Mitsubishi"), the Weitz Equity Funds may lend securities to approved borrowers in exchange for collateral in the amount of at least 100% of the market value of U.S. Government securities loaned, 102% of the market value of domestic securities and foreign securities denominated in the same currency as the collateral loaned, and 105% of the market value of foreign securities not denominated in the same currency as the collateral loaned. Each loan will be secured continuously by collateral in the form of cash or U.S. Government securities. During the term of the loan, the Weitz Equity Funds will receive payments from borrowers equivalent to the dividends and interest that would have been earned on securities lent while simultaneously seeking to earn income on the investment of cash collateral in accordance with investment guidelines contained in the Lending Agreement. Realized income from the program is apportioned between the Weitz Equity Funds and Mitsubishi in accordance with the Lending Agreement.

The Weitz Equity Funds are subject to certain risks while its securities are on loan, including the following: (i) the risk that the borrower defaults on the loan and the collateral is inadequate to cover the Weitz Equity Funds' loss; (ii) the risk that the earnings on the collateral invested are not sufficient to pay fees incurred in connection with the loan; (iii) the risk that the Weitz Equity Funds could lose money in the event of a decline in the value of the collateral provided for loaned securities or a decline in the value of any investments made with cash collateral; (iv) the risk that the borrower may use the loaned securities to cover a short sale, which may in turn place downward pressure on the market prices of the loaned securities; (v) the risk that return of loaned securities could be delayed and interfere with portfolio management decisions; and (vi) the risk that any efforts to restrict or recall the securities for purposes of voting may not be effective. These events could also trigger adverse tax consequences for the Weitz Equity Funds.

Foreign Securities

The Weitz Equity Funds may invest in securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies. The Weitz Equity Funds may occasionally convert U.S. dollars into foreign currency, but only to effect securities transactions on a foreign securities exchange and not to hold such currency as an investment. The Weitz Equity Funds will not invest in forward foreign currency contracts, except to hedge against the currency risk related to foreign securities held in the portfolio.

Investments in foreign securities may involve additional risks that may not be associated with investing in U.S. securities. An investment may be affected by changes in currency rates and in exchange control regulations. Foreign securities may be subject to adverse changes in foreign economic, political, regulatory and other conditions; the imposition of trade sanctions or other government restrictions (including tariffs); and diplomatic developments. Any of these could impact the value or liquidity of the Funds' investments, and could impair the Funds' ability to meet their investment objectives. Foreign securities issuers may not be subject to uniform accounting, auditing, corporate governance, legal and financial reporting standards comparable to those applicable to domestic issuers, and there may be less publicly available information about a foreign issuer than about a domestic issuer. Some foreign securities markets may have substantially less trading activity than the United States securities markets, and securities of some foreign issuers may be relatively less liquid than securities of comparable domestic issuers. Also, commissions on transactions in foreign securities may be higher than similar transactions on domestic securities, and foreign governments may impose taxes on securities transactions or ownership. There is generally less governmental regulation of securities issuers, securities exchanges and brokers in foreign countries than in the United States. In addition, individual foreign economies may differ favorably or unfavorably from the economy of the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Illiquid Investments

A Weitz Equity Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments. An "illiquid investment" is any investment that a Weitz Equity Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

The Trust has adopted a liquidity risk management program ("LRMP") pursuant to which the Funds identify illiquid investments. Under the LRMP, the Adviser has been designated to administer the LRMP and has delegated certain responsibilities to the Liquidity Risk Management Committee, which is comprised of certain operations, compliance, trading, and portfolio management representatives of the Adviser. The Adviser preliminarily identifies illiquid investments based on, among other things, the trading characteristics and market depth of a particular investment.

Each business day, the Adviser determines the liquidity classifications for the portfolio holdings of each Weitz Equity Fund pursuant to procedures set forth in the LRMP. The liquidity classifications, which are defined in Rule 22e-4 under the 1940 Act, are highly liquid, moderately liquid, less liquid, and illiquid investments. In making these determinations, the Adviser will consider the relevant market, trading, and investment-specific considerations for a particular investment. Moreover, in making these determinations, the Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that a Weitz Equity Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Adviser must take that determination into account. In addition, the Adviser may also consider the following factors in its determination: (i) the existence of an active market; (ii) whether it is exchange-traded; (iii) frequency of trades or quotes and average daily trading volume; (iv) volatility of trading prices; (v) bid-ask spreads; (vi) whether the asset has a relatively standardized and simple structure; (vii) the maturity and date of issue (as applicable); and (viii) any restrictions on transfer.

Preferred Stock and Debt Securities

Each Weitz Equity Fund may invest in other securities, including preferred stock and debt securities, which Weitz Inc. determines may offer the opportunity for capital appreciation. Each Weitz Equity Fund will not invest more than 15% of its assets in debt securities which are unrated or which are non-investment grade (commonly referred to as "high yield" or "junk bonds"); however, U.S. Government securities, as described above, even if unrated, do not count toward this 15% limit. We consider investment grade to mean rated at least BBB- by one or more nationally recognized credit ratings firms. Non-investment grade securities have speculative characteristics, and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity to make principal and interest payments than is the case with investment grade securities. In addition, the liquidity of securities may be affected by the market's perception of credit quality, so that the market for non-investment grade securities may be thinner and less active than for investment grade securities, and there may be more price volatility for non-investment grade securities. Prices of non-investment grade debt securities may be more sensitive to adverse economic changes or issuer developments, than investment grade debt securities. Prices of debt securities with longer durations may be more sensitive to interest rate changes, than debt securities with shorter durations. Price changes for debt securities held by a Fund will not cause changes to the Fund's cash income from those securities, but will be reflected in the net asset value of the Fund's shares. Therefore, the judgment of Weitz Inc. may at times play a greater role in valuing lower-rated or unrated securities. It also may be more difficult during times of adverse market conditions to sell lower-rated or unrated securities, whether to meet redemption requests or to respond to changes in the market. Although the views of rating agencies may be considered in evaluating particular debt securities, Weitz Inc. will not rely exclusively on such views, but will supplement such views with its independent and ongoing review of credit quality.

Bank Obligations

The Weitz Equity Funds may purchase bank obligations, including negotiable certificates of deposit and bankers' acceptances, which evidence the banking institution's obligation to repay funds deposited with it for a specified period of time at a stated interest rate. The Weitz Equity Funds will normally purchase such obligations from financial institutions which have capital, surplus and undivided profits in excess of $100,000,000 as of the date of the bank's most recently published financial statements and financial institutions whose obligations are insured by the Federal Deposit Insurance Corporation. Certificates of deposit generally have penalties for early withdrawal, but can be sold to third parties subject to the same risks as other debt securities.

Repurchase Agreements

The Weitz Equity Funds may invest in repurchase agreements on U.S. Government securities. Repurchase agreements involve the purchase of U.S. Government securities and a simultaneous agreement with the seller to "repurchase" the securities at a specified price and time, thereby determining the yield during the purchaser's holding period. This results in a fixed rate of return insulated from market fluctuations during such period. Repurchase agreements usually are for short periods, such as one week. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by the respective Fund but only constitute collateral for the seller's obligation to pay the repurchase price and, in the event of a default by the seller, the respective Fund may suffer delays and incur costs or losses in connection with the disposition of the collateral. A repurchase agreement may involve certain risks not associated with a direct purchase of U.S. Government securities. For example, the bank or broker selling the repurchase agreement may default on its obligations to deliver additional securities or to maintain the value of collateral underlying the repurchase agreement or it may fail to repurchase the underlying securities at a time when the value has declined. A Weitz Equity Fund may incur a loss as a result of such default if the liquidation of the collateral results in proceeds less than the repurchase price. In an effort to minimize such risks, the Weitz Equity Funds will only enter into repurchase agreements with member banks of the Federal Reserve with assets, surplus and undivided profits of $100,000,000 or more or recognized regional or national securities dealers.

Commercial Paper

The Weitz Equity Funds may purchase commercial paper which consists of short-term unsecured promissory notes. The Weitz Equity Funds will purchase only commercial paper either (a) rated Prime 1 by Moody's (or with an equivalent or better rating from another rating agency); or (b) if not rated, then issued by or guaranteed by companies which have an outstanding debt issue rated Aa or better by Moody's (or with an equivalent or better rating from another rating agency).

When Issued or Forward Commitment Transactions

The Weitz Equity Funds may engage in when issued or forward commitment transactions which involve the purchase or sale of a security by a Weitz Equity Fund with payment and delivery taking place in the future to secure what is considered an advantageous yield and price to the respective Fund at the time of entering into the transaction. When a Weitz Equity Fund engages in when issued or forward commitment transactions, it relies on the other party to consummate the trade. This subjects the Weitz Equity Fund to counterparty credit risk.

Short Sales, Put and Call Options

The Weitz Equity Funds may engage in short sales and buy and sell put and call options on equity securities, including ETFs, or futures contracts. Short sales involve the sale of a security that the respective Fund does not own (but instead has borrowed) in anticipation of a decline in the value of the security. The Fund must then purchase the security by a future date, as specified in the short sale contract. Under current regulatory requirements, to the extent that a Weitz Equity Fund engages in short sales, the Fund will place in a segregated account a sufficient amount of cash and securities as required by applicable federal securities regulations in order to cover the transaction. In the event that the value of the security sold short increases in value rather than decreases, the respective Fund would suffer a loss when it purchases the security sold short. Since there is, theoretically, no limit to how high the price of the stock might rise, the potential loss from the short sale is greater than the original proceeds of the short sale. For any short sale, the amount of any gain will be decreased (and the amount of any loss will be increased) by any premium or interest a Fund may be required to pay in connection with the short sale. Short selling may also produce higher portfolio turnover and result in increased transaction costs to a Fund. The Weitz Equity Funds may also engage in short sales "against the box," where the Fund contemporaneously owns or has the right to obtain at no additional cost securities identical to those sold short. In the event that any Weitz Equity Fund were to sell securities short "against the box" and the price of such securities were to then increase rather than decrease, such Fund would forego the potential realization of the increased value of the shares held long.

The SEC has adopted Rule 18f-4 under the 1940 Act (the "Derivatives Rule"). Short sales and other derivatives instruments are considered derivatives under the Derivatives Rule. The Derivatives Rule regulates the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies. These requirements may limit the ability of a Fund to use derivatives and reverse repurchase agreements and similar financing transactions as part of its investment strategies. Rule 18f-4 requires the Fund to trade derivatives and other transactions that create future payment or delivery obligations subject to a value-at-risk ("VaR") leverage limit, certain derivatives risk management program and reporting requirements. Generally, these requirements apply unless the Fund qualifies as a "limited derivatives user." Under the Derivatives Rule, when a Fund trades reverse repurchase agreements or similar financing transactions, including certain tender option bonds, it needs to aggregate the amount of indebtedness associated with the reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the Fund's asset coverage ratio or treat all such transactions as derivatives transactions. Reverse repurchase agreements or similar financing transactions aggregated with other indebtedness do not need to be included in the calculation of whether a Fund is a limited derivatives user, but for a Fund subject to the VaR testing, reverse repurchase agreements and similar financing transactions must be included for purposes of such testing whether treated as derivatives transactions or not. The Securities and Exchange Commission ("SEC") also issued guidance in connection with the Derivatives Rule regarding use of securities lending collateral that may limit a Fund's securities lending activities. In addition, under the Derivatives Rule, a Fund is permitted to invest in a security on a when-issued or forward-settling basis, or with a non-standard settlement cycle, and the transaction will be deemed not to involve a senior security under the 1940 Act, provided that (i) the Fund intends to physically settle the transaction and (ii) the transaction will settle within 35 days of its trade date (the "Delayed-Settlement Securities Provision"). A Fund may otherwise engage in such transactions that do not meet the conditions of the Delayed-Settlement Securities Provision so long as the Fund treats any such transaction as a "derivatives transaction" for purposes of compliance with the Derivatives Rule. Furthermore, under the Derivatives Rule, a Fund will be permitted to enter into an unfunded commitment agreement, and such unfunded commitment agreement will not be subject to the asset coverage requirements under the 1940 Act, if the Fund reasonably believes, at the time it enters into such agreement, that it will have sufficient cash and cash equivalents to meet its obligations with respect to all such agreements as they come due. These and other proposed and adopted regulatory requirements may limit the ability of a Fund to use derivatives, reverse repurchase agreements and similar financing transactions, when-issued, delayed delivery and forward commitment transactions, and unfunded commitment agreements as part of its investment strategies.

Options such as puts and calls are contracts giving the holder the right to either buy or sell a financial instrument at a specified price before a specified time. Investments in puts and calls involve certain risks including the risk that since puts and calls are options which have an expiration date, the respective Weitz Equity Fund could lose the entire cost of those puts and calls which expire worthless.

Covered Call Options

The Weitz Equity Funds may write covered call options to generate premium income which Weitz Inc. considers to be an acceptable investment result. Covered call options are contracts sold on a national exchange or in the over-the-counter options market which allow the purchaser to buy the underlying security at a specified price (the "strike price") prior to a certain date. "Covered" options are those in which the option seller (the "writer") owns the underlying securities. Writing covered call options may increase the income of a Weitz Equity Fund since it receives a premium for writing the option. If a Weitz Equity Fund writes covered call options, the underlying securities will be subject to certain deposit procedures and unavailable for sale during the term of the option. As a result, the respective Fund will forego any opportunity for appreciation in such securities during the term of the option. The respective Fund may attempt to protect itself against a decline in the price of the underlying security or may attempt to benefit from an anticipated increase in such price, by closing the covered call position that is, purchasing an identical call in the open market. There is no assurance, however, that such calls will always be available for purchase in the secondary market at a price which will produce the desired result. The absence of a liquid secondary market in such securities could result from numerous circumstances, such as insufficient trading interest, restrictions imposed by exchanges as to options trading generally or suspensions affecting particular securities, inadequacy of exchange or clearing corporation facilities or decisions by exchanges to discontinue or limit operations trading.

Partners III Fund: Other Derivatives Instruments

The Partners III Fund may, but is not required to, use derivatives, such as options, futures and forward contracts, including stock index futures contracts, interest rate futures, and options on futures. The Fund may use derivatives for a variety of purposes, including to attempt to hedge against adverse changes in the market price of securities, interest rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return; to manage portfolio characteristics; and as a cash flow management technique.

While a stock index fluctuates generally with changes in the market values of the stocks included in the index, a stock index futures contract is an agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount multiplied by the difference between the stock index value at the close of the last trading day of the contract and the price at which the futures contract is originally purchased or sold. No physical delivery of the underlying stocks in the index is made.

The Partners III Fund's primary purpose in entering into stock index futures contracts is to protect it from fluctuations in the value of securities without actually buying or selling the underlying security. For example, if the Partners III Fund anticipates an increase in the price of stocks, and it intends to purchase stocks at a later time, the Partners III Fund could enter into a futures contract to purchase a stock index as a temporary substitute for stock purchases. If an increase in the market occurs that influences the stock index as anticipated, the value of the futures contracts will increase, thereby serving as a hedge against the Partners III Fund not participating in a market advance. This technique is sometimes known as an anticipatory hedge. However, because the Partners III Fund's cash that may otherwise be invested would be held un-invested or invested in other liquid assets so long as the futures position remains open, the Partners III Fund's return could be diminished due to the opportunity losses of foregoing other potential investments. Conversely, if the Partners III Fund holds stocks and seeks to protect itself from an expected decrease in stock prices, the Partners III Fund might sell stock index futures contracts, thereby hoping to offset the potential decline in the value of securities by a corresponding increase in the value of the futures contract position. The Partners III Fund could protect against a decline in stock prices by selling portfolio securities and investing in money market instruments, but the use of futures contracts enables it to maintain a defensive position without having to sell portfolio securities.

The Partners III Fund may also buy and sell futures contracts on commodities, interest rates, currencies or other indices and options thereon. Futures contracts are traded on exchanges regulated by the Commodity Futures Trading Commission (the "CFTC"). Such transactions are centrally cleared, which is designed to ensure the performance of each party to the contract. All terms of futures contracts are set forth in the rules of the relevant exchange. Interest rate, commodity or currency futures contracts may be used as a hedge against changes in prevailing levels of interest rates, commodity prices or currency exchange rates in order to establish more definitely the effective return on securities or currencies held or intended to be acquired by the Fund. Interest rate, commodity or currency futures can be sold as an offset against the effect of expected increases in interest rates, declines in commodity prices or currency exchange rates and purchased as an offset against the effect of expected declines in interest rates, increases in commodity prices or currency exchange rates.

There is no assurance a liquid market will exist for any particular futures contract at any particular time. Exchanges may establish daily price fluctuation limits for futures contract, and may halt trading if a contract's price moves upward or downward more than the limit in a given day. On volatile trading days when the price fluctuation limit is reached or a trading halt is imposed, it may be impossible to enter into new positions or close out existing positions. If the market for a contract is not liquid because of price fluctuation limits or other market conditions, it could prevent prompt liquidation of unfavorable positions, and potentially could require the Partners III Fund to continue to hold a position until delivery or expiration regardless of changes in its value. As a result the Partners III Fund's access to other assets held to cover its futures positions could also be impaired.

Because there are a limited number of types of exchange-traded futures contracts, it is likely that the standardized contracts available will not match the Partners III Fund's current or anticipated investments exactly. The Partners III Fund may invest in futures contracts based on securities with different issuers, maturities or other characteristics from the securities in which the Partners III Fund typically invests, which involves a risk that the futures positions will not track the performance of the Partners III Fund's other investments.

Futures prices can also diverge from the prices of their underlying instruments, even if the underlying instruments match the Partners III Fund's investments well. Futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instruments and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect correlation may also result from differing levels of demand in the futures markets and the securities markets, from structural differences in how futures and securities are traded or from imposition of daily price fluctuation limits or trading halts. The Partners III Fund may purchase or sell futures contracts with a greater or lesser value than the securities it wishes to hedge or intends to purchase in order to attempt to compensate for the difference in volatility between the contract and the securities although this may not be successful in all cases. If price changes in the Partners III Fund's futures positions are poorly correlated with its other investments, the positions may fail to produce anticipated gains or result in losses that are not offset by gains in other investments.

The risk of loss in trading futures contracts can be substantial, due both to the low margin deposits required and the extremely high degree of leverage involved in futures pricing. Because the deposit requirements in the futures markets are less onerous than margin requirements in the securities market, there may be increased participation by speculators in the futures market that may also cause temporary price distortions. A relatively small price movement in a futures contract may result in immediate and substantial loss (as well as gain) to the investor. For example, if at the time of purchase, 10% of the value of a futures contract is deposited as margin, a subsequent 10% decrease in the value of the futures contract would result in a total loss of the margin deposit, before any deduction for the transaction costs, if the amount were then closed out. Thus, a purchase or sale of a futures contract may result in losses in excess of the amount invested in the contract. The Partners III Fund will only engage in futures transactions when it is believed these risks are justified and will engage in futures transactions primarily for risk management purposes.

Futures transactions involve brokerage costs and require posting margin to the broker. The Partners III Fund's overall performance could be adversely affected by entering into such contracts if the Adviser's judgment with respect to the investment proves incorrect.

Fundamental Investment Restrictions

The following investment restrictions are fundamental restrictions which cannot be changed without the approval of a majority of the respective Weitz Equity Fund's outstanding shares. "Majority" means, the lesser of (a) 67% or more of a Weitz Equity Fund's outstanding shares voting at a special or annual meeting of shareholders at which more than 50% of the outstanding shares are represented in person or by proxy or (b) more than 50% of a Weitz Equity Fund's outstanding shares.

None of the Weitz Equity Funds may:

1. Underwrite or deal in offerings of securities of other issuers as a sponsor or underwriter in any way.
2. Purchase or sell real estate except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
3. Purchase or sell physical commodities or commodity futures contracts, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
4. Issue any senior security, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
5. Make loans to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
6. Borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
7. Invest more than 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies and instrumentalities and repurchase agreements relating thereto.

In addition, neither of the Large Cap nor Multi Cap Fund may:

8. As to 50% of its total assets, (a) invest more than 5% of its total assets (taken at market value at the time of each investment) in the securities of any one issuer, nor (b) purchase more than 10% of the outstanding voting securities of an issuer, except that such restrictions shall not apply to securities issued or guaranteed by the U.S. Government or its agencies, bank money instruments or bank repurchase agreements.

INVESTMENT OBJECTIVES, POLICIES AND RESTRICTIONS- CONSERVATIVE ALLOCATION FUND

Classification

The Conservative Allocation Fund is a diversified, open-end investment management company as defined in the 1940 Act.

Investment Objectives and Strategy

The investment objectives of the Conservative Allocation Fund are long-term capital appreciation, capital preservation and current income. The Conservative Allocation Fund invests primarily in a portfolio of equity and debt securities. Under normal circumstances, the Conservative Allocation Fund will invest at least 25% of its total assets in equity securities, such as common stocks and a variety of securities convertible into common stock such as rights, warrants and convertible preferred stock. Also, under normal circumstances, the Conservative Allocation Fund will invest at least 25% of its total assets in investment-grade debt securities (we consider investment grade to mean rated at least BBB- by one or more nationally recognized credit ratings firms). The debt securities in which the Conservative Allocation Fund may invest include: (1) U.S. Government securities (including agency securities, and securities issued by government-sponsored enterprises such as Fannie Mae and Freddie Mac, including their mortgage-backed securities); (2) corporate debt securities; (3) other mortgage-backed securities; (4) asset-backed securities and other structured products; (5) loans and participation interests in loans and loan pools; (6) bank obligations (certificates of deposit and bankers' acceptances); (7) commercial paper; (8) repurchase agreements on U.S. Government securities; (9) securities of registered investment companies which invest in debt securities; and (10) securities issued by foreign governments, which may include sovereign debt.

The Conservative Allocation Fund may, but is not required to, use derivatives, such as options, futures and forward contracts, including interest rate futures, and options on futures. The Conservative Allocation Fund may use derivatives for a variety of purposes, including to attempt to hedge against adverse changes in the market price of securities, interest rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return; to manage portfolio characteristics; and as a cash flow management technique. These derivative instruments will count toward the Conservative Allocation Fund's 25% policy for investment grade debt securities only if they have economic characteristics similar to the securities included within that policy.

The Conservative Allocation Fund's investment strategy with respect to equity securities (which we call "Quality at a Discount") is to buy above-average to highest-quality businesses, at prices that we believe are less than what the companies are worth. We assess a company's quality based on its competitive position, return on invested capital, ability to redeploy capital, cash flow consistency, financial leverage and management team. We compare the company's stock price to our estimate of business value, i.e., all the cash that the company will generate for its owners in the future. For each company, we look at a range of business value estimates. We then seek to buy stocks of companies that meet our quality criteria when they are priced at a discount to our estimates of business value. We invest with a multiple-year time horizon. We believe that purchasing stocks at prices less than our business value estimates provides opportunities for stock price appreciation, both as business values grow and as the market recognizes companies' values. Typically, we consider selling stocks as they approach or exceed our business value estimates. We may also sell stocks for other reasons, including for the purchase of stocks that we believe offer better investment opportunities. We do not try to "time" the market. However, if there is cash available for investment and there are not securities that meet the Fund's investment criteria, the Fund may invest without limitation in high-quality cash and cash equivalents such as U.S. government securities or government money market fund shares.

The Conservative Allocation Fund's investment strategy with respect to debt securities is to select securities whose yield is sufficiently attractive taking into consideration the risk of ownership. In deciding whether the Conservative Allocation Fund should invest in a particular debt security, Weitz Inc. considers a number of factors such as the security's price, coupon and yield-to-maturity, as well as the credit quality of the issuer. In addition, Weitz Inc. reviews the terms of the debt security, including subordination, default, sinking fund, and early redemption provisions.

The Conservative Allocation Fund may invest up to 20% of its total assets in debt securities which are unrated or which are non-investment grade (commonly referred to as "high yield" or "junk bonds"); however, U.S. Government securities, as described above, even if unrated, do not count toward this 20% limit. Non-investment grade securities have speculative characteristics, and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity to make principal and interest payments than is the case with investment grade securities. In addition, the liquidity of securities may be affected by the market's perception of credit quality, so that the market for non-investment grade securities may be thinner and less active than for investment grade securities, and there may be more price volatility for non-investment grade securities. Prices of non-investment grade debt securities may be more sensitive to adverse economic changes or issuer developments, than investment grade debt securities. Prices of debt securities with longer durations may be more sensitive to interest rate changes, than debt securities with shorter durations. Price changes for debt securities held by the Conservative Allocation Fund will not cause changes to the Fund's cash income from those securities, but will be reflected in the net asset value of Conservative Allocation Fund shares. Therefore, the judgment of Weitz Inc. may at times play a greater role in valuing lower-rated or unrated securities. It also may be more difficult during times of adverse market conditions to sell lower-rated or unrated securities, whether to meet redemption requests or to respond to changes in the market. Although the views of rating agencies may be considered in evaluating particular debt securities, Weitz Inc. will not rely exclusively on such views, but will supplement such views with its independent and ongoing review of credit quality.

When Weitz Inc. believes that circumstances warrant a temporary defensive investment position, a greater portion or all of the Conservative Allocation Fund's portfolio may be retained in cash or cash equivalents, such as money market fund shares and repurchase agreements on U.S. Government securities.

Securities and Other Investment Practices

This section provides a more detailed description of some of the types of securities and other instruments in which the Conservative Allocation Fund may invest. The Conservative Allocation Fund may invest in these instruments to the extent permitted by its investment objectives and policies and by applicable law. The Conservative Allocation Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in the Prospectus or Statement of Additional Information.

Industry Concentration

Although the Conservative Allocation Fund has adopted a fundamental investment restriction which does not allow it to concentrate its investments in any one industry, the Conservative Allocation Fund reserves the right to invest up to 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies or instrumentalities and repurchase agreements relating thereto.

Convertible Securities

In addition to common stocks, the Conservative Allocation Fund may invest in other securities having equity features because they are convertible into, or represent the right to purchase, common stock. Convertible bonds and debentures are corporate debt instruments, frequently unsecured and subordinated to senior corporate debt, which may be converted into common stock at a specified price. Such securities may trade at a premium over their face amount when the price of the underlying common stock exceeds the conversion price, but otherwise will normally trade at prices reflecting current interest rate levels.

Warrants and Rights

Warrants and rights are options to purchase common stock at a specified price for a specified period of time. Their trading price will normally reflect the relationship between the option price and the current market price of the underlying common stock. If not sold or exercised before their expiration date they become valueless.

Investment Company Shares

The Conservative Allocation Fund may purchase securities of other investment companies, subject to the restrictions of the 1940 Act. Investing in the shares of other registered investment companies involves the risk that such other registered investment companies will not achieve their objectives or will achieve a yield or return that is lower than that of the Conservative Allocation Fund. To the extent that the Conservative Allocation Fund is invested in shares of other investment companies, the Conservative Allocation Fund will incur additional expenses as a result of investing in investment company shares.

Investments in Exchange Traded Funds

The Conservative Allocation Fund may invest in ETFs, including ETFs that are designed to appreciate in value when the value of a broad or narrow market index declines. ETFs that are based on an index may not be able to replicate and maintain exactly the composition and relative weightings of securities in the applicable index. ETFs that are based on an index also incur certain expenses not incurred by their applicable index. Additionally, certain securities comprising the index tracked by an ETF may, at times, be temporarily unavailable, which may impede an ETF's ability to track its index. As a holder of interests in an ETF, the Conservative Allocation Fund would indirectly bear its ratable share of that fund's expenses, including applicable management fees. At the same time, the Conservative Allocation Fund would continue to pay its own management and advisory fees and other expenses, as a result of which the Conservative Allocation Fund and its shareholders in effect may be absorbing multiple levels of certain fees with respect to investments in such ETFs.

Borrowing

The Conservative Allocation Fund is authorized to borrow money. Borrowing may be considered to be a form of leverage. The 1940 Act requires a Fund to maintain continuous asset coverage of 300% of the amount borrowed. If the 300% asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) should decline as a result of market fluctuations or for other reasons, the Conservative Allocation Fund may be required to sell some of its portfolio holdings within three days in order to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. Borrowed funds are subject to interest costs that may or may not be offset by amounts earned on the borrowed funds. The Conservative Allocation Fund may be required to maintain minimum average balances in connection with its borrowing or pay a commitment or other fee to maintain a line of credit, and either of these requirements would serve to increase the cost of borrowing over the stated interest rate.

Securities Lending

The Conservative Allocation Fund is permitted to engage in securities lending to the extent permitted by SEC policy. Qualified institutions may borrow portfolio securities on a short-term basis. By reinvesting any cash collateral received in these transactions, additional income gains or losses may be realized. Although voting rights of the loaned securities may pass to the borrower, if a material event affecting the investment in the loaned securities is to occur, the Fund must terminate the loan and vote the securities. Alternatively, the Conservative Allocation Fund may enter into an arrangement that ensures that it can vote the proxy even while the borrower continues to hold the securities.

Under the Lending Agreement between the Funds and Mitsubishi, the Conservative Allocation Fund may lend securities to approved borrowers in exchange for collateral in the amount of at least 100% of the market value of U.S. Government securities loaned, 102% of the market value of domestic securities and foreign securities denominated in the same currency as the collateral loaned, and 105% of the market value of foreign securities not denominated in the same currency as the collateral loaned. Each loan will be secured continuously by collateral in the form of cash or U.S. Government securities. During the term of the loan, the Conservative Allocation Fund will receive payments from borrowers equivalent to the dividends and interest that would have been earned on securities lent while simultaneously seeking to earn income on the investment of cash collateral in accordance with investment guidelines contained in the Lending Agreement. Realized income from the program is apportioned between the Conservative Allocation Fund and Mitsubishi in accordance with the Lending Agreement.

The Conservative Allocation Fund is subject to certain risks while its securities are on loan, including the following: (i) the risk that the borrower defaults on the loan and the collateral is inadequate to cover the Conservative Allocation Fund's loss; (ii) the risk that the earnings on the collateral invested are not sufficient to pay fees incurred in connection with the loan; (iii) the risk that the Conservative Allocation Fund could lose money in the event of a decline in the value of the collateral provided for loaned securities or a decline in the value of any investments made with cash collateral; (iv) the risk that the borrower may use the loaned securities to cover a short sale, which may in turn place downward pressure on the market prices of the loaned securities; (v) the risk that return of loaned securities could be delayed and interfere with portfolio management decisions; and (vi) the risk that any efforts to restrict or recall the securities for purposes of voting may not be effective. These events could also trigger adverse tax consequences for the Conservative Allocation Fund.

Foreign Securities

The Conservative Allocation Fund may invest in equity or debt securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies. The Conservative Allocation Fund may occasionally convert U.S. dollars into foreign currency, but only to effect securities transactions and not to hold such currency as an investment. The Conservative Allocation Fund will not invest in forward foreign currency contracts, except to hedge against the currency risk related to foreign securities held in the portfolio.

Investments in foreign securities may involve additional risks that may not be associated with investing in U.S. securities. An investment may be affected by changes in currency rates and in exchange control regulations. Foreign securities may be subject to adverse changes in foreign economic, political, regulatory and other conditions; the imposition of trade sanctions or other government restrictions (including tariffs); and diplomatic developments. Any of these could impact the value or liquidity of the Conservative Allocation Fund's investments and could impair the Conservative Allocation Fund's ability to meet their investment objective. Foreign securities issuers may not be subject to uniform accounting, auditing, corporate governance, legal and financial reporting standards comparable to those applicable to domestic issuers, and there may be less publicly available information about a foreign issuer than about a domestic issuer. Some foreign securities markets may have substantially less trading activity than the United States securities markets, and securities of some foreign issuers may be relatively less liquid than securities of comparable domestic issuers. Also, commissions on transactions in foreign securities may be higher than similar transactions on domestic securities, and foreign governments may impose taxes on securities transactions or ownership. There is generally less governmental regulation of securities issuers, securities exchanges and brokers in foreign countries than in the United States. In addition, individual foreign economies may differ favorably or unfavorably from the economy of the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Illiquid Investments

The Conservative Allocation Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments. An "illiquid investment" is any investment that the Conservative Allocation Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

The Trust has adopted a liquidity risk management program ("LRMP") pursuant to which the Funds identify illiquid investments. Under the LRMP, the Adviser has been designated to administer the LRMP and has delegated certain responsibilities to the Liquidity Risk Management Committee, which is comprised of certain operations, compliance, trading, and portfolio management representatives of the Adviser. The Adviser preliminarily identifies illiquid investments based on, among other things, the trading characteristics and market depth of a particular investment.

Each business day, the Adviser determines the liquidity classifications for the portfolio holdings of the Conservative Allocation Fund pursuant to procedures set forth in the LRMP. The liquidity classifications, which are defined in Rule 22e-4 under the 1940 Act, are highly liquid, moderately liquid, less liquid, and illiquid investments. In making these determinations, the Adviser will consider the relevant market, trading, and investment-specific considerations for a particular investment. Moreover, in making these determinations, the Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Conservative Allocation Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Adviser must take that determination into account. In addition, the Adviser may also consider the following factors in its determination: (i) the existence of an active market; (ii) whether it is exchange-traded; (iii) frequency of trades or quotes and average daily trading volume; (iv) volatility of trading prices; (v) bid-ask spreads; (vi) whether the asset has a relatively standardized and simple structure; (vii) the maturity and date of issue (as applicable); and (viii) any restrictions on transfer.

Bank Obligations

The Conservative Allocation Fund may purchase bank obligations, including negotiable certificates of deposit and bankers' acceptances, which evidence the banking institution's obligation to repay funds deposited with it for a specified period of time at a stated interest rate. The Conservative Allocation Fund will normally purchase such obligations from financial institutions which have capital, surplus and undivided profits in excess of $100,000,000 as of the date of the bank's most recently published financial statements and financial institutions whose obligations are insured by the Federal Deposit Insurance Corporation. Certificates of deposit generally have penalties for early withdrawal, but can be sold to third parties subject to the same risks as other debt securities.

U.S. Government Obligations

A portion of the Conservative Allocation Fund may be invested in obligations issued or guaranteed by the U.S. Government, its agencies or Government-Sponsored Enterprises ("GSEs"). Some of the obligations purchased by the Conservative Allocation Fund may be backed by the full faith and credit of the U.S. Government, which means that the obligations are guaranteed as to both principal and interest by the U.S. Treasury. Examples of these include direct obligations of the U.S. Treasury, such as U.S. Treasury bills, notes and bonds, and indirect obligations of the U.S. Treasury, such as obligations of the Government National Mortgage Association, Small Business Administration, Maritime Administration, Farmers Home Administration and Department of Veterans Affairs.

While the obligations of many U.S. Government agencies are not direct obligations of the U.S. Treasury, they may be backed indirectly by the U.S. Government, in some cases by a right to borrow from the U.S. Government. Other agencies and Government-Sponsored Enterprises ("GSEs") are supported solely by the credit of the agency or GSE itself, or may be given additional support from U.S. Treasury authority to purchase outstanding debt obligations. GSEs include, among others, Federal Home Loan Banks, Federal Farm Credit Banks, Fannie Mae and Freddie Mac; and debt and mortgage-backed securities of these four entities are neither guaranteed nor insured by the U.S. Government. Circumstances could arise in which U.S. government obligations, including U.S. treasury obligations that are backed by the full faith and credit of the U.S. government, experience increased credit risk (including the risk of default) and reduced market liquidity (which may result in such securities becoming less liquid or illiquid). The long-term credit rating of the U.S. government may be downgraded by major rating agencies due to, among other things, an actual or expected fiscal deterioration, a high and growing government debt burden and an erosion of governance relative to peers, which would adversely affect investments in U.S. government securities.

Furthermore, with respect to any U.S. Government securities purchased by the Conservative Allocation Fund, guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities, nor do they extend to the value of the Conservative Allocation Fund's shares.

Repurchase Agreements

The Conservative Allocation Fund may invest in repurchase agreements on U.S. Government securities. Repurchase agreements involve the purchase of U.S. Government securities and a simultaneous agreement with the seller to "repurchase" the securities at a specified price and time, thereby determining the yield during the purchaser's holding period. This results in a fixed rate of return insulated from market fluctuations during such period. Repurchase agreements usually are for short periods, such as one week. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by the Conservative Allocation Fund but only constitute collateral for the seller's obligation to pay the repurchase price and, in the event of a default by the seller, the Conservative Allocation Fund may suffer delays and incur costs or losses in connection with the disposition of the collateral. A repurchase agreement may involve certain risks not associated with a direct purchase of U.S. Government securities. For example, the bank or broker selling the repurchase agreement may default on its obligations to deliver additional securities or to maintain the value of collateral underlying the repurchase agreement or it may fail to repurchase the underlying securities at a time when the value has declined. The Conservative Allocation Fund may incur a loss as a result of such default if the liquidation of the collateral results in proceeds less than the repurchase price. In an effort to minimize such risks, the Conservative Allocation Fund will only enter into repurchase agreements with member banks of the Federal Reserve with assets, surplus and undivided profits of $100,000,000 or more or recognized regional or national securities dealers.

Structured Products

Structured products include a wide variety of investment products, including agency and non-agency residential mortgage-backed securities, commercial mortgage-backed securities, other asset-backed securities (such as automobile loans, credit card receivables, other consumer loans and other debt securitizations), collateralized obligations (such as collateralized loan obligations ("CLOs") and collateralized mortgage obligations ("CMOs"). Risks from structured products include (i) underlying collateral may not be adequate to make payments to investors, (ii) underlying collateral may default, decline in value or quality or be downgraded by a rating agency; (iii) the structure and complexity of the transaction and the legal documents could lead to disputes among investors and (iv) the structured product's manager may perform poorly. Non-payment on a structured product would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the Fund's net asset value per share. In most cases, structured products are issued in several classes (sometimes called tranches), with different payment priorities. Generally, the lower classes are subordinated in priority of payments, and will be impacted first in case of an issuer's non-payment of scheduled interest or principal. In some cases, the securities holders of one class must receive payment in full before the securities holders of a lower class receive any payments. The Fund may invest in any class of a structured product offering. Some structured products have credit ratings (or in some cases only certain classes of a structured product have credit ratings), but in many cases structured products do not have credit ratings. Normally, structured products are privately offered and sold (that is, they are not registered under the securities laws), which means (A) the security will not be traded on an exchange, (B) less information about the security may be available as compared to publicly offered securities, (C) only certain institutions may buy and sell the security, and (D) the security may have greater liquidity risk. There can be no assurance that a market will exist or will be active enough for the Fund to sell any structured product.

Mortgage-Backed and Asset-Backed Securities

The Fund may invest in residential and commercial mortgage-backed securities. Mortgage-backed securities are mortgage-related securities issued or guaranteed by the U.S. government, its agencies and instrumentalities, or issued by non-government entities. Mortgage-related securities represent ownership in pools of mortgage loans on single-family, multi-family properties, as well as commercial properties assembled for sale to investors by various government agencies such as the Government National Mortgage Association ("GNMA") and government-related organizations such as the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation ("FHLMC"), as well as by nongovernment issuers such as commercial banks, savings and loan institutions, mortgage bankers and private mortgage insurance companies. Although certain mortgage-related securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. These securities differ from conventional bonds in that the principal is paid back to the investor as payments are made on the underlying mortgages in the pool. Accordingly, the Fund receives monthly scheduled payments of principal and interest along with any unscheduled principal prepayments on the underlying mortgages. Because these scheduled and unscheduled principal payments must be reinvested at prevailing interest rates, mortgage-backed securities do not provide an effective means of locking in long-term interest rates for the investor.

Asset-backed securities are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as corporate loans, student loans, automobile loans, as well as receivables from credit card agreements and from sales of personal property. Regular payments received on asset-backed securities include both interest and principal. Asset-backed securities typically have no U.S. government backing. Additionally, the ability of an issuer of asset-backed securities to enforce its security interest in the underlying assets may be limited.

Mortgage-backed and other asset-backed securities are subject to the risks of traditional fixed-income instruments. However, because they are generally structured for the securities holders to receive periodic payments as the securities issuer receives payments on the mortgages (or loans) in an underlying asset pool, they are also subject to prepayment risk and extension risk, meaning that if interest rates fall, the underlying debt may be repaid ahead of schedule, reducing the value of the Fund's investments and if interest rates rise, there may be fewer prepayments, which would cause the average bond maturity to rise, increasing the potential for the Fund to lose money. Sometimes these securities are issued in separate tranches, which can mean the securities holders of one tranche receive payment in full before the securities holders of another tranche receive payments. Mortgage-backed and other asset-backed securities are also susceptible to changes in lending standards and lending rates. In addition, mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities collateralized by subprime loans may be subject to a higher degree of credit risk and valuation risk. Additionally, such securities may be subject to a higher degree of liquidity risk, because the liquidity of such investments may vary dramatically over time.

Collateralized Mortgage Obligations ("CMOs")

A CMO is a hybrid between a mortgage-backed bond and a mortgage pass-through security. A CMO is a type of mortgage-backed security that creates separate classes or tranches with varying maturities and interest rates, called tranches. Similar to a bond, interest and prepaid principal is paid, in most cases, semiannually. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Government-Sponsored Enterprises ("GSEs") and their income streams. CMOs are generally subject to the same risks as mortgage-backed securities. In addition, CMOs may be subject to credit risk because the issuer or credit enhancer has defaulted on its obligations and the Fund may not receive all or part of its principal.

Collateralized Debt Obligations ("CDOs")

A CDO is a security backed by a pool of bonds, loans and other debt obligations. CDOs are not limited to investing in one type

of debt and accordingly, a CDO may own corporate bonds, commercial loans, asset-backed securities, residential mortgage-backed securities, commercial mortgage-backed securities, and emerging market debt. The CDO's securities are typically divided into several classes, or bond tranches, that have differing levels of investment grade or credit tolerances. Most CDO issues are structured in a way that enables the senior bond classes and mezzanine classes to receive investment-grade credit ratings. Credit risk is shifted to the most junior class of securities. If any defaults occur in the assets backing a CDO, the senior bond classes are first in line to receive principal and interest payments, followed by the mezzanine classes and finally by the lowest rated (or non-rated) class, which is known as the equity tranche.

Collateralized Loan Obligations ("CLOs")

CLOs are debt instruments typically backed by a pool of loans. The risks of an investment in a CLO depend largely on the type of the collateral securities and the class of the CLO in which the Fund invests. In addition to the normal interest rate, default and other risks of fixed income securities, CLOs carry additional risks, including the possibility that distributions from collateral securities will not be adequate to make interest or other payments, the quality of the collateral may decline in value or default, the Fund may invest in CLOs that are subordinate to other classes, values may be volatile, and disputes with the issuer may produce unexpected investment results.

Loans and Participation Interests in Loans

The types of debt instruments in which the Conservative Allocation Fund may invest also includes loans, including bank loans, corporate loans, commercial loans, mortgage loans and consumer loans ("Loans"). Loans are subject to credit risk, including the risk of nonpayment of principal or interest. Also, periods of deteriorating economic conditions, such as recessions or periods of rising unemployment, or substantial increases in interest rates may cause an increase in loan defaults. Although the loans the Fund holds may be fully collateralized at the time of acquisition, the collateral may decline in value, be relatively illiquid, or lose all or substantially all of its value subsequent to investment. If a borrower files for protection from its creditors under the U.S. bankruptcy laws, these laws may limit the Fund's rights to its collateral. In addition, the value of collateral may erode during a bankruptcy case. Many loans are subject to extended settlement periods and it may take greater than seven days for a loan purchase or sale transaction to settle. Loans may also be subject to restrictions on resale and may be difficult to value. Long settlement periods, any restrictions on a Fund's ability to resell a loan investment and any difficulties in valuing a loan investment will have an adverse impact on a Fund's ability to sell particular loans when necessary to meet redemption requests or liquidity needs, or to respond to a specific economic event, such as deterioration in the creditworthiness of the borrower. These effects may make it more difficult for the Fund to pay investors when they redeem their Fund shares. Loans may also be subject to extension risk (the risk that borrowers will repay a loan more slowly in periods of rising interest rates) and prepayment risk (the risk that borrowers will repay a loan more quickly in periods of falling interest rates).

The Conservative Allocation Fund may invest in second lien loans (secured loans with a claim on collateral subordinate to a senior lender's claim on such collateral) and unsecured loans. The claims of holders of unsecured loans are subordinated to, and thus lower in priority of payment to, claims of creditors holding secured indebtedness and possibly other classes of creditors holding unsecured debt. Unsecured loans have a greater risk of default than secured loans, particularly during periods of deteriorating economic conditions. Since they do not afford the lender recourse to collateral, unsecured loans are also subject to greater risk of nonpayment in the event of default than secured loans. Such loans generally have greater price volatility than more senior loans and may be less liquid. In addition, in the event an issuer becomes insolvent, a loan could be subject to settlement risks or administrative disruptions that could adversely affect the Fund's investment.

The Fund may also invest in floating rate loans. Commercial banks and other financial institutions or institutional investors make floating rate loans to companies that need capital to grow or restructure. Borrowers generally pay interest on these loans at rates that change in response to changes in market interest rates such as the Secured Overnight Financing Rate ("SOFR") or the prime rates of U.S. banks. As a result, the value of loan investments is generally less exposed to the adverse effects of shifts in market interest rates than investments that pay a fixed rate of interest. However, because the trading market for certain loans may be less developed than the secondary market for bonds and notes, the Fund may experience difficulties in selling its loans.

The Conservative Allocation Fund may invest in loan participation interests, which are fractional interests in a loan, issued by a lender or other financial institution. The lender selling the participation interest remains the legal owner of the loan. Where the Fund is a participant in a loan, it does not have any direct claim on the loan or any rights of set-off against the borrower and may not benefit directly from any collateral supporting the loan. Loan participation interests are subject to credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. The lack of a highly liquid secondary market may have an adverse impact on the ability to dispose of particular loan participations when necessary to meet redemption of a Fund's shares, to meet a Fund's liquidity needs or when necessary in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. The lack of a highly liquid secondary market for loan participations also may make it more difficult for a Fund to value these investments for purposes of calculating its net asset value.

Commercial Paper

The Conservative Allocation Fund may purchase commercial paper which consists of short-term unsecured promissory notes. The Fund will purchase only commercial paper either (a) rated Prime 1 by Moody's (or with an equivalent or better rating from another rating agency); or (b) if not rated, then issued by or guaranteed by companies which have an outstanding debt issue rated Aa or better by Moody's (or with an equivalent or better rating from another rating agency).

When Issued or Forward Commitment Transactions

The Conservative Allocation Fund may engage in when issued or forward commitment transactions which involve the purchase or sale of a security by the Conservative Allocation Fund with payment and delivery taking place in the future to secure what is considered an advantageous yield and price to the Conservative Allocation Fund at the time of entering into the transaction. When the Conservative Allocation Fund engages in when issued or forward commitment transactions, it relies on the other party to consummate the trade. This subjects the Conservative Allocation Fund to counterparty credit risk.

Short Sales, Put and Call Options

The Conservative Allocation Fund may engage in short sales and buy and sell put and call options. Short sales involve the sale of a security that the Conservative Allocation Fund does not own (but instead has borrowed) in anticipation of a decline in the value of the security. The Conservative Allocation Fund must then purchase the security by a future date, as specified in the short sale contract. Under current regulatory requirements, to the extent that the Conservative Allocation Fund engages in short sales, the Conservative Allocation Fund will place in a segregated account a sufficient amount of cash and securities as required by applicable federal securities regulations in order to cover the transaction. In the event that the value of the security sold short increases in value rather than decreases, the Conservative Allocation Fund would suffer a loss when it purchases the security sold short. Since there is, theoretically, no limit to how high the price of the stock might rise, the potential loss from the short sale is greater than the original proceeds of the short sale. For any short sale, the amount of any gain will be decreased (and the amount of any loss will be increased) by any premium or interest the Conservative Allocation Fund may be required to pay in connection with the short sale. Short selling may also produce higher portfolio turnover and result in increased transaction costs to the Conservative Allocation Fund. The Conservative Allocation Fund may also engage in short sales "against the box," where the Conservative Allocation Fund contemporaneously owns or has the right to obtain at no additional cost securities identical to those sold short. In the event that the Conservative Allocation Fund were to sell securities short "against the box" and the price of such securities were to then increase rather than decrease, the Conservative Allocation Fund would forego the potential realization of the increased value of the shares held long.

The SEC has adopted the Derivatives Rule. The Derivatives Rule regulates the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies. These requirements may limit the ability of the Conservative Allocation Fund to use derivatives and reverse repurchase agreements and similar financing transactions as part of its investment strategies. The Derivatives Rule requires the Conservative Allocation Fund to trade derivatives and other transactions that create future payment or delivery obligations subject to a value-at-risk ("VaR") leverage limit, certain derivatives risk management program and reporting requirements. Generally, these requirements apply unless the Fund qualifies as a "limited derivatives user." Under the Derivatives Rule, when the Conservative Allocation Fund trades reverse repurchase agreements or similar financing transactions, including certain tender option bonds, it needs to aggregate the amount of indebtedness associated with the reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the Conservative Allocation Fund's asset coverage ratio or treat all such transactions as derivatives transactions. Reverse repurchase agreements or similar financing transactions aggregated with other indebtedness do not need to be included in the calculation of whether the Conservative Allocation Fund is a limited derivatives user, but for funds subject to the VaR testing, reverse repurchase agreements and similar financing transactions must be included for purposes of such testing whether treated as derivatives transactions or not. The SEC also issued guidance in connection with the rule regarding the use of securities lending collateral that may limit the Fund's securities lending activities. In addition, under the Derivatives Rule, the Conservative Allocation Fund is permitted to invest in a security on a when-issued or forward-settling basis, or with a non-standard settlement cycle, and the transaction will be deemed not to involve a senior security under the 1940 Act, provided that (i) the Fund intends to physically settle the transaction and (ii) the transaction will settle within 35 days of its trade date (the "Delayed-Settlement Securities Provision"). The Conservative Allocation Fund may otherwise engage in such transactions that do not meet the conditions of the Delayed-Settlement Securities Provision so long as the Conservative Allocation Fund treats any such transaction as a "derivatives transaction" for purposes of compliance with the Derivatives Rule. Furthermore, under the Derivatives Rule, the Conservative Allocation Fund will be permitted to enter into an unfunded commitment agreement, and such unfunded commitment agreement will not be subject to the asset coverage requirements under the 1940 Act, if the Fund reasonably believes, at the time it enters into such agreement, that it will have sufficient cash and cash equivalents to meet its obligations with respect to all such agreements as they come due. These and other proposed and adopted regulatory requirements may limit the ability of the Conservative Allocation Fund to use derivatives, reverse repurchase agreements and similar financing transactions, when-issued, delayed delivery and forward commitment transactions, and unfunded commitment agreements as part of its investment strategies.

Options such as puts and calls are contracts giving the holder the right to either buy or sell a financial instrument at a specified price before a specified time. Investments in puts and calls involve certain risks including the risk that since puts and calls are options which have an expiration date, the Conservative Allocation Fund could lose the entire cost of those puts and calls which expire worthless.

Covered Call Options

The Conservative Allocation Fund may write covered call options to generate premium income which Weitz Inc. considers to be an acceptable investment result. Covered call options are contracts sold on a national exchange or in the over-the-counter options market which allow the purchaser to buy the underlying security at a specified price (the "strike price") prior to a certain date. "Covered" options are those in which the option seller (the "writer") owns the underlying securities. Writing covered call options may increase the income of the Conservative Allocation Fund since it receives a premium for writing the option. If the Conservative Allocation Fund writes covered call options, the underlying securities will be subject to certain deposit procedures and unavailable for sale during the term of the option. As a result, the Conservative Allocation Fund will forego any opportunity for appreciation in such securities during the term of the option. The Conservative Allocation Fund may attempt to protect itself against a decline in the price of the underlying security or may attempt to benefit from an anticipated increase in such price, by closing the covered call position that is, purchasing an identical call in the open market. There is no assurance, however, that such calls will always be available for purchase in the secondary market at a price which will produce the desired result. The absence of a liquid secondary market in such securities could result from numerous circumstances, such as insufficient trading interest, restrictions imposed by exchanges as to options trading generally or suspensions affecting particular securities, inadequacy of exchange or clearing corporation facilities or decisions by exchanges to discontinue or limit operations trading.

Interest Rate Futures, Bond Index Futures and Related Options Thereon

The Conservative Allocation Fund may utilize interest rate futures and bond index futures and related options. A futures contract provides for the future sale by one party and the purchase by the other party of specified property at a specified price, date, time and place. An option on a futures contract gives the purchaser the right, in return for a premium paid, to assume a position in the futures contract at a specified exercise price.

Fundamental Investment Restrictions

The following investment restrictions are fundamental restrictions which cannot be changed without the approval of a majority of the Conservative Allocation Fund's outstanding shares. "Majority" means, the lesser of (a) 67% or more of the Conservative Allocation Fund's outstanding shares voting at a special or annual meeting of shareholders at which more than 50% of the outstanding shares are represented in person or by proxy or (b) more than 50% of the Conservative Allocation Fund's outstanding shares.

The Conservative Allocation Fund may not:

1. Underwrite or deal in offerings of securities of other issuers as a sponsor or underwriter in any way.
2. Purchase or sell real estate except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
3. Purchase or sell physical commodities or commodity futures contracts, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
4. Issue any senior security, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
5. Make loans to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
6. Borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
7. Invest more than 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies and instrumentalities and repurchase agreements relating thereto.
8. As to 50% of its total assets, (a) invest more than 5% of its total assets (taken at market value at the time of each investment) in the securities of any one issuer, nor (b) purchase more than 10% of the outstanding voting securities of an issuer, except that such restrictions shall not apply to securities issued or guaranteed by the U. S. Government or its agencies, bank money instruments or bank repurchase agreements.

INVESTMENT OBJECTIVE, POLICIES AND RESTRICTIONS- CORE PLUS FUND

Classification

The Core Plus Fund is a diversified, open-end investment management company as defined in the 1940 Act.

Investment Objective and Strategy

The primary investment objectives of the Core Plus Fund are current income and capital preservation. A secondary investment objective is long-term capital appreciation. Under normal circumstances, the Core Plus Fund will invest at least 80% of the value of its assets, plus the amount of any borrowings for investment purposes, in debt securities and related derivative instruments. This policy, which is non-fundamental, may be changed without shareholder approval and the Fund will notify its shareholders at least 60 days before any change to this policy. The debt securities in which the Core Plus Fund may invest include: (1) U.S. Government securities (including agency securities, and securities issued by government-sponsored enterprises such as Fannie Mae and Freddie Mac, including their mortgage-backed securities); (2) corporate debt securities; (3) other mortgage-backed securities; (4) asset-backed securities and other structured products: (5) loans and participation interests in loans and loan pools; (6) bank obligations (certificates of deposit and bankers' acceptances); (7) commercial paper; (8) repurchase agreements on U.S. Government securities; (9) securities of registered investment companies which invest in debt securities; and (10) securities issued by foreign governments, which may include sovereign debt.

The Core Plus Fund may, but is not required to, use derivatives, such as options, futures and forward contracts, including interest rate futures, and options on futures. The Fund may use derivatives for a variety of purposes, including to attempt to hedge against adverse changes in the market price of securities, interest rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return; to manage portfolio characteristics; and as a cash flow management technique. The Fund may choose not to make use of derivatives for a variety of reasons, and any use may be limited by applicable law and regulations. These derivative instruments will count toward the Core Plus Fund's 80% policy only if they have economic characteristics similar to the securities included within that policy. The Core Plus Fund may invest in securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies. Although the Core Plus Fund has no limitations on the maturities of individual securities, the average dollar-weighted maturity of the Core Plus Fund's portfolio is generally expected to be less than ten years.

Weitz Inc. selects debt securities whose yield is sufficiently attractive taking into consideration the risk of ownership. In deciding whether the Core Plus Fund should invest in particular debt securities, Weitz Inc. considers a number of factors such as the price, coupon and yield-to-maturity, as well as the credit quality of the issuer. In addition, Weitz Inc. reviews the terms of the debt security, including subordination, default, sinking fund, and early redemption provisions.

The Core Plus Fund will invest primarily in investment-grade securities. We consider investment grade to mean rated at least BBB- by one or more nationally recognized credit ratings firms. The Core Plus Fund may invest up to 25% of its total assets in debt securities which are unrated or which are non-investment grade (commonly referred to as "high yield" or "junk bonds"); however, U.S. Government securities, as described above, even if unrated, do not count toward this 25% limit. Non-investment grade securities have speculative characteristics, and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity to make principal and interest payments than is the case with investment grade securities. In addition, the liquidity of securities may be affected by the market's perception of credit quality, so that the market for non-investment grade securities may be thinner and less active than for investment grade securities, and there may be more price volatility for non-investment grade securities. Prices of non-investment grade debt securities may be more sensitive to adverse economic changes or issuer developments, than investment grade debt securities. Prices of debt securities with longer durations may be more sensitive to interest rate changes, than debt securities with shorter durations. Price changes for debt securities held by the Core Plus Fund will not cause changes to the Fund's cash income from those securities, but will be reflected in the net asset value of Core Plus Fund shares. Therefore, the judgment of Weitz Inc. may at times play a greater role in valuing lower-rated or unrated securities. It also may be more difficult during times of adverse market conditions to sell lower-rated or unrated securities, whether to meet redemption requests or to respond to changes in the market. Although the views of rating agencies may be considered in evaluating particular debt securities, Weitz Inc. will not rely exclusively on such views, but will supplement such views with its independent and ongoing review of credit quality.

The Core Plus Fund may also invest in common stocks, preferred stocks and securities convertible into stocks.

When Weitz Inc. believes that circumstances warrant a temporary defensive investment position, a greater portion or all the Core Plus Fund's portfolio may be retained in cash or cash equivalents, such as money market shares and repurchase agreements on U.S. Government securities.

Securities and Other Investment Practices

This section provides a more detailed description of some of the types of securities and other instruments in which the Core Plus Fund may invest. The Core Plus Fund may invest in these instruments to the extent permitted by its investment objective and policies and by applicable law. The Core Plus Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in the Prospectus or Statement of Additional Information.

Industry Concentration

Although the Core Plus Fund has adopted a fundamental investment restriction which does not allow it to concentrate its investments in any one industry, the Core Plus Fund reserves the right to invest up to 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies or instrumentalities and repurchase agreements relating thereto.

Common Stock and Securities Convertible into Common Stock

The Core Plus Fund may invest in common stock, preferred stock and in other securities convertible into common stock. Convertible bonds and debentures are corporate debt instruments, frequently unsecured and subordinated to senior corporate debt, which may be converted into common stock at a specified price. Such securities may trade at a premium over their face amount when the price of the underlying common stock exceeds the conversion price, but otherwise will normally trade at prices reflecting current interest rate trends.

U.S. Government Obligations

A portion of the Core Plus Fund may be invested in obligations issued or guaranteed by the U.S. Government, its agencies or Government-Sponsored Enterprises ("GSEs"). Some of the obligations purchased by the Core Plus Fund may be backed by the full faith and credit of the U.S. Government, which means that the obligations are guaranteed as to both principal and interest by the U.S. Treasury. Examples of these include direct obligations of the U.S. Treasury, such as U.S. Treasury bills, notes and bonds, and indirect obligations of the U.S. Treasury, such as obligations of the Government National Mortgage Association, Small Business Administration, Maritime Administration, Farmers Home Administration and Department of Veterans Affairs.

While the obligations of many U.S. Government agencies are not direct obligations of the U.S. Treasury, they may be backed indirectly by the U.S. Government, in some cases by a right to borrow from the U.S. Government. Other agencies and Government-Sponsored Enterprises ("GSEs") are supported solely by the credit of the agency or GSE itself, or may be given additional support from U.S. Treasury authority to purchase outstanding debt obligations. GSEs include, among others, Federal Home Loan Banks, Federal Farm Credit Banks, Fannie Mae and Freddie Mac; and debt and mortgage-backed securities of these four entities are neither guaranteed nor insured by the U.S. Government. Circumstances could arise in which U.S. government obligations, including U.S. treasury obligations that are backed by the full faith and credit of the U.S. government, experience increased credit risk (including the risk of default) and reduced market liquidity (which may result in such securities becoming less liquid or illiquid). The long-term credit rating of the U.S. government may be downgraded by major rating agencies due to, among other things, an actual or expected fiscal deterioration, a high and growing government debt burden and an erosion of governance relative to peers, which would adversely affect investments in U.S. government securities.

Furthermore, with respect to any U.S. Government securities purchased by the Core Plus Fund, guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities, nor do they extend to the value of the Core Plus Fund's shares.

Repurchase Agreements

The Core Plus Fund may invest in repurchase agreements on U.S. Government securities. Repurchase agreements involve the purchase of U.S. Government securities and a simultaneous agreement with the seller to "repurchase" the securities at a specified price and time, thereby determining the yield during the purchaser's holding period. This results in a fixed rate of return insulated from market fluctuations during such period. Repurchase agreements usually are for short periods, such as one week. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by the Core Plus Fund but only constitute collateral for the seller's obligation to pay the repurchase price and, in the event of a default by the seller, the Core Plus Fund may suffer delays and incur costs or losses in connection with the disposition of the collateral. A repurchase agreement may involve certain risks not associated with a direct purchase of U.S. Government securities. For example, the bank or broker selling the repurchase agreement may default on its obligations to deliver additional securities or to maintain the value of collateral underlying the repurchase agreement or it may fail to repurchase the underlying securities at a time when the value has declined. The Core Plus Fund may incur a loss as a result of such default if the liquidation of the collateral results in proceeds less than the repurchase price. In an effort to minimize such risks, the Core Plus Fund will only enter into repurchase agreements with member banks of the Federal Reserve with assets, surplus and undivided profits of $100,000,000 or more or recognized regional or national securities dealers.

Structured Products

Structured products include a wide variety of investment products, including agency and non-agency residential mortgage-backed securities, commercial mortgage-backed securities, other asset-backed securities (such as automobile loans, credit card receivables, other consumer loans and other debt securitizations), collateralized obligations (such as collateralized loan obligations ("CLOs") and collateralized mortgage obligations ("CMOs"). Risks from structured products include (i) underlying collateral may not be adequate to make payments to investors, (ii) underlying collateral may default, decline in value or quality or be downgraded by a rating agency; (iii) the structure and complexity of the transaction and the legal documents could lead to disputes among investors and (iv) the structured product's manager may perform poorly. Non-payment on a structured product would result in a reduction of income to the Core Plus Fund, a reduction in the value of the investment and a potential decrease in the Core Plus Fund's net asset value per share. In most cases, structured products are issued in several classes (sometimes called tranches), with different payment priorities. Generally, the lower classes are subordinated in priority of payments, and will be impacted first in case of an issuer's non-payment of scheduled interest or principal. In some cases, the securities holders of one class must receive payment in full before the securities holders of a lower class receive any payments. The Core Plus Fund may invest in any class of a structured product offering. Some structured products have credit ratings (or in some cases only certain classes of a structured product have credit ratings), but in many cases structured products do not have credit ratings. Normally, structured products are privately offered and sold (that is, they are not registered under the securities laws), which means (A) the security will not be traded on an exchange, (B) less information about the security may be available as compared to publicly offered securities, (C) only certain institutions may buy and sell the security, and (D) the security may have greater liquidity risk. There can be no assurance that a market will exist or will be active enough for the Fund to sell any structured product.

Mortgage-Backed and Asset-Backed Securities

The Core Plus Fund may invest in residential and commercial mortgage-backed securities. Mortgage-backed securities are mortgage-related securities issued or guaranteed by the U.S. government, its agencies and instrumentalities, or issued by non-government entities. Mortgage-related securities represent ownership in pools of mortgage loans on single-family, multi-family properties, as well as commercial properties assembled for sale to investors by various government agencies such as the Government National Mortgage Association ("GNMA") and government-related organizations such as the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation ("FHLMC"), as well as by nongovernment issuers such as commercial banks, savings and loan institutions, mortgage bankers and private mortgage insurance companies. Although certain mortgage-related securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. These securities differ from conventional bonds in that the principal is paid back to the investor as payments are made on the underlying mortgages in the pool. Accordingly, the Core Plus Fund receives monthly scheduled payments of principal and interest along with any unscheduled principal prepayments on the underlying mortgages. Because these scheduled and unscheduled principal payments must be reinvested at prevailing interest rates, mortgage-backed securities do not provide an effective means of locking in long-term interest rates for the investor.

Asset-backed securities are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as corporate loans, student loans, automobile loans, as well as receivables from credit card agreements and from sales of personal property. Regular payments received on asset-backed securities include both interest and principal. Asset-backed securities typically have no U.S. government backing. Additionally, the ability of an issuer of asset-backed securities to enforce its security interest in the underlying assets may be limited.

Mortgage-backed and other asset-backed securities are subject to the risks of traditional fixed-income instruments. However, because they are generally structured for the securities holders to receive periodic payments as the securities issuer receives payments on the mortgages (or loans) in an underlying asset pool, they are also subject to prepayment risk and extension risk, meaning that if interest rates fall, the underlying debt may be repaid ahead of schedule, reducing the value of the Fund's investments and if interest rates rise, there may be fewer prepayments, which would cause the average bond maturity to rise, increasing the potential for the Fund to lose money. Sometimes these securities are issued in separate tranches, which can mean the securities holders of one tranche receive payment in full before the securities holders of another tranche receive payments. Mortgage-backed and other asset-backed securities are also susceptible to changes in lending standards and lending rates. In addition, mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities collateralized by subprime loans may be subject to a higher degree of credit risk and valuation risk. Additionally, such securities may be subject to a higher degree of liquidity risk, because the liquidity of such investments may vary dramatically over time.

Collateralized Mortgage Obligations ("CMOs")

A CMO is a hybrid between a mortgage-backed bond and a mortgage pass-through security. A CMO is a type of mortgage-backed security that creates separate classes or tranches with varying maturities and interest rates, called tranches. Similar to a bond, interest and prepaid principal is paid, in most cases, semiannually. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Government-Sponsored Enterprises ("GSEs") and their income streams. CMOs are generally subject to the same risks as mortgage-backed securities. In addition, CMOs may be subject to credit risk because the issuer or credit enhancer has defaulted on its obligations and the Fund may not receive all or part of its principal.

Collateralized Loan Obligations ("CLOs")

CLOs are debt instruments typically backed by a pool of loans. The risks of an investment in a CLO depend largely on the type of the collateral securities and the class of the CLO in which the Fund invests. In addition to the normal interest rate, default and other risks of fixed income securities, CLOs carry additional risks, including the possibility that distributions from collateral securities will not be adequate to make interest or other payments, the quality of the collateral may decline in value or default, the Fund may invest in CLOs that are subordinate to other classes, values may be volatile, and disputes with the issuer may produce unexpected investment results.

Loans and Participation Interests in Loans

The types of debt instruments in which the Core Plus Fund may invest also includes loans, including bank loans, corporate loans, commercial loans, mortgage loans and consumer loans ("Loans"). Loans are subject to credit risk, including the risk of nonpayment of principal or interest. Also, periods of deteriorating economic conditions, such as recessions or periods of rising unemployment, or substantial increases in interest rates may cause an increase in loan defaults. Although the loans the Core Plus Fund holds may be fully collateralized at the time of acquisition, the collateral may decline in value, be relatively illiquid, or lose all or substantially all of its value subsequent to investment. If a borrower files for protection from its creditors under the U.S. bankruptcy laws, these laws may limit the Fund's rights to its collateral. In addition, the value of collateral may erode during a bankruptcy case. Many loans are subject to extended settlement periods and it may take greater than seven days for a loan purchase or sale transaction to settle. Loans may also be subject to restrictions on resale and may be difficult to value. Long settlement periods, any restrictions on a Fund's ability to resell a loan investment and any difficulties in valuing a loan investment will have an adverse impact on a Fund's ability to sell particular loans when necessary to meet redemption requests or liquidity needs, or to respond to a specific economic event, such as deterioration in the creditworthiness of the borrower. These effects may make it more difficult for the Core Plus Fund to pay investors when they redeem their Fund shares. Loans may also be subject to extension risk (the risk that borrowers will repay a loan more slowly in periods of rising interest rates) and prepayment risk (the risk that borrowers will repay a loan more quickly in periods of falling interest rates).

The Core Plus Fund may invest in second lien loans (secured loans with a claim on collateral subordinate to a senior lender's claim on such collateral) and unsecured loans. The claims of holders of unsecured loans are subordinated to, and thus lower in priority of payment to, claims of creditors holding secured indebtedness and possibly other classes of creditors holding unsecured debt. Unsecured loans have a greater risk of default than secured loans, particularly during periods of deteriorating economic conditions. Since they do not afford the lender recourse to collateral, unsecured loans are also subject to greater risk of nonpayment in the event of default than secured loans. Such loans generally have greater price volatility than more senior loans and may be less liquid. In addition, in the event an issuer becomes insolvent, a loan could be subject to settlement risks or administrative disruptions that could adversely affect the Fund's investment.

The Core Plus Fund may also invest in floating rate loans. Commercial banks and other financial institutions or institutional investors make floating rate loans to companies that need capital to grow or restructure. Borrowers generally pay interest on these loans at rates that change in response to changes in market interest rates such as the Secured Overnight Financing Rate ("SOFR") or the prime rates of U.S. banks. As a result, the value of loan investments is generally less exposed to the adverse effects of shifts in market interest rates than investments that pay a fixed rate of interest. However, because the trading market for certain loans may be less developed than the secondary market for bonds and notes, the Fund may experience difficulties in selling its loans.

The Core Plus Fund may invest in loan participation interests, which are fractional interests in a loan, issued by a lender or other financial institution. The lender selling the participation interest remains the legal owner of the loan. Where the Fund is a participant in a loan, it does not have any direct claim on the loan or any rights of set-off against the borrower and may not benefit directly from any collateral supporting the loan. Loan participation interests are subject to credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. The lack of a highly liquid secondary market may have an adverse impact on the ability to dispose of particular loan participations when necessary to meet redemption of a Fund's shares, to meet a Fund's liquidity needs or when necessary in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. The lack of a highly liquid secondary market for loan participations also may make it more difficult for a Fund to value these investments for purposes of calculating its net asset value.

Commercial Paper

The Core Plus Fund may purchase commercial paper which consists of short-term unsecured promissory notes. The Core Plus Fund will purchase only commercial paper either (a) rated Prime 1 by Moody's or A-1 (or with an equivalent or better rating from another rating agency); or (b) if not rated, then issued or guaranteed by companies which have an outstanding debt issue rated Aa or better by Moody's (or with an equivalent or better rating from another rating agency).

Borrowing

The Core Plus Fund is authorized to borrow money. Borrowing may be considered to be a form of leverage. The 1940 Act requires a Fund to maintain continuous asset coverage of 300% of the amount borrowed. If the 300% asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) should decline as a result of market fluctuations or for other reasons, the Core Plus Fund may be required to sell some of its portfolio holdings within three days in order to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. Borrowed funds are subject to interest costs that may or may not be offset by amounts earned on the borrowed funds. The Core Plus Fund may be required to maintain minimum average balances in connection with its borrowing or pay a commitment or other fee to maintain a line of credit, and either of these requirements would serve to increase the cost of borrowing over the stated interest rate.

Securities Lending

The Core Plus Fund is permitted to engage in securities lending to the extent permitted by SEC policy. Qualified institutions may borrow portfolio securities on a short-term basis. By reinvesting any cash collateral received in these transactions, additional income gains or losses may be realized. Although voting rights of the loaned securities may pass to the borrower, if a material event affecting the investment in the loaned securities is to occur, the Fund must terminate the loan and vote the securities. Alternatively, the Core Plus Fund may enter into an arrangement that ensures that it can vote the proxy even while the borrower continues to hold the securities.

Under the Lending Agreement between the Funds and Mitsubishi, the Core Plus Fund may lend securities to approved borrowers in exchange for collateral in the amount of at least 100% of the market value of U.S. Government securities loaned, 102% of the market value of domestic securities and foreign securities denominated in the same currency as the collateral loaned, and 105% of the market value of foreign securities not denominated in the same currency as the collateral loaned. Each loan will be secured continuously by collateral in the form of cash or U.S. Government securities. During the term of the loan, the Core Plus Fund will receive payments from borrowers equivalent to the dividends and interest that would have been earned on securities lent while simultaneously seeking to earn income on the investment of cash collateral in accordance with investment guidelines contained in the Lending Agreement. Realized income from the program is apportioned between the Core Plus Fund and Mitsubishi in accordance with the Lending Agreement.

The Core Plus Fund is subject to certain risks while its securities are on loan, including the following: (i) the risk that the borrower defaults on the loan and the collateral is inadequate to cover the Core Plus Fund's loss; (ii) the risk that the earnings on the collateral invested are not sufficient to pay fees incurred in connection with the loan; (iii) the risk that the Core Plus Fund could lose money in the event of a decline in the value of the collateral provided for loaned securities or a decline in the value of any investments made with cash collateral; (iv) the risk that the borrower may use the loaned securities to cover a short sale, which may in turn place downward pressure on the market prices of the loaned securities; (v) the risk that return of loaned securities could be delayed and interfere with portfolio management decisions; and (vi) the risk that any efforts to restrict or recall the securities for purposes of voting may not be effective. These events could also trigger adverse tax consequences for the Core Plus Fund.

Foreign Securities

The Core Plus Fund may invest in securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies. The Core Plus Fund may occasionally convert U.S. dollars into foreign currency, but only to effect securities transactions and not to hold such currency as an investment. The Core Plus Fund will not invest in forward foreign currency contracts, except to hedge against the currency risk related to foreign securities held in the portfolio.

Investments in foreign securities may involve additional risks that may not be associated with investing in U.S. securities. An investment may be affected by changes in currency rates and in exchange control regulations. Foreign securities may be subject to adverse changes in foreign economic, political, regulatory and other conditions; the imposition of trade sanctions or other government restrictions (including tariffs); and diplomatic developments. Any of these could impact the value or liquidity of the Core Plus Fund's investments and could impair the Core Plus Fund's ability to meet its investment objective. Foreign securities issuers may not be subject to uniform accounting, auditing, corporate governance, legal and financial reporting standards comparable to those applicable to domestic issuers, and there may be less publicly available information about a foreign issuer than about a domestic issuer. Some foreign securities markets may have substantially less trading activity than the United States securities markets, and securities of some foreign issuers may be relatively less liquid than securities of comparable domestic issuers. Also, commissions on transactions in foreign securities may be higher than similar transactions on domestic securities, and foreign governments may impose taxes on securities transactions or ownership. There is generally less governmental regulation of securities issuers, securities exchanges and brokers in foreign countries than in the United States. In addition, individual foreign economies may differ favorably or unfavorably from the economy of the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Investment Company Shares

The Core Plus Fund may purchase securities of other investment companies, subject to the restrictions of the 1940 Act. Investing in the shares of other registered investment companies involves the risk that such other registered investment companies will not achieve their objectives or will achieve a yield or return that is lower than that of the Core Plus Fund. To the extent that the Core Plus Fund is invested in shares of other investment companies, the Core Plus Fund will incur additional expenses as a result of investing in investment company shares.

Investments in Exchange Traded Funds

The Core Plus Fund may invest in ETFs, including ETFs that are designed to appreciate in value when the value of a broad or narrow market index declines. ETFs that are based on an index may not be able to replicate and maintain exactly the composition and relative weightings of securities in the applicable index. ETFs that are based on an index also incur certain expenses not incurred by their applicable index. Additionally, certain securities comprising the index tracked by an ETF may, at times, be temporarily unavailable, which may impede an ETF's ability to track its index. As a holder of interests in an ETF, the Core Plus Fund would indirectly bear its ratable share of that fund's expenses, including applicable management fees. At the same time, the Core Plus Fund would continue to pay its own management and advisory fees and other expenses, as a result of which the Core Plus Fund and its shareholders in effect may be absorbing multiple levels of certain fees with respect to investments in such ETFs.

Bank Obligations

The Core Plus Fund may purchase bank obligations, including negotiable certificates of deposit and bankers' acceptances which evidence the obligation of the banking institution to repay funds deposited with it for a specified period of time at a stated interest rate. The Core Plus Fund will normally purchase such obligations from financial institutions which have capital, surplus and undivided profits in excess of $100,000,000 as of the date of the bank's most recently published financial statements and financial institutions whose obligations are insured by the Federal Deposit Insurance Corporation. Certificates of deposit generally have penalties for early withdrawal, but can be sold to third parties subject to the same risks as other debt securities.

Illiquid Investments

The Core Plus Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments. An "illiquid investment" is any investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

The Trust has adopted a liquidity risk management program ("LRMP") pursuant to which the Funds identify illiquid investments. Under the LRMP, the Adviser has been designated to administer the LRMP and has delegated certain responsibilities to the Liquidity Risk Management Committee, which is comprised of certain operations, compliance, trading, and portfolio management representatives of the Adviser. The Adviser preliminarily identifies illiquid investments based on, among other things, the trading characteristics and market depth of a particular investment.

Each business day, the Adviser determines the liquidity classifications for the portfolio holdings of the Core Plus Fund pursuant to procedures set forth in the LRMP. The liquidity classifications, which are defined in Rule 22e-4 under the 1940 Act, are highly liquid, moderately liquid, less liquid, and illiquid investments. In making these determinations, the Adviser will consider the relevant market, trading, and investment-specific considerations for a particular investment. Moreover, in making these determinations, the Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Core Plus Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Adviser must take that determination into account. In addition, the Adviser may also consider the following factors in its determination: (i) the existence of an active market; (ii) whether it is exchange-traded; (iii) frequency of trades or quotes and average daily trading volume; (iv) volatility of trading prices; (v) bid-ask spreads; (vi) whether the asset has a relatively standardized and simple structure; (vii) the maturity and date of issue (as applicable); and (viii) any restrictions on transfer.

When Issued or Forward Commitment Transactions

The Core Plus Fund may engage in when issued or forward purchase transactions which involve the purchase or sale of a security by the Core Plus Fund with payment and delivery taking place in the future to secure what is considered an advantageous yield and price to the Core Plus Fund at the time of entering into the transaction. When the Core Plus Fund engages in when issued or forward commitment transactions, it relies on the other party to consummate the trade. This subjects the Core Plus Fund to counterparty credit risk.

Short Sales

The Core Plus Fund may engage in short sales "against the box," where the Core Plus Fund contemporaneously owns or has the right to obtain at no additional cost securities identical to those sold short. In the event that the Core Plus Fund were to sell securities short "against the box" and the price of such securities were to then increase rather than decrease, the Core Plus Fund would forego the potential realization of the increased value of the shares held long.

Short sales and other derivatives instruments are considered derivatives under Rule 18f-4 under the 1940 Act. The Derivatives Rule regulates the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies. These requirements may limit the ability of the Core Plus Fund to use derivatives and reverse repurchase agreements and similar financing transactions as part of its investment strategies. The Derivatives Rule requires the Core Plus Fund to trade derivatives and other transactions that create future payment or delivery obligations subject to a value-at-risk ("VaR") leverage limit, certain derivatives risk management program and reporting requirements. Generally, these requirements apply unless the Fund qualifies as a "limited derivatives user." Under the Derivatives Rule, when the Core Plus Fund trades reverse repurchase agreements or similar financing transactions, including certain tender option bonds, it needs to aggregate the amount of indebtedness associated with the reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the Core Plus Fund's asset coverage ratio or treat all such transactions as derivatives transactions. Reverse repurchase agreements or similar financing transactions aggregated with other indebtedness do not need to be included in the calculation of whether the Core Plus Fund is a limited derivatives user, but for funds subject to the VaR testing, reverse repurchase agreements and similar financing transactions must be included for purposes of such testing whether treated as derivatives transactions or not. The SEC also issued guidance in connection with the rule regarding the use of securities lending collateral that may limit the Fund's securities lending activities. In addition, under the Derivatives Rule, the Core Plus Fund is permitted to invest in a security on a when-issued or forward-settling basis, or with a non-standard settlement cycle, and the transaction will be deemed not to involve a senior security under the 1940 Act, provided that (i) the Fund intends to physically settle the transaction and (ii) the transaction will settle within 35 days of its trade date (the "Delayed-Settlement Securities Provision"). The Core Plus Fund may otherwise engage in such transactions that do not meet the conditions of the Delayed-Settlement Securities Provision so long as the Core Plus Fund treats any such transaction as a "derivatives transaction" for purposes of compliance with the Derivatives Rule. Furthermore, under the Derivatives Rule, the Core Plus Fund will be permitted to enter into an unfunded commitment agreement, and such unfunded commitment agreement will not be subject to the asset coverage requirements under the 1940 Act, if the Fund reasonably believes, at the time it enters into such agreement, that it will have sufficient cash and cash equivalents to meet its obligations with respect to all such agreements as they come due. These and other proposed and adopted regulatory requirements may limit the ability of the Core Plus Fund to use derivatives, reverse repurchase agreements and similar financing transactions, when-issued, delayed delivery and forward commitment transactions, and unfunded commitment agreements as part of its investment strategies.

Covered Call Options

The Core Plus Fund may write covered call options to generate premium income which Weitz Inc. considers to be an acceptable investment result. Covered call options are contracts sold on a national exchange or in the over-the-counter options market which allow the purchaser to buy the underlying security at a specified price (the "strike price") prior to a certain date. "Covered" options are those in which the option seller (the "writer") owns the underlying securities. Writing covered call options may increase the income of the Core Plus Fund since it receives a premium for writing the option. If the Core Plus Fund writes covered call options, the underlying securities will be subject to certain deposit procedures and unavailable for sale during the term of the option. As a result, the Core Plus Fund will forego any opportunity for appreciation in such securities during the term of the option. The Core Plus Fund may attempt to protect itself against a decline in the price of the underlying security or may attempt to benefit from an anticipated increase in such price, by closing the covered call position that is, purchasing an identical call in the open market. There is no assurance, however, that such calls will always be available for purchase in the secondary market at a price which will produce the desired result. The absence of a liquid secondary market in such securities could result from numerous circumstances, such as insufficient trading interest, restrictions imposed by exchanges as to options trading generally or suspensions affecting particular securities, inadequacy of exchange or clearing corporation facilities or decisions by exchanges to discontinue or limit operations trading.

Interest Rate Futures, Bond Index Futures and Related Options Thereon

The Core Plus Fund may utilize interest rate futures and bond index futures and related options. A futures contract provides for the future sale by one party and the purchase by the other party of specified property at a specified price, date, time and place. An option on a futures contract gives the purchaser the right, in return for a premium paid, to assume a position in the futures contract at a specified exercise price.

Fundamental Investment Restrictions

The following investment restrictions are fundamental restrictions which cannot be changed without the approval of a majority of the Core Plus Fund's outstanding shares. "Majority" means, the lesser of (a) 67% or more of the Core Plus Fund's outstanding shares voting at a special or annual meeting of shareholders at which more than 50% of the outstanding shares are represented in person or by proxy or (b) more than 50% of the Core Plus Fund's outstanding shares.

The Core Plus Fund may not:

1. Underwrite or deal in offerings of securities of other issuers as a sponsor or underwriter in any way.
2. Purchase or sell real estate except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
3. Purchase or sell physical commodities or commodity futures contracts, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
4. Issue any senior security, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
5. Make loans to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
6. Borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
7. Invest more than 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies and instrumentalities and repurchase agreements relating thereto.
8. As to 75% of its total assets, invest more than 5% of its total assets taken at market value at the time of a particular purchase in the securities of any one issuer other than U.S. Government securities, nor own more than 10% at the time of and giving effect to, a particular purchase of the outstanding voting securities of any one issuer.

INVESTMENT OBJECTIVE, POLICIES AND RESTRICTIONS- SHORT DURATION INCOME FUND

Classification

The Short Duration Income Fund is a diversified, open-end investment management company as defined in the 1940 Act.

Investment Objective and Strategy

The investment objective of the Short Duration Fund is current income consistent with the preservation of capital. Under normal circumstances, the Short Duration Fund will invest at least 80% of the value of its assets, plus the amount of any borrowings for investment purposes, in debt securities and related derivative instruments. This policy, which is non-fundamental, may be changed without shareholder approval and the Fund will notify its shareholders at least 60 days before any change to this policy. The debt securities in which the Short Duration Fund may invest include: (1) U.S. Government securities (including agency securities, and securities issued by government-sponsored enterprises such as Fannie Mae and Freddie Mac, including their mortgage-backed securities); (2) corporate debt securities; (3) other mortgage-backed securities; (4) asset-backed securities and other structured products; (5) loans and participation interests in loans and loan pools; (6) bank obligations (certificates of deposit and bankers' acceptances); (7) commercial paper; (8) repurchase agreements on U.S. Government securities; (9) securities of registered investment companies which invest in debt securities; and (10) securities issued by foreign governments, which may include sovereign debt.

The Short Duration Fund may, but is not required to, use derivatives instruments, such as options, futures and forward contracts, including interest rate futures, and options on futures. The Fund may use derivatives for a variety of purposes, including to attempt to hedge against adverse changes in the market price of securities, interest rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return; to manage portfolio characteristics; and as a cash flow management technique. The Fund may choose not to make use of derivatives for a variety of reasons, and any use may be limited by applicable law and regulations. These derivative instruments will count toward the Short Duration Fund's 80% policy only if they have economic characteristics similar to the securities included within that policy. The Short Duration Fund may invest in securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies.

The Short Duration Fund may invest in securities of all maturities but expects to maintain an average effective duration of between one to three and a half years. "Duration" is a measure of a debt security's price sensitivity to changes in interest rates. The longer the duration of the Fund's overall portfolio (or an individual debt security), the more sensitive its market price will be to changes in interest rates. For example, if interest rates increase by 1%, the market price of a debt security with a duration of 3 years will generally decrease by approximately 3%. Conversely, a 1% decline in interest rates will generally result in an increase of approximately 3% of that security's market price.

Weitz Inc. selects debt securities whose yield is sufficiently attractive taking into consideration the risk of ownership. In deciding whether the Short Duration Fund should invest in particular debt securities, Weitz Inc. considers a number of factors such as the price, coupon and yield-to-maturity, as well as the credit quality of the issuer. In addition, Weitz Inc. reviews the terms of the debt security, including subordination, default, sinking fund, and early redemption provisions.

The Short Duration Fund will invest primarily in investment-grade securities. We consider investment grade to mean rated at least BBB- by one or more nationally recognized credit ratings firms. The Short Duration Fund may invest up to 15% of its total assets in debt securities which are unrated or which are non-investment grade (commonly referred to as "high yield" or "junk bonds"); however, U.S. Government securities, as described above, even if unrated, do not count toward this 15% limit. Non-investment grade securities have speculative characteristics, and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity to make principal and interest payments than is the case with investment grade securities. In addition, the liquidity of securities may be affected by the market's perception of credit quality, so that the market for non-investment grade securities may be thinner and less active than for investment grade securities, and there may be more price volatility for non-investment grade securities. Prices of non-investment grade debt securities may be more sensitive to adverse economic changes or issuer developments, than investment grade debt securities. Prices of debt securities with longer durations may be more sensitive to interest rate changes, than debt securities with shorter durations. Price changes for debt securities held by the Short Duration Fund will not cause changes to the Fund's cash income from those securities, but will be reflected in the net asset value of Short Duration Fund shares. Therefore, the judgment of Weitz Inc. may at times play a greater role in valuing lower-rated or unrated securities. It also may be more difficult during times of adverse market conditions to sell lower-rated or unrated securities, whether to meet redemption requests or to respond to changes in the market. Although the views of rating agencies may be considered in evaluating particular debt securities, Weitz Inc. will not rely exclusively on such views, but will supplement such views with its independent and ongoing review of credit quality.

The Short Duration Fund may also invest in common stocks, preferred stocks and securities convertible into stocks.

When Weitz Inc. believes that circumstances warrant a temporary defensive investment position, a greater portion or all the Short Duration Fund's portfolio may be retained in cash or cash equivalents, such as money market shares and repurchase agreements on U.S. Government securities.

Securities and Other Investment Practices

This section provides a more detailed description of some of the types of securities and other instruments in which the Short Duration Fund may invest. The Short Duration Fund may invest in these instruments to the extent permitted by its investment objective and policies and by applicable law. The Short Duration Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in the Prospectus or Statement of Additional Information.

Industry Concentration

Although the Short Duration Fund has adopted a fundamental investment restriction which does not allow it to concentrate its investments in any one industry, the Short Duration Fund reserves the right to invest up to 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies or instrumentalities and repurchase agreements relating thereto.

Common Stock and Securities Convertible into Common Stock

The Short Duration Fund may invest in common stock, preferred stock and in other securities convertible into common stock. Convertible bonds and debentures are corporate debt instruments, frequently unsecured and subordinated to senior corporate debt, which may be converted into common stock at a specified price. Such securities may trade at a premium over their face amount when the price of the underlying common stock exceeds the conversion price, but otherwise will normally trade at prices reflecting current interest rate trends.

U.S. Government Obligations

A portion of the Short Duration Fund may be invested in obligations issued or guaranteed by the U.S. Government, its agencies or Government-Sponsored Enterprises ("GSEs"). Some of the obligations purchased by the Short Duration Fund may be backed by the full faith and credit of the U.S. Government, which means that the obligations are guaranteed as to both principal and interest by the U.S. Treasury. Examples of these include direct obligations of the U.S. Treasury, such as U.S. Treasury bills, notes and bonds, and indirect obligations of the U.S. Treasury, such as obligations of the Government National Mortgage Association, Small Business Administration, Maritime Administration, Farmers Home Administration and Department of Veterans Affairs.

While the obligations of many U.S. Government agencies are not direct obligations of the U.S. Treasury, they may be backed indirectly by the U.S. Government, in some cases by a right to borrow from the U.S. Government. Other agencies and Government-Sponsored Enterprises ("GSEs") are supported solely by the credit of the agency or GSE itself, or may be given additional support from U.S. Treasury authority to purchase outstanding debt obligations. GSEs include, among others, Federal Home Loan Banks, Federal Farm Credit Banks, Fannie Mae and Freddie Mac; and debt and mortgage-backed securities of these four entities are neither guaranteed nor insured by the U.S. Government. Circumstances could arise in which U.S. government obligations, including U.S. treasury obligations that are backed by the full faith and credit of the U.S. government, experience increased credit risk (including the risk of default) and reduced market liquidity (which may result in such securities becoming less liquid or illiquid). The long-term credit rating of the U.S. government may be downgraded by major rating agencies due to, among other things, an actual or expected fiscal deterioration, a high and growing government debt burden and an erosion of governance relative to peers, which would adversely affect investments in U.S. government securities.

Furthermore, with respect to any U.S. Government securities purchased by the Short Duration Fund, guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities, nor do they extend to the value of a Fund's shares.

Repurchase Agreements

The Short Duration Fund may invest in repurchase agreements on U.S. Government securities. Repurchase agreements involve the purchase of U.S. Government securities and a simultaneous agreement with the seller to "repurchase" the securities at a specified price and time, thereby determining the yield during the purchaser's holding period. This results in a fixed rate of return insulated from market fluctuations during such period. Repurchase agreements usually are for short periods, such as one week. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by the Short Duration Fund but only constitute collateral for the seller's obligation to pay the repurchase price and, in the event of a default by the seller, the Short Duration Fund may suffer delays and incur costs or losses in connection with the disposition of the collateral. A repurchase agreement may involve certain risks not associated with a direct purchase of U.S. Government securities. For example, the bank or broker selling the repurchase agreement may default on its obligations to deliver additional securities or to maintain the value of collateral underlying the repurchase agreement or it may fail to repurchase the underlying securities at a time when the value has declined. The Short Duration Fund may incur a loss as a result of such default if the liquidation of the collateral results in proceeds less than the repurchase price. In an effort to minimize such risks, the Short Duration Fund will only enter into repurchase agreements with member banks of the Federal Reserve with assets, surplus and undivided profits of $100,000,000 or more or recognized regional or national securities dealers.

Structured Products

Structured products include a wide variety of investment products, including agency and non-agency residential mortgage-backed securities, commercial mortgage-backed securities, other asset-backed securities (such as automobile loans, credit card receivables, other consumer loans and other debt securitizations), collateralized obligations (such as collateralized loan obligations ("CLOs") and collateralized mortgage obligations ("CMOs"). Risks from structured products include (i) underlying collateral may not be adequate to make payments to investors, (ii) underlying collateral may default, decline in value or quality or be downgraded by a rating agency; (iii) the structure and complexity of the transaction and the legal documents could lead to disputes among investors and (iv) the structured product's manager may perform poorly. Non-payment on a structured product would result in a reduction of income to the Fund, a reduction in the value of the investment and a potential decrease in the Fund's net asset value per share. In most cases, structured products are issued in several classes (sometimes called tranches), with different payment priorities. Generally, the lower classes are subordinated in priority of payments, and will be impacted first in case of an issuer's non-payment of scheduled interest or principal. In some cases, the securities holders of one class must receive payment in full before the securities holders of a lower class receive any payments. The Short Duration Fund may invest in any class of a structured product offering. Some structured products have credit ratings (or in some cases only certain classes of a structured product have credit ratings), but in many cases structured products do not have credit ratings. Normally, structured products are privately offered and sold (that is, they are not registered under the securities laws), which means (A) the security will not be traded on an exchange, (B) less information about the security may be available as compared to publicly offered securities, (C) only certain institutions may buy and sell the security, and (D) the security may have greater liquidity risk. There can be no assurance that a market will exist or will be active enough for the Fund to sell any structured product.

Mortgage-Backed and Asset-Backed Securities

The Short Duration Fund may invest in residential and commercial mortgage-backed securities. Mortgage-backed securities are mortgage-related securities issued or guaranteed by the U.S. government, its agencies and instrumentalities, or issued by non-government entities. Mortgage-related securities represent ownership in pools of mortgage loans on single-family, multi-family properties, as well as commercial properties assembled for sale to investors by various government agencies such as the Government National Mortgage Association ("GNMA") and government-related organizations such as the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation ("FHLMC"), as well as by nongovernment issuers such as commercial banks, savings and loan institutions, mortgage bankers and private mortgage insurance companies. Although certain mortgage-related securities are guaranteed by a third party or otherwise similarly secured, the market value of the security, which may fluctuate, is not so secured. These securities differ from conventional bonds in that the principal is paid back to the investor as payments are made on the underlying mortgages in the pool. Accordingly, the Fund receives monthly scheduled payments of principal and interest along with any unscheduled principal prepayments on the underlying mortgages. Because these scheduled and unscheduled principal payments must be reinvested at prevailing interest rates, mortgage-backed securities do not provide an effective means of locking in long-term interest rates for the investor.

Asset-backed securities are structured like mortgage-backed securities, but instead of mortgage loans or interests in mortgage loans, the underlying assets may include such items as corporate loans, student loans, automobile loans, as well as receivables from credit card agreements and from sales of personal property. Regular payments received on asset-backed securities include both interest and principal. Asset-backed securities typically have no U.S. government backing. Additionally, the ability of an issuer of asset-backed securities to enforce its security interest in the underlying assets may be limited.

Mortgage-backed and other asset-backed securities are subject to the risks of traditional fixed-income instruments. However, because they are generally structured for the securities holders to receive periodic payments as the securities issuer receives payments on the mortgages (or loans) in an underlying asset pool, they are also subject to prepayment risk and extension risk, meaning that if interest rates fall, the underlying debt may be repaid ahead of schedule, reducing the value of the Fund's investments and if interest rates rise, there may be fewer prepayments, which would cause the average bond maturity to rise, increasing the potential for the Fund to lose money. Sometimes these securities are issued in separate tranches, which can mean the securities holders of one tranche receive payment in full before the securities holders of another tranche receive payments. Mortgage-backed and other asset-backed securities are also susceptible to changes in lending standards and lending rates. In addition, mortgage-backed securities comprised of subprime mortgages and investments in other asset-backed securities collateralized by subprime loans may be subject to a higher degree of credit risk and valuation risk. Additionally, such securities may be subject to a higher degree of liquidity risk, because the liquidity of such investments may vary dramatically over time.

Collateralized Mortgage Obligations ("CMOs")

A CMO is a hybrid between a mortgage-backed bond and a mortgage pass-through security. A CMO is a type of mortgage-backed security that creates separate classes or tranches with varying maturities and interest rates, called tranches. Similar to a bond, interest and prepaid principal is paid, in most cases, semiannually. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by Government-Sponsored Enterprises ("GSEs") and their income streams. CMOs are generally subject to the same risks as mortgage-backed securities. In addition, CMOs may be subject to credit risk because the issuer or credit enhancer has defaulted on its obligations and the Fund may not receive all or part of its principal.

Collateralized Loan Obligations ("CLOs")

CLOs are debt instruments typically backed by a pool of loans. The risks of an investment in a CLO depend largely on the type of the collateral securities and the class of the CLO in which the Fund invests. In addition to the normal interest rate, default and other risks of fixed income securities, CLOs carry additional risks, including the possibility that distributions from collateral securities will not be adequate to make interest or other payments, the quality of the collateral may decline in value or default, the Fund may invest in CLOs that are subordinate to other classes, values may be volatile, and disputes with the issuer may produce unexpected investment results.

Loans and Participation Interests in Loans

The types of debt instruments in which the Short Duration Fund may invest also includes loans, including bank loans, corporate loans, commercial loans, mortgage loans and consumer loans ("Loans"). Loans are subject to credit risk, including the risk of nonpayment of principal or interest. Also, periods of deteriorating economic conditions, such as recessions or periods of rising unemployment, or substantial increases in interest rates may cause an increase in loan defaults. Although the loans the Fund holds may be fully collateralized at the time of acquisition, the collateral may decline in value, be relatively illiquid, or lose all or substantially all of its value subsequent to investment. If a borrower files for protection from its creditors under the U.S. bankruptcy laws, these laws may limit the Fund's rights to its collateral. In addition, the value of collateral may erode during a bankruptcy case. Many loans are subject to extended settlement periods and it may take greater than seven days for a loan purchase or sale transaction to settle. Loans may also be subject to restrictions on resale and may be difficult to value. Long settlement periods, any restrictions on a Fund's ability to resell a loan investment and any difficulties in valuing a loan investment will have an adverse impact on a Fund's ability to sell particular loans when necessary to meet redemption requests or liquidity needs, or to respond to a specific economic event, such as deterioration in the creditworthiness of the borrower. These effects may make it more difficult for the Fund to pay investors when they redeem their Fund shares. Loans may also be subject to extension risk (the risk that borrowers will repay a loan more slowly in periods of rising interest rates) and prepayment risk (the risk that borrowers will repay a loan more quickly in periods of falling interest rates).

The Short Duration Fund may invest in second lien loans (secured loans with a claim on collateral subordinate to a senior lender's claim on such collateral) and unsecured loans. The claims of holders of unsecured loans are subordinated to, and thus lower in priority of payment to, claims of creditors holding secured indebtedness and possibly other classes of creditors holding unsecured debt. Unsecured loans have a greater risk of default than secured loans, particularly during periods of deteriorating economic conditions. Since they do not afford the lender recourse to collateral, unsecured loans are also subject to greater risk of nonpayment in the event of default than secured loans. Such loans generally have greater price volatility than more senior loans and may be less liquid. In addition, in the event an issuer becomes insolvent, a loan could be subject to settlement risks or administrative disruptions that could adversely affect the Fund's investment.

The Short Duration Fund may also invest in floating rate loans. Commercial banks and other financial institutions or institutional investors make floating rate loans to companies that need capital to grow or restructure. Borrowers generally pay interest on these loans at rates that change in response to changes in market interest rates such as the Secured Overnight Financing Rate ("SOFR") or the prime rates of U.S. banks. As a result, the value of loan investments is generally less exposed to the adverse effects of shifts in market interest rates than investments that pay a fixed rate of interest. However, because the trading market for certain loans may be less developed than the secondary market for bonds and notes, the Fund may experience difficulties in selling its loans.

The Short Duration Fund may invest in loan participation interests, which are fractional interests in a loan, issued by a lender or other financial institution. The lender selling the participation interest remains the legal owner of the loan. Where the Fund is a participant in a loan, it does not have any direct claim on the loan or any rights of set-off against the borrower and may not benefit directly from any collateral supporting the loan. Loan participation interests are subject to credit risk of both the borrower and the lender that is selling the participation. In the event of the insolvency of the lender selling a participation, a Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower. The lack of a highly liquid secondary market may have an adverse impact on the ability to dispose of particular loan participations when necessary to meet redemption of a Fund's shares, to meet a Fund's liquidity needs or when necessary in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. The lack of a highly liquid secondary market for loan participations also may make it more difficult for a Fund to value these investments for purposes of calculating its net asset value.

Commercial Paper

The Short Duration Fund may purchase commercial paper which consists of short-term unsecured promissory notes. The Short Duration Fund will purchase only commercial paper either (a) rated Prime 1 by Moody's (or with an equivalent or better rating from another rating agency); or (b) if not rated, then issued by or guaranteed by companies which have an outstanding debt issue rated Aa or better by Moody's (or with an equivalent or better rating from another rating agency).

Borrowing

The Short Duration Fund is authorized to borrow money. Borrowing may be considered to be a form of leverage. The 1940 Act requires a Fund to maintain continuous asset coverage of 300% of the amount borrowed. If the 300% asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) should decline as a result of market fluctuations or for other reasons, the Short Duration Fund may be required to sell some of its portfolio holdings within three days in order to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. Borrowed funds are subject to interest costs that may or may not be offset by amounts earned on the borrowed funds. The Short Duration Fund

may be required to maintain minimum average balances in connection with its borrowing or pay a commitment or other fee to maintain a line of credit, and either of these requirements would serve to increase the cost of borrowing over the stated interest rate.

Securities Lending

The Short Duration Fund is permitted to engage in securities lending to the extent permitted by SEC policy. Qualified institutions may borrow portfolio securities on a short-term basis. By reinvesting any cash collateral received in these transactions, additional income gains or losses may be realized. Although voting rights of the loaned securities may pass to the borrower, if a material event affecting the investment in the loaned securities is to occur, the Fund must terminate the loan and vote the securities. Alternatively, the Short Duration Fund may enter into an arrangement that ensures that it can vote the proxy even while the borrower continues to hold the securities.

Under the Lending Agreement between the Funds and Mitsubishi, the Short Duration Fund may lend securities to approved borrowers in exchange for collateral in the amount of at least 100% of the market value of U.S. Government securities loaned, 102% of the market value of domestic securities and foreign securities denominated in the same currency as the collateral loaned, and 105% of the market value of foreign securities not denominated in the same currency as the collateral loaned. Each loan will be secured continuously by collateral in the form of cash or U.S. Government securities. During the term of the loan, the Short Duration Fund will receive payments from borrowers equivalent to the dividends and interest that would have been earned on securities lent while simultaneously seeking to earn income on the investment of cash collateral in accordance with investment guidelines contained in the Lending Agreement. Realized income from the program is apportioned between the Short Duration Fund and Mitsubishi in accordance with the Lending Agreement.

The Short Duration Fund is subject to certain risks while its securities are on loan, including the following: (i) the risk that the borrower defaults on the loan and the collateral is inadequate to cover the Short Duration Fund's loss; (ii) the risk that the earnings on the collateral invested are not sufficient to pay fees incurred in connection with the loan; (iii) the risk that the Short Duration Fund could lose money in the event of a decline in the value of the collateral provided for loaned securities or a decline in the value of any investments made with cash collateral; (iv) the risk that the borrower may use the loaned securities to cover a short sale, which may in turn place downward pressure on the market prices of the loaned securities; (v) the risk that return of loaned securities could be delayed and interfere with portfolio management decisions; and (vi) the risk that any efforts to restrict or recall the securities for purposes of voting may not be effective. These events could also trigger adverse tax consequences for the Short Duration Fund.

Foreign Securities

The Short Duration Fund may invest in securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies. The Short Duration Fund may occasionally convert U.S. dollars into foreign currency, but only to effect securities transactions and not to hold such currency as an investment. The Short Duration Fund will not invest in forward foreign currency contracts, except to hedge against the currency risk related to foreign securities held in the portfolio.

Investments in foreign securities may involve additional risks that may not be associated with investing in U.S. securities. An investment may be affected by changes in currency rates and in exchange control regulations. Foreign securities may be subject to adverse changes in foreign economic, political, regulatory and other conditions; the imposition of trade sanctions or other government restrictions (including tariffs); and diplomatic developments. Any of these could impact the value or liquidity of the Short Duration Fund's investments and could impair the Short Duration Fund's ability to meet its investment objective. Foreign securities issuers may not be subject to uniform accounting, auditing, corporate governance, legal and financial reporting standards comparable to those applicable to domestic issuers, and there may be less publicly available information about a foreign issuer than about a domestic issuer. Some foreign securities markets may have substantially less trading activity than the United States securities markets, and securities of some foreign issuers may be relatively less liquid than securities of comparable domestic issuers. Also, commissions on transactions in foreign securities may be higher than similar transactions on domestic securities, and foreign governments may impose taxes on securities transactions or ownership. There is generally less governmental regulation of securities issuers, securities exchanges and brokers in foreign countries than in the United States. In addition, individual foreign economies may differ favorably or unfavorably from the economy of the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Investment Company Shares

The Short Duration Fund may purchase securities of other investment companies, subject to the restrictions of the 1940 Act. Investing in the shares of other registered investment companies involves the risk that such other registered investment companies will not achieve their objectives or will achieve a yield or return that is lower than that of the Short Duration Fund. To the extent that the Short Duration Fund is invested in shares of other investment companies, the Short Duration Fund will incur additional expenses as a result of investing in investment company shares.

Investments in Exchange Traded Funds

The Short Duration Fund may invest in ETFs, including ETFs that are designed to appreciate in value when the value of a broad or narrow market index declines. ETFs that are based on an index may not be able to replicate and maintain exactly the composition and relative weightings of securities in the applicable index. ETFs that are based on an index also incur certain expenses not incurred by their applicable index. Additionally, certain securities comprising the index tracked by an ETF may, at times, be temporarily unavailable, which may impede an ETF's ability to track its index. As a holder of interests in an ETF, the Short Duration Fund would indirectly bear its ratable share of that fund's expenses, including applicable management fees. At the same time, the Short Duration Fund would continue to pay its own management and advisory fees and other expenses, as a result of which the Short Duration Fund and its shareholders in effect may be absorbing multiple levels of certain fees with respect to investments in such ETFs.

Bank Obligations

The Short Duration Fund may purchase bank obligations, including negotiable certificates of deposit and bankers' acceptances which evidence the obligation of the banking institution to repay funds deposited with it for a specified period of time at a stated interest rate. The Short Duration Fund will normally purchase such obligations from financial institutions which have capital, surplus and undivided profits in excess of $100,000,000 as of the date of the bank's most recently published financial statements and financial institutions whose obligations are insured by the Federal Deposit Insurance Corporation. Certificates of deposit generally have penalties for early withdrawal, but can be sold to third parties subject to the same risks as other debt securities.

Illiquid Investments

The Short Duration Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments. An "illiquid investment" is any investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

The Trust has adopted a liquidity risk management program ("LRMP") pursuant to which the Funds identify illiquid investments. Under the LRMP, the Adviser has been designated to administer the LRMP and has delegated certain responsibilities to the Liquidity Risk Management Committee, which is comprised of certain operations, compliance, trading, and portfolio management representatives of the Adviser. The Adviser preliminarily identifies illiquid investments based on, among other things, the trading characteristics and market depth of a particular investment.

Each business day, the Adviser determines the liquidity classifications for the portfolio holdings of the Short Duration Fund pursuant to procedures set forth in the LRMP. The liquidity classifications, which are defined in Rule 22e-4 under the 1940 Act, are highly liquid, moderately liquid, less liquid, and illiquid investments. In making these determinations, the Adviser will consider the relevant market, trading, and investment-specific considerations for a particular investment. Moreover, in making these determinations, the Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Short Duration Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Adviser must take that determination into account. In addition, the Adviser may also consider the following factors in its determination: (i) the existence of an active market; (ii) whether it is exchange-traded; (iii) frequency of trades or quotes and average daily trading volume; (iv) volatility of trading prices; (v) bid-ask spreads; (vi) whether the asset has a relatively standardized and simple structure; (vii) the maturity and date of issue (as applicable); and (viii) any restrictions on transfer.

When Issued or Forward Commitment Transactions

The Short Duration Fund may engage in when issued or forward purchase transactions which involve the purchase or sale of a security by the Short Duration Fund with payment and delivery taking place in the future to secure what is considered an advantageous yield and price to the Short Duration Fund at the time of entering into the transaction. When the Short Duration Fund engages in when issued or forward commitment transactions, it relies on the other party to consummate the trade. This subjects the Short Duration Fund to counterparty credit risk.

Short Sales

The Short Duration Fund may engage in short sales "against the box," where the Short Duration Fund contemporaneously owns or has the right to obtain at no additional cost securities identical to those sold short. In the event that the Short Duration Fund were to sell securities short "against the box" and the price of such securities were to then increase rather than decrease, the Short Duration Fund would forego the potential realization of the increased value of the shares held long.

The SEC has adopted Rule 18f-4 under the 1940 Act (the "Derivatives Rule"). The Derivatives Rule regulates the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies. These requirements may limit the ability of the Short Duration Fund to use derivatives and reverse repurchase agreements and similar financing transactions as part of its investment strategies. The Derivatives Rule requires the Short Duration Fund to trade derivatives and other transactions that create future payment or delivery obligations subject to a value-at-risk ("VaR") leverage limit, certain derivatives risk management program and reporting requirements. Generally, these requirements apply unless the Fund qualifies as a "limited derivatives user." Under the Derivatives Rule, when the Short Duration Fund trades reverse repurchase agreements or similar financing transactions, including certain tender option bonds, it needs to aggregate the amount of indebtedness associated with the reverse repurchase agreements or similar financing transactions with the aggregate amount of any other senior securities representing indebtedness when calculating the Short Duration Fund's asset coverage ratio or treat all such transactions as derivatives transactions. Reverse repurchase agreements or similar financing transactions aggregated with other indebtedness do not need to be included in the calculation of whether the Short Duration Fund is a limited derivatives user, but for funds subject to the VaR testing, reverse repurchase agreements and similar financing transactions must be included for purposes of such testing whether treated as derivatives transactions or not. The SEC also issued guidance in connection with the rule regarding the use of securities lending collateral that may limit the Fund's securities lending activities. In addition, under the Derivatives Rule, the Short Duration Fund is permitted to invest in a security on a when-issued or forward-settling basis, or with a non-standard settlement cycle, and the transaction will be deemed not to involve a senior security under the 1940 Act, provided that (i) the Fund intends to physically settle the transaction and (ii) the transaction will settle within 35 days of its trade date (the "Delayed-Settlement Securities Provision"). The Short Duration Fund may otherwise engage in such transactions that do not meet the conditions of the Delayed-Settlement Securities Provision so long as the Short Duration Fund treats any such transaction as a "derivatives transaction" for purposes of compliance with the Derivatives Rule. Furthermore, under the Derivatives Rule, the Short Duration Fund will be permitted to enter into an unfunded commitment agreement, and such unfunded commitment agreement will not be subject to the asset coverage requirements under the 1940 Act, if the Fund reasonably believes, at the time it enters into such agreement, that it will have sufficient cash and cash equivalents to meet its obligations with respect to all such agreements as they come due. These and other proposed and adopted regulatory requirements may limit the ability of the Short Duration Fund to use derivatives, reverse repurchase agreements and similar financing transactions, when-issued, delayed delivery and forward commitment transactions, and unfunded commitment agreements as part of its investment strategies.

Covered Call Options

The Short Duration Fund may write covered call options to generate premium income which Weitz Inc. considers to be an acceptable investment result. Covered call options are contracts sold on a national exchange or in the over-the-counter options market which allow the purchaser to buy the underlying security at a specified price (the "strike price") prior to a certain date. "Covered" options are those in which the option seller (the "writer") owns the underlying securities. Writing covered call options may increase the income of the Short Duration Fund since it receives a premium for writing the option. If the Short Duration Fund writes covered call options, the underlying securities will be subject to certain deposit procedures and unavailable for sale during the term of the option. As a result, the Short Duration Fund will forego any opportunity for appreciation in such securities during the term of the option. The Short Duration Fund may attempt to protect itself against a decline in the price of the underlying security or may attempt to benefit from an anticipated increase in such price, by closing the covered call position that is, purchasing an identical call in the open market. There is no assurance, however, that such calls will always be available for purchase in the secondary market at a price which will produce the desired result. The absence of a liquid secondary market in such securities could result from numerous circumstances, such as insufficient trading interest, restrictions imposed by exchanges as to options trading generally or suspensions affecting particular securities, inadequacy of exchange or clearing corporation facilities or decisions by exchanges to discontinue or limit operations trading.

Interest Rate Futures, Bond Index Futures and Related Options Thereon

The Short Duration Fund may utilize interest rate futures and bond index futures and related options. A futures contract provides for the future sale by one party and the purchase by the other party of specified property at a specified price, date, time and place. An option on a futures contract gives the purchaser the right, in return for a premium paid, to assume a position in the futures contract at a specified exercise price.

Fundamental Investment Restrictions

The following investment restrictions are fundamental restrictions which cannot be changed without the approval of a majority of the Short Duration Fund's outstanding shares. "Majority" means, the lesser of (a) 67% or more of the Short Duration Fund's outstanding shares voting at a special or annual meeting of shareholders at which more than 50% of the outstanding shares are represented in person or by proxy or (b) more than 50% of the Short Duration Fund's outstanding shares.

The Short Duration Fund may not:

1. Underwrite or deal in offerings of securities of other issuers as a sponsor or underwriter in any way.
2. Purchase or sell real estate except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
3. Purchase or sell physical commodities or commodity futures contracts, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.

4. Issue any senior security, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
5. Make loans to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
6. Borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
7. Invest more than 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies and instrumentalities and repurchase agreements relating thereto.
8. As to 75% of its total assets, invest more than 5% of its total assets taken at market value at the time of a particular purchase in the securities of any one issuer other than U.S. Government securities, nor own more than 10% at the time of and giving effect to, a particular purchase of the outstanding voting securities of any one issuer.

INVESTMENT OBJECTIVE, POLICIES AND RESTRICTIONS- ULTRA SHORT GOVERNMENT FUND

Classification

The Ultra Short Government Fund is a diversified, open-end investment management company as defined in the 1940 Act.

Investment Objective and Strategy

The investment objective of the Ultra Short Government Fund is current income consistent with the preservation of capital and maintenance of liquidity. Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in debt obligations issued or guaranteed by the U.S. Government, its agencies and instrumentalities and repurchase agreements on such securities, and related derivative instruments. This policy, which is non-fundamental, may be changed without shareholder approval and the Fund will notify its shareholders at least 60 days before any change to this policy. The balance of the Fund's assets may be invested in U.S. dollar-denominated investment grade debt securities, including corporate debt securities, mortgage-backed securities, asset backed securities and taxable municipal bonds. We consider investment grade to mean rated at least BBB- by one or more nationally recognized credit ratings firms. The Fund may invest in securities that are unrated if we determine that such securities are of investment grade quality. The Fund may also invest in government money market funds or exchange traded funds which invest substantially all of their assets in U.S. government securities.

The Ultra Short Government Fund may, but is not required to, use derivatives instruments, such as options, futures and forward contracts, including interest rate futures, and options on futures. The Fund may use derivatives for a variety of purposes, including to attempt to hedge against adverse changes in the market price of securities, interest rates; as a substitute for purchasing or selling securities; to attempt to increase the fund's return; to manage portfolio characteristics; and as a cash flow management technique. The Fund may choose not to make use of derivatives for a variety of reasons, and any use may be limited by applicable law and regulations. These derivative instruments will count toward the Ultra Short Government Fund's 80% policy only if they have economic characteristics similar to the securities included within that policy. The Fund may invest in securities issued by non-U.S. issuers, which securities may be denominated in U.S. dollars or foreign currencies.

The Fund may invest in debt securities of all maturities, but expects to limit its average effective duration to one year or less. "Duration" is a measure of a debt security's price sensitivity to changes in interest rates. The longer the duration of the Fund's overall portfolio (or an individual debt security), the more sensitive its market price will be to changes in interest rates. For example, if interest rates increase by 1%, the market price of a debt security with a duration of 1 year will generally decrease by approximately 1%. Conversely, a 1% decline in interest rates will generally result in an increase of approximately 1% of that security's market price.

The Ultra Short Government Fund may invest in reverse repurchase agreements which involve the temporary transfer of a security in the portfolio of the Ultra Short Government Fund to another party, such as a bank or broker dealer, in return for cash, and an agreement to buy the security back at a future date and price. The Ultra Short Government Fund can invest the cash it receives or use it to meet redemption requests. If the Ultra Short Government Fund reinvests the cash at a rate higher than the cost of the agreement, it may earn additional income. At the same time, the Ultra Short Government Fund is exposed to greater potential fluctuations in the value of its assets when engaging in reverse repurchase agreements.

The Ultra Short Government Fund is not a money market fund that operates in compliance with Rule 2a-7 under the 1940 Act and the Fund does not seek to maintain a stable net asset value. Accordingly, the Fund is not subject to the credit quality, liquidity, maturity, diversification and other limitations imposed on money market funds by Rule 2a-7.

Securities and Other Investment Practices

This section provides a more detailed description of some of the types of securities and other instruments in which the Ultra Short Government Fund may invest. The Ultra Short Government Fund may invest in these instruments to the extent permitted by its investment objective and policies and by applicable law. The Ultra Short Government Fund is not limited by this discussion and may invest in any other types of instruments not precluded by the policies discussed elsewhere in the Prospectus or Statement of Additional Information.

U.S. Government Obligations

Under normal circumstances, most of the assets of the Ultra Short Government Fund will be invested in obligations issued or guaranteed by the U.S. Government, its agencies or Government-Sponsored Enterprises ("GSEs"). Some of the obligations purchased by the Ultra Short Government Fund may be backed by the full faith and credit of the U.S. Government, which means that the obligations are guaranteed as to both principal and interest by the U.S. Treasury. Examples of these include direct obligations of the U.S. Treasury, such as U.S. Treasury bills, notes and bonds, and indirect obligations of the U.S. Treasury, such as obligations of the Government National Mortgage Association, Small Business Administration, Maritime Administration, Farmers Home Administration and Department of Veterans Affairs.

While the obligations of many U.S. Government agencies are not direct obligations of the U.S. Treasury, they may be backed indirectly by the U.S. Government, in some cases by a right to borrow from the U.S. Government. Other agencies and Government-Sponsored Enterprises ("GSEs") are supported solely by the credit of the agency or GSE itself, or may be given additional support from U.S. Treasury authority to purchase outstanding debt obligations. GSEs include, among others, Federal Home Loan Banks, Federal Farm Credit Banks, Fannie Mae and Freddie Mac; and debt and mortgage-backed securities of these four entities are neither guaranteed nor insured by the U.S. Government. Circumstances could arise in which U.S. government obligations, including U.S. treasury obligations that are backed by the full faith and credit of the U.S. government, experience increased credit risk (including the risk of default) and reduced market liquidity (which may result in such securities becoming less liquid or illiquid). The long-term credit rating of the U.S. government may be downgraded by major rating agencies due to, among other things, an actual or expected fiscal deterioration, a high and growing government debt burden and an erosion of governance relative to peers, which would adversely affect investments in U.S. government securities.

Furthermore, with respect to any U.S. Government securities purchased by the Ultra Short Government Fund, guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities, nor do they extend to the value of the Fund's shares.

Repurchase Agreements

The Ultra Short Government Fund may invest in repurchase agreements on U.S. Government securities. Repurchase agreements involve the purchase of U.S. Government securities and a simultaneous agreement with the seller to "repurchase" the securities at a specified price and time, thereby determining the yield during the purchaser's holding period. This results in a fixed rate of return insulated from market fluctuations during such period. Repurchase agreements usually are for short periods, such as one week. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by the Ultra Short Government Fund but only constitute collateral for the seller's obligation to pay the repurchase price and, in the event of a default by the seller, the Ultra Short Government Fund may suffer delays and incur costs or losses in connection with the disposition of the collateral. A repurchase agreement may involve certain risks not associated with a direct purchase of U.S. Government securities. For example, the bank or broker selling the repurchase agreement may default on its obligations to deliver additional securities or to maintain the value of collateral underlying the repurchase agreement or it may fail to repurchase the underlying securities at a time when the value has declined. The Ultra Short Government Fund may incur a loss as a result of such default if the liquidation of the collateral results in proceeds less than the repurchase price. In an effort to minimize such risks, the Ultra Short Government Fund will only enter into repurchase agreements with member banks of the Federal Reserve with assets, surplus and undivided profits of $100,000,000 or more or recognized regional or national securities dealers.

Commercial Paper

The Ultra Short Government Fund may purchase commercial paper which consists of short-term unsecured promissory notes. The Ultra Short Government Fund will purchase only commercial paper either (a) rated Prime 1 by Moody's or A-1 (or with an equivalent or better rating from another rating agency); or (b) if not rated, then issued or guaranteed by companies which have an outstanding debt issue rated Aa or better by Moody's (or with an equivalent or better rating from another rating agency).

Borrowing

The Ultra Short Government Fund is authorized to borrow money. Borrowing may be considered to be a form of leverage. The 1940 Act requires a Fund to maintain continuous asset coverage of 300% of the amount borrowed. If the 300% asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) should decline as a result of market fluctuations or for other reasons, the Ultra Short Government Fund may be required to sell some of its portfolio holdings within three days in order to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. Borrowed funds are subject to interest costs that may or may not be offset by amounts earned on the borrowed funds. The Ultra Short Government Fund may be required to maintain minimum average balances in connection with its borrowing or pay a commitment or other fee to maintain a line of credit, and either of these requirements would serve to increase the cost of borrowing over the stated interest rate.

Investment Company Shares

The Ultra Short Government Fund may purchase securities of other investment companies, subject to the restrictions of the 1940 Act, which invest substantially all of their assets in U.S. government securities. Investing in the shares of other registered investment companies involves the risk that such other registered investment companies will not achieve their objectives or will achieve a yield or return that is lower than that of the Ultra Short Government Fund. To the extent the Ultra Short Government Fund is invested in shares of other investment companies, the Ultra Short Government Fund will incur additional expenses as a result of investing in investment company shares.

Investments in Exchange Traded Funds

The Ultra Short Government Fund may invest in ETFs which invest substantially all of their assets in U.S. government securities. ETFs that are based on an index may not be able to replicate and maintain exactly the composition and relative weightings of securities in the applicable index. ETFs that are based on an index also incur certain expenses not incurred by their applicable index. Additionally, certain securities comprising the index tracked by an ETF may, at times, be temporarily unavailable, which may impede an ETF's ability to track its index. As a holder of interests in an ETF, the Ultra Short Government Fund would indirectly bear its ratable share of that fund's expenses, including applicable management fees. At the same time, the Ultra Short Government Fund would continue to pay its own management and advisory fees and other expenses, as a result of which the Ultra Short Government Fund and its shareholders in effect may be absorbing multiple levels of certain fees with respect to investments in such ETFs.

Bank Obligations

The Ultra Short Government Fund may purchase bank obligations, including negotiable certificates of deposit and bankers' acceptances which evidence the obligation of the banking institution to repay funds deposited with it for a specified period of time at a stated interest rate. The Ultra Short Government Fund will normally purchase such obligations from financial institutions which have capital, surplus and undivided profits in excess of $100,000,000 as of the date of the bank's most recently published financial statements and financial institutions whose obligations are insured by the Federal Deposit Insurance Corporation. Certificates of deposit generally have penalties for early withdrawal, but can be sold to third parties subject to the same risks as other debt securities.

Illiquid Investments

The Ultra Short Government Fund may not acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments. An "illiquid investment" is any investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

The Trust has adopted a liquidity risk management program ("LRMP") pursuant to which the Funds identify illiquid investments. Under the LRMP, the Adviser has been designated to administer the LRMP and has delegated certain responsibilities to the Liquidity Risk Management Committee, which is comprised of certain operations, compliance, trading, and portfolio management representatives of the Adviser. The Adviser preliminarily identifies illiquid investments based on, among other things, the trading characteristics and market depth of a particular investment.

Each business day, the Adviser determines the liquidity classifications for the portfolio holdings of the Ultra Short Government Fund pursuant to procedures set forth in the LRMP. The liquidity classifications, which are defined in Rule 22e-4 under the 1940 Act, are highly liquid, moderately liquid, less liquid, and illiquid investments. In making these determinations, the Adviser will consider the relevant market, trading, and investment-specific considerations for a particular investment. Moreover, in making these determinations, the Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Ultra Short Government Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Adviser must take that determination into account. In addition, the Adviser may also consider the following factors in its determination: (i) the existence of an active market; (ii) whether it is exchange-traded; (iii) frequency of trades or quotes and average daily trading volume; (iv) volatility of trading prices; (v) bid-ask spreads; (vi) whether the asset has a relatively standardized and simple structure; (vii) the maturity and date of issue (as applicable); and (viii) any restrictions on transfer.

When Issued or Forward Commitment Transactions

The Ultra Short Government Fund may engage in when issued or forward purchase transactions which involve the purchase or sale of a security by the Ultra Short Government Fund with payment and delivery taking place in the future to secure what is considered an advantageous yield and price to the Ultra Short Government Fund at the time of entering into the transaction. When the Ultra Short Government Fund engages in when issued or forward commitment transactions, it relies on the other party to consummate the trade. This subjects the Ultra Short Government Fund to counterparty credit risk.

Fundamental Investment Restrictions

The following investment restrictions are fundamental restrictions which cannot be changed without the approval of a majority of the Ultra Short Government Fund's outstanding shares. "Majority" means, the lesser of (a) 67% or more of the Ultra Short Government Fund's outstanding shares voting at a special or annual meeting of shareholders at which more than 50% of the outstanding shares are represented in person or by proxy or (b) more than 50% of the Ultra Short Government Fund's outstanding shares.

The Ultra Short Government Fund may not:

1. Underwrite or deal in offerings of securities of other issuers as a sponsor or underwriter in any way.
2. Purchase or sell real estate except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
3. Purchase or sell physical commodities or commodity futures contracts, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction from time to time.
4. Issue any senior security, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
5. Make loans to others, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
6. Borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulatory authority having jurisdiction, from time to time.
7. Invest more than 25% of the value of its total assets in the securities of any one industry. This restriction does not apply to securities of the U.S. Government or its agencies and instrumentalities and repurchase agreements relating thereto.

CYBERSECURITY RISK

For all the Funds, with the use of the Internet and other information technology, including cloud-based technology, in connection with the Funds' operations, the Funds are subject to significant operational, information security and related risks through cyber security breaches. A breach in cyber security refers to either an intentional or unintentional event that may cause the Funds to lose proprietary information, suffer data corruption and/or lose operational capacity. These types of events may cause the Funds to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security threats may result from unauthorized access to the Funds' digital information systems, but can also result from outside attacks such as denial-of-service attacks (i.e., efforts to make network services unavailable to intended users). Cyber security threats may cause disruptions to the Funds' business operations, potentially resulting in, among other things: interference with a Fund's ability to calculate its NAV, impediments to trading and the inability of Fund shareholders to transact business. Because the Funds work closely with third-party service providers, cyber security breaches at such third-party service providers may subject the Funds to the same risks associated with direct cyber security breaches. Geopolitical tensions may, from time to time, increase the scale and sophistication of cyber incidents and other disruptions. The development and increasingly widespread adoption of new technologies, including cloud-based services, artificial intelligence and machine learning, may introduce new and evolving cyber security and operational risks that are difficult to anticipate or assess. The same holds for cyber security breaches at any of the issuers of securities in which the Funds may invest. While the Funds have established and implemented risk management and information security systems and software designed to reduce the risks associated with cyber security breaches, there can be no assurance that such measures will succeed.

RISK RELATED TO MANAGEMENT OF CERTAIN SIMILAR FUNDS

The name, investment objective and policies of certain Funds are similar to other funds advised by the Adviser. The investment results of a Fund may be higher or lower than, and there is no guarantee that the investment results of a Fund will be comparable to, any other of the funds. Despite any similarities, these offerings can have important differences that any potential investors should consider and discuss with their investment professionals. To understand the differences and to decide which offering best suits an investor, the investor should review the prospectus, offering document or brochure for the relevant offering and consult their investment professionals. Investment professionals providing advice or recommendations of these offerings are themselves responsible for undertaking appropriate due diligence, considering factors such as cost and complexity and evaluating any offering in relation to reasonably available alternatives under applicable law - all within the broader framework of an investor's financial circumstances, needs and objectives.

PORTFOLIO TURNOVER

The portfolio turnover rate for all Funds is the ratio of the lesser of annual purchases or sales of securities for the respective Fund to the average monthly value of such securities, excluding all securities for which the maturity or expiration date at the time of the acquisition is one year or less. A 100% portfolio turnover rate would occur, for example, if the lesser of the value of purchases or sales of securities for a particular year were equal to the average monthly value of the securities owned during such year. The turnover rate will not be a limiting factor when Weitz Inc. deems portfolio changes appropriate. A higher portfolio turnover rate (one in excess of 100% annually) results in correspondingly greater brokerage commissions being paid and other additional transactional expenses which are borne by the respective Fund and can affect the Fund's investment performance. Higher portfolio turnover rates may also result in the realization of net short-term capital gains by a Fund which, when distributed to shareholders, will be taxable as ordinary income when shares are held in a taxable account.

The portfolio turnover rates for each of the last two fiscal years for each of the Funds were as follows:

	Fiscal Year Ended March 31,	
Fund	**2026**	**2025**
Conservative Allocation	18%	25%
Core Plus	16%	11%
Large Cap	10%	31%
Multi Cap	11%	16%
Partners III	18%	25%
Short Duration	41%	39%
Ultra Short Government	111%	3%

The Ultra Short Government Fund's portfolio turnover rate increased materially during the most recent fiscal year compared to the prior fiscal year. As market conditions and portfolio management decisions vary over time, portfolio turnover rates may fluctuate in future periods.

MANAGEMENT OF THE FUNDS

Board of Trustees

The Board of Trustees of the Trust is responsible for managing the business and affairs of the Trust, including overseeing the Trust's Officers, who actively supervise the day to day operations of the Trust. Each Trustee serves until a successor is elected and qualified or until resignation. Each Officer is elected annually by the Trustees.

A majority of the Trustees of Weitz Funds are independent Trustees within the meaning of the 1940 Act. In addition, the Board has elected an independent Trustee to serve as Chair of the Board. The Trustees exercise all of the rights and responsibilities required by the terms of the Trust's Declaration of Trust. The address of all Officers, Trustees and Advisory Board members is Blackstone Plaza, 3555 Farnam Street, Suite 800, Omaha, Nebraska 68131.

The following table sets forth certain information with respect to the Officers and Trustees of the Trust:

Interested Trustees

Wallace R. Weitz (Age: 77)*† Position(s) Held with Trust: Vice President and Trustee Length of Service (Beginning Date): 1986 Principal Occupation(s) During Past 5 Years: Vice President (beginning in 2025) and President (1986-2024), Weitz Funds; Co-Chief Investment Officer (2017-2025) and Portfolio Manager, Weitz, Inc. Number of Portfolios Overseen in Fund Complex: 7 Other Directorships During Past 5 Years: Berkshire Hathaway Inc., a holding company owning subsidiaries engaged in numerous diverse business activities (2022 to present); Cable One, Inc., a cable television, internet and telephone services Company (2015-present).	Andrew S. Weitz (Age: 46)**† Position(s) Held with Trust: President and Trustee Length of Service (Beginning Date): 2018 Principal Occupation(s) During Past 5 Years: President (beginning in 2025) and Vice President (2018-2025), Weitz Funds; Senior Vice President (2023-present), Co-Chief Investment Officer (beginning in 2025), Vice President (2017-2023) and Portfolio Manager, Weitz, Inc. Number of Portfolios Overseen in Fund Complex: 7 Other Directorships During Past 5 Years: None

* Mr. Wallace R. Weitz is the father of Mr. Drew Weitz, who serves as a Trustee and President of the Trust and who also serves as a Director and Senior Vice President of the Adviser.

**Mr. Drew Weitz is the son of Mr. Wallace Weitz, who serves as a Trustee and Vice President of the Trust and who also serves as Director of the Adviser.

† Each of Mr. Drew Weitz and Mr. Wallace Weitz is a Director of the Adviser, and as such is considered an "interested person" of the Trust, as that term is defined in the 1940 Act (an "Interested Trustee")

Independent Trustees

Lorraine Chang (Age: 76) Position(s) Held with Trust: Trustee; Chair, Board of Trustees Length of Service (Beginning Date): 1997 Principal Occupation(s) During Past 5 Years: Retired Number of Portfolios Overseen in Fund Complex: 7 Other Directorships During Past 5 Years: None	Steven M. Hill (Age: 61) Position(s) Held with Trust: Trustee Length of Service (Beginning Date): 2022 Principal Occupation(s) During Past 5 Years: Director, Catholic Cemeteries of the Archdiocese of Omaha (2021 to present); Finance Director, St. Patrick Catholic Church (2019 to 2021) Number of Portfolios Overseen in Fund Complex: 7 Other Directorships During Past 5 Years: None
Alison L. Maloy, CPA (Age: 47) Position(s) Held with Trust: Trustee Length of Service (Beginning Date): 2022 Principal Occupation(s) During Past 5 Years: Accounting Instructor, Creighton University Number of Portfolios Overseen in Fund Complex: 7 Other Directorships During Past 5 Years: None	Elizabeth L. Sylvester (Age: 42) Position(s) Held with Trust: Trustee Length of Service (Beginning Date): 2022 Principal Occupation(s) During Past 5 Years: Director, Castlelake, a private equity firm Number of Portfolios Overseen in Fund Complex: 7 Other Directorships During Past 5 Years: None

Detisch (Age: 61) Position(s) Held with Trust: Vice President, General Counsel, Secretary and Chief Compliance Officer Length of Service (Beginning Date): 2011 Principal Occupation(s) During Past 5 Years: Vice President, General Counsel and Chief Compliance Officer, Weitz Funds; Vice President, General Counsel, Secretary and Chief Compliance Officer, Weitz, Inc.
Bradley P. Hinton (Age: 58) Position(s) Held with Trust: Vice President Length of Service (Beginning Date): 2006 Principal Occupation(s) During Past 5 Years: Vice President, Weitz Funds; Co-Chief Investment Officer, Executive Vice President (2023 to present) and Portfolio Manager, Weitz, Inc.	

Compensation Table

The table below includes certain information with respect to compensation of the Trustees of the Trust then in office for the fiscal year ended March 31, 2026. Compensation of the Officers of the Trust is paid by Weitz Inc.

Name of Trustee	Aggregate Compensation From Weitz Funds	Total Compensation From Fund Complex
Lorraine Chang[1]	$102,000	$102,000
Steven M. Hill	$85,000	$85,000
Alison L. Maloy[2]	$92,000	$92,000
Elizabeth L. Sylvester	$85,000	$85,000
Dana E. Washington	$85,000	$85,000
Andrew (Drew) S. Weitz[3]	N/A	N/A
Wallace R. Weitz[3]	N/A	N/A
Justin B. Wender	$85,000	$85,000

1. Ms. Chang receives additional annual compensation in connection with her service as Chair of the Board.
2. Ms. Maloy receives additional annual compensation in connection with her service as Chair of the Audit Committee.
3. As Trustees who are also Officers of the investment adviser to the Funds, Mr. Wallace Weitz and Mr. Drew Weitz receive no compensation for their services as a Trustee.

Ownership of Fund Shares by Trustees

The following table provides the range of ownership by the Trustees of shares of Weitz Funds as of December 31, 2025.

Interested Trustees

Name of Trustee	Dollar Range of Securities in Weitz Funds	Aggregate Dollar Range of Equity Securities in all Weitz Funds Overseen by Trustee
Wallace R. Weitz	Conservative Allocation Fund: Over $100,000 Core Plus Fund: Over $100,000 Large Cap Fund: Over $100,000 Multi Cap Fund: Over $100,000 Partners III Fund: Over $100,000 Short Duration Fund: Over $100,000 Ultra Short Government: Over $100,000	Over $100,000
Andrew S. Weitz	Conservative Allocation Fund: $50,001 - $100,000 Core Plus Fund: Over $100,000 Large Cap Fund: Over $100,000 Multi Cap Fund: Over $100,000 Partners III Fund: Over $100,000 Short Duration Fund $1 - $10,000 Ultra Short Government: Over $100,000	Over $100,000

Independent Trustees

Name of Trustee	Dollar Range of Securities in Weitz Funds	Aggregate Dollar Range of Equity Securities in all Weitz Funds Overseen by Trustee

Justin B. Wender	Core Plus Fund: Over $100,000 Partners III Fund: Over $100,000	Over $100,000

Other Information Concerning the Board of Trustees

Board Leadership Structure

Lorraine Chang, who is an Independent Trustee, serves as the Chair of the Board and, in this role, oversees the functioning of the Board's activities and acts as a liaison between the Board, management and legal counsel to the Funds. The Chair may perform such other functions as may be requested by the Board from time to time. Except for any duties specified herein or pursuant to the Trust's Declaration of Trust and By-Laws, the designation of Chair does not impose on such Independent Trustee any duties, obligations or liability that are greater than the duties, obligations or liability imposed on such person as a member of the Board. The Board has designated a number of standing committees, as further discussed below, each of which has a Chair. The Board may also designate working groups or ad hoc committees as it deems appropriate, from time to time.

The Board regularly reviews this leadership structure and believes it to be appropriate because it allows the Board to exercise informed and independent judgment over matters under its purview, and it allocates areas of responsibilities among committees of Trustees and the full Board in a manner that enhances effective oversight. In making its determination regarding the appropriateness of its leadership structure, the Board considered the size of the Board, the number of Funds in the Trust and the level of assets in the Funds, the investment strategies utilized by the Adviser with respect to each of the Funds, the background, skills and experience of each of the Board members and the mutual fund governance standards applicable to registered investment companies such as the Trust.

Trustee Qualifications

There are no specific required qualifications for Board membership. The Board believes that the different perspectives, viewpoints, professional experience, education and individual attributes of each Trustee represent a diversity of experiences and skills. In addition to the table below, the following is a brief discussion of the specific experience, qualifications, attributes and skills that led to the conclusion that each person identified below is qualified to serve as a Trustee.

Lorraine Chang – As a retired management consultant, Ms. Chang has experience with business, financial and regulatory matters. She also has had long-standing service as a Trustee of the Board and currently serves as Chair of the Board.

Steven M. Hill – As a retired executive for various investment management companies and investment advisory firms, Mr. Hill has extensive experience with the investment management industry, including experience and background in the auditing of investment management companies, and experience with business, financial and regulatory matters.

Alison L. Maloy – As a certified public accountant with extensive experience in the accounting industry, Ms. Maloy has experience and background in the auditing of operating companies and in business, financial and regulatory matters.

Elizabeth L. Sylvester – As a current executive in the private equity field and previously an executive with financial services and wealth management firms, Ms. Sylvester has extensive experience with business, financial and regulatory matters.

Dana E. Washington - As the current Executive Vice President and General Counsel for a youth care and health care services organization and previously as an Assistant General Counsel of a large insurance company, Ms. Washington has extensive experience with business and regulatory matters.

Justin B. Wender – As an executive in the private equity field, Mr. Wender has experience with business, financial and regulatory matters. Mr. Wender also has experience serving as a board member on various public and privately-held firms.

Andrew S. Weitz – As a Senior Vice President, Co-Chief Investment Officer, Portfolio Manager and Director with the Adviser, Mr. Drew Weitz has extensive experience in the management and operation of investment companies. He also has had longstanding service as an officer of the Trust.

Wallace R. Weitz – As the founder, Co-Chief Investment Officer, a Portfolio Manager and a Director with the Adviser, Mr. Wally Weitz has extensive experience in the management and operation of registered investment companies. He also has had long-standing service as a Trustee of the Trust.

Board Oversight of Risk Management

The Funds are subject to various risks including, among others, investment, financial, compliance, valuation and operational risks. Day-to-day risk management functions are included within the responsibilities of the Adviser and other service providers who carry out the Funds' investment management and business affairs. The Adviser and other service providers each have their own, independent interest in risk management, and their policies and procedures for carrying out risk management functions will depend, in part, on their individual priorities, resources and controls.

The Board has not established a standing risk oversight committee. Instead, in fulfilling its risk oversight responsibilities, the Board regularly solicits and/or receives reports from the Adviser, the Funds' Chief Compliance Officer ("CCO") and from legal counsel. The Board has designated the CCO to oversee the risk management processes, procedures and controls for the Trust. In this role, the CCO reports directly to the Board's Independent Trustees and provides quarterly reports to the Board, in addition to an annual report to the Board in accordance with the Funds' compliance policies and procedures and applicable regulatory requirements. The CCO also regularly provides the Board with updates on the application of the Funds' compliance policies and procedures and how these procedures are designed to mitigate risk. In addition, as part of the Board's periodic review of the Funds' advisory and other service provider arrangements, the Board may consider risk management aspects of their operations and the functions for which they are responsible. The Board may, at any time and in its discretion, change the manner in which it conducts its risk oversight role in response to various relevant factors.

Board Committees

The Board has established an Audit Committee, a Corporate Governance Committee and a Valuation Committee, all of which are composed solely of all of the independent Trustees of the Trust. The Audit Committee reviews the audit plan and results of audits, pre-approves certain fees and generally monitors the performance of the Funds' independent certified public accountants. During the fiscal year ended March 31, 2026, the Audit Committee met two times.

The Corporate Governance Committee performs various tasks related to Board governance procedures, including, without limitation, periodically reviewing Board composition and Trustee compensation, reviewing the responsibilities of Board committees and the need for additional committees, making nominations for independent trustee membership on the Board of Trustees and evaluating candidates' qualifications for Board membership and their independence from Weitz Inc. The Committee will consider nominees recommended by shareholders of the Funds. Any such recommendations must be submitted in writing to Weitz Funds, Blackstone Plaza, 3555 Farnam Street, Suite 800, Omaha, Nebraska 68131, Attention: John Detisch, Secretary. During the fiscal year ended March 31, 2026, the Corporate Governance Committee met two times.

The Valuation Committee oversees Weitz Inc., as the Board's valuation designee, as it relates to the valuation of portfolio securities. During the fiscal year ended March 31, 2026, the Valuation Committee met four times.

Proxy Voting Policy

The Trust has delegated proxy voting decisions on securities held in the Trust's portfolios to Weitz Inc. Weitz Inc. has adopted Proxy Voting Policies and Procedures ("Proxy Voting Policies") which provide that proxies on securities will be voted for the exclusive benefit, and in the best economic interest of, the Trust's shareholders, as determined by the Adviser in good faith, subject to any restrictions or directions of the Trust. Such voting responsibilities will be exercised in a manner that is consistent with the general antifraud provisions of the Investment Advisers Act of 1940, as well as the Adviser's fiduciary duties under the federal and state law to act in the best interest of its clients. The Board of Trustees of the Trust has approved the Proxy Voting Policies.

On certain routine proposals (such as those which do not change the structures, bylaws or operations of a company), Weitz Inc. will generally vote in the manner recommended by management. Non-routine proposals (such as those affecting corporate governance, compensation and other corporate events) and shareholder proposals will generally be reviewed on a case-by-case basis. An investment analyst/portfolio manager will review each such proposal and decide how the proxy will be voted. With respect to all non-routine proposals and shareholder proposals, if a decision is made to consider voting in a manner other than that recommended by management, the analyst/portfolio manager will make a recommendation to Weitz Inc.'s Co-Chief Investment Officers, who in turn may solicit input from other Weitz Inc. investment analysts and portfolio managers, and from Weitz Inc.'s CCO, before the Co-Chief Investment Officers make the final determination as to how to vote the proxy in the best economic interests of the client.

In certain circumstances where, for example, restrictions on ownership of a particular security beyond Weitz Inc.'s control make it impossible for Weitz Inc. to acquire as large a position in that security as Weitz Inc. determines is in the best interests of its clients, Weitz Inc. may, from time to time, enter into a voting agreement with an issuer of securities held in the account of a client which provides that the issuer will vote certain of the issuer's proxies. Weitz Inc. will enter into such agreements only when it determines that it is in the best interests of the client to do so. Any such agreement will provide that any shares subject to the agreement be voted by the issuer in a manner that mirrors the votes cast on such matter by all other shareholders.

If Weitz Inc. determines that voting a particular proxy would create a material conflict of interest between its interest or the interests of any of its affiliated parties and the interests of the Trust, Weitz Inc. will disclose such conflict of interest to the Corporate Governance Committee of the Board of Trustees and do one of the following (i) obtain the consent of such committee before voting the proxy; (ii) delegate the responsibility for voting the particular proxy to such committee; (iii) vote such proxy based upon the recommendations of an independent third party such as a proxy voting service; or (iv) abstain from voting the proxy. Information on how the Funds voted proxies relating to portfolio securities during the 12-month period ended June 30 of each year is available: (1) on the Funds' website, weitzinvestments.com and (2) on the SEC's website, sec.gov.

Portfolio Management

Portfolio Managers

For the Conservative Allocation Fund, the Co-Portfolio Managers are Bradley P. Hinton and Nolan P. Anderson. For the Core Plus Fund, the Co-Portfolio Managers are Thomas D. Carney and Nolan P. Anderson. For the Large Cap Fund, the Co-Portfolio Managers are Bradley P. Hinton and Nathan F. Ritz. For the Multi Cap Fund, the Co-Portfolio Managers are Wallace R. Weitz and Andrew S. Weitz. For the Partners III Fund, the Co-Portfolio Managers are Wallace R. Weitz and Andrew S. Weitz. For the Short Duration Fund, the Co-Portfolio Managers are Thomas D. Carney and Nolan P. Anderson. For the Ultra Short Government Fund, the Co-Portfolio Managers are Thomas D. Carney and Nolan P. Anderson.

The following table lists the number and types of other accounts managed by each individual portfolio manager and assets under management in those accounts as of March 31, 2026.

Portfolio Manager[1]	Other Registered Investment Company Accounts	Assets Managed ($ millions)	Other Pooled Investment Vehicle Accounts	Assets Managed ($ millions)	Other Accounts	Assets Managed ($ millions)	Total Assets Managed ($ millions)
Wallace R. Weitz	0	N/A	0	N/A	0	N/A	N/A
Nolan P. Anderson	3†	$179.1	0	N/A	0	N/A	$179.1
Thomas D. Carney	3†	$179.1	0	N/A	0	N/A	$179.1
Bradley P. Hinton	0	N/A	0	N/A	1*	$31.3	$31.3
Andrew S. Weitz	0	N/A	0	N/A	1	$9.3	$9.3
Nathan F. Ritz	0	N/A	0	N/A	1*	$31.3	$31.3

***** Mr. Hinton and Mr. Ritz co-manage the one account.

† Mr. Anderson and Mr. Carney co-manage the three accounts.

[1] There are no performance-based fees.

Portfolio Manager Conflicts of Interest

As indicated in the table above, portfolio managers at Weitz Inc. may manage accounts for multiple clients. In addition, portfolio managers may manage other types of pooled accounts (such as a private investment fund) and/or separate accounts (*i.e.,* accounts managed on behalf of individuals or public or private institutions). Portfolio managers at Weitz Inc. make investment decisions for each account based on the investment objectives and policies and other relevant investment considerations applicable to that portfolio. The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. Although Weitz Inc. does not track the time a portfolio manager spends on a single portfolio, it does periodically assess whether a portfolio manager has adequate time and resources to effectively manage all of the accounts for which he is responsible. Weitz Inc. seeks to manage competing interests for the time and attention of portfolio managers by having portfolio managers focus on a particular investment discipline or complementary investment disciplines. Most accounts within a particular investment discipline are managed using the same investment model. Even where multiple accounts are managed by the same portfolio manager within the same investment discipline, however, Weitz Inc. may take action with respect to one account that may differ from the timing or nature of action taken, with respect to another account. Accordingly, the performance of each account managed by a portfolio manager will vary.

To the extent that trade orders are aggregated, conflicts may arise when aggregating and/or allocating aggregated trades. Weitz Inc. may aggregate multiple trade orders for a single security in several accounts into a single trade order, absent specific client directions to the contrary. When a decision is made to aggregate transactions on behalf of more than one account, the transactions will be allocated to all participating client accounts in a fair and equitable manner.

Weitz Inc. has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, which it believes address the conflicts associated with managing multiple accounts for multiple clients. Weitz Inc. monitors a variety of areas, including compliance with account investment guidelines, the allocation of initial public offerings, and compliance with Weitz Inc.'s Code of Ethics.

Portfolio Managers at Weitz, Inc. may serve on the board(s) of public companies where they, from time to time, will have access to material, non-public information ("MNPI"). Weitz Inc. has instituted policies and procedures to ensure that these Portfolio Managers will not be able to utilize MNPI for their own benefit or for any of the accounts they manage.

Portfolio Manager Compensation

Portfolio manager compensation is comprised of fixed salary and bonus. Compensation is not linked to any specific factors, such as a Fund's performance, asset level or cash flows, but is based upon evaluation of an individual's overall contribution to the research and portfolio management processes. Although amounts available for portfolio manager bonuses may be affected by the profits of Weitz Inc., bonuses are generally based upon a subjective evaluation of the individual's overall contribution to the success of Weitz Inc. In addition, all of the portfolio managers are shareholders of Weitz Inc. and therefore, derive a portion of their compensation from their respective share of the firm's profits.

Portfolio Manager Fund Ownership

The dollar range of equity securities beneficially owned by the Funds' portfolio managers in the Fund(s) they manage as of March 31, 2026 is as follows:

Portfolio Manager	Dollar Range of Equity Securities Beneficially Owned	
Nolan P. Anderson	Core Plus Fund	$100,001 - $500,000
Thomas D. Carney	Core Plus Fund Short Duration Fund Ultra Short Government Fund	$500,001-$1,000,000 $100,001 - $500,000 $100,001 - $500,000
Bradley P. Hinton	Conservative Allocation Fund Large Cap Fund	Over $1,000,000 Over $1,000,000
Nathan F. Ritz	Large Cap Fund	$100,001 - $500,000
Andrew S. Weitz	Multi Cap Fund Partners III Fund	Over $1,000,000 Over $1,000,000
Wallace R. Weitz	Multi Cap Fund Partners III Fund	Over $1,000,000 Over $1,000,000

Disclosure of Fund Portfolio Holdings

The Board of Trustees has adopted policies and procedures concerning the public and nonpublic disclosure of the Funds' portfolio securities. In order to protect the confidentiality of the Funds' portfolio holdings, non-public information regarding those holdings may not, as a general matter, be disclosed except: (a) to service providers that require such information in the course of performing their duties (such as the Funds' investment adviser, etc.) and that are subject to a duty of confidentiality and (b) to entities that have a legitimate business purpose in receiving such information, such as mutual fund evaluation services as well as due diligence departments of financial services firms including broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds in order to monitor and report on various attributes of such funds, provided that such entities have entered into a confidentiality agreement with the Funds. The Funds make certain portfolio holdings information publicly available on its website, weitzinvestments.com on a quarterly basis. The Funds also make certain portfolio holdings information publicly available through Form N-CSR and Form N-PORT filings made with the SEC. Note that under the relevant Fund policies and procedures, non-specific or summary information is not considered portfolio holdings whose disclosure must be restricted. As may be permitted by the Trust's policies and procedures, the Funds' portfolio managers may also make additional public disclosures of portfolio holdings information from time to time.

Whenever portfolio holdings disclosure made pursuant to the Funds' procedures involves a conflict of interest between the Funds' shareholders and the Adviser or any affiliated person of the Fund, the disclosure may not be made unless a majority of the Trust's Independent Trustees or a majority of a board committee consisting solely of Independent Trustees approves such disclosure. Neither the Fund nor the Adviser may enter into any arrangement providing for the disclosure of non-public portfolio holding information for the receipt of compensation or benefit of any kind.

Any exceptions to the Trust's policies and procedures regarding disclosure of portfolio holdings information may only be made with the consent of the Trust's CCO upon a determination that such disclosure serves a legitimate business purpose and is in the best interests of the Fund and will be reported to the Board at the Board's next regularly scheduled meeting. Any amendments to these policies and procedures must be approved and adopted by the Trust's Board of Trustees.

All confidentiality agreements entered into for the receipt of non-public portfolio holdings information must provide that: (a) the Funds' non-public portfolio holdings information is the confidential property of the Funds and may not be used for any purpose except as expressly provided; (b) the recipient of the non-public portfolio holdings information (i) agrees to limit access to the information to its employees and agents who are subject to a duty to keep and treat such information as confidential and (ii) will implement appropriate monitoring procedures; and (c) upon written request from Weitz Inc. or the Funds, the recipient of the non-public portfolio holdings information shall promptly return or destroy the information. In lieu of the separate confidentiality agreement described above, the Funds may rely on the confidentiality provisions of existing agreements provided that the Trust's CCO has determined that such provisions adequately protect the Funds against disclosure or misuse of non-public holdings information.

PRINCIPAL HOLDERS OF SECURITIES

As of July 7, 2026 the Officers and Trustees of the Trust collectively owned the amounts of each Fund (and Class of Fund) set forth below. Also as of that date, the following persons owned 5% or more of a Fund (and Class of Fund).

Conservative Allocation Fund—Institutional Class The Officers and Trustees of the Trust collectively owned 4,721,045.82 shares or 55.53% of the Conservative Allocation Fund's outstanding Institutional Class shares.

Name and Address	Shares	Percent Owned
Wallace R. Weitz* Blackstone Plaza 3555 Farnam Street, Suite 800 Omaha, Nebraska 68131	4,233,260.85	49.80%

Weitz Inc. is entitled to a monthly advisory fee from the Short Duration Fund equal on an annual basis to 0.40% of the Short Duration Fund's average daily net assets.

Weitz Inc. is entitled to a monthly advisory fee from the Ultra Short Fund equal on an annual basis to 0.30% of the Ultra Short Fund's average daily net assets.

Through July 31, 2027, Weitz Inc. has agreed in writing to reimburse the Conservative Allocation Fund or to pay directly a portion of the Conservative Allocation Fund's expenses to the extent that the Conservative Allocation Fund's total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) exceed 0.70% and 0.85% of the Institutional Class and Investor Class shares' annual average daily net assets, respectively.

Through July 31, 2027, Weitz Inc. has agreed in writing to reimburse the Core Plus Fund or to pay directly a portion of the Core Plus Fund's expenses to the extent that the Core Plus Fund's total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) exceed 0.45% and 0.65% of the Institutional Class and Investor Class shares' annual average daily net assets, respectively.

Through July 31, 2027, Weitz Inc. has agreed in writing to reimburse the Large Cap Fund or to pay directly a portion of the Large Cap Fund's expenses to the extent that the Large Cap Fund's total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) exceed 0.89% and 1.09% of the Institutional Class and Investor Class shares' annual average daily net assets, respectively.

Through July 31, 2027, Weitz Inc. has agreed in writing to reimburse the Multi Cap Fund or to pay directly a portion of the Multi Cap Fund's expenses to the extent that the Multi Cap Fund's total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) exceed 0.89% and 1.09% of the Institutional Class and Investor Class shares' annual average daily net assets, respectively.

Through July 31, 2027, Weitz Inc. has agreed in writing to reimburse the Short Duration Fund or to pay directly a portion of the Short Duration Fund's expenses to the extent that the Short Duration Fund's total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) exceed 0.45% and 0.65% of the Institutional Class and Investor Class shares' annual average daily net assets, respectively.

Through July 31, 2027, Weitz Inc. has agreed in writing to reimburse the Ultra Short Government Fund or to pay directly a portion of the Ultra Short Government Fund's Institutional Class's expenses to the extent that the Ultra Short Government Fund's Institutional Class's total annual fund operating expenses (excluding taxes, interest, brokerage costs, acquired fund fees and expenses and extraordinary expenses) exceed 0.32% of the Ultra Short Government Fund's Institutional Class's annual average daily net assets.

In addition to the aforementioned expense reimbursements, Weitz Inc. may voluntarily waive all or a portion of its fees for any Fund from time to time. Weitz Inc. may discontinue or modify any such voluntary waiver at any time without notice.

The total investment advisory fees paid for each of the last three fiscal years were as follows:

	Fiscal Year Ended March 31,		
Fund	**2026**	**2025**	**2024**
Conservative Allocation[(a)]	$1,320,348	$1,428,649	$1,324,449
Core Plus[(b)]	14,953,377	10,054,795	4,323,568
Large Cap	5,938,274	6,951,370	6,393,503
Multi Cap	4,136,855	4,311,283	4,040,277
Partners III	3,854,504	4,249,397	4,191,135
Short Duration[(c)]	5,129,813	3,862,762	3,216,476
Ultra Short Government[(d)]	364,092	470,024	427,053

[(a)] After the investment adviser waived fees, the Conservative Allocation Fund paid advisory fees of $1,320,348, $1,428,649 and $1,324,449 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.
[(b)] After the investment adviser waived fees, the Core Plus Fund paid advisory fees of $14,953,377, $10,054,795 and $4,323,568 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.
[(c)] After the investment adviser waived fees, the Short Duration Fund paid advisory fees of $5,129,813, $3,862,762 and $3,216,476 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.
[(d)] After the investment adviser waived fees, the Ultra Short Government Fund paid advisory fees of $364,092, $470,024 and $427,053 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

Weitz Inc. is responsible for selecting the securities for each Fund. In addition, Weitz Inc. also provides certain management and other personnel to the Funds. Weitz Inc. also pays any sales or promotional costs incurred in connection with the sale of the Funds' shares.

The Trust pays all expenses of operations not specifically assumed by Weitz Inc. Such costs include, without limitation: costs and expenses related to custodial, administrative (and sub-administrative) and transfer agent services; fees of legal counsel and independent public accountants; compensation of trustees (other than those who are also officers of Weitz Inc.); expenses of printing and distributing to shareholders notices, proxy solicitation material, prospectuses and reports; brokerage commissions; taxes; interest; payment of premiums for certain insurance carried by the Trust; and expenses of complying with federal, state and other laws. Such expenses will be charged to the particular Fund for which such items were incurred, but if such items are not directly related to any particular Fund, then they will be allocated among the Funds based upon the relative net assets of each Fund. In addition, each Fund pays all expenses directly attributable to it.

The investment advisory agreements provide that neither Weitz Inc. nor any of its officers or trustees, agents or employees will have any liability to the Trust or its shareholders for any error of judgment, mistake of law or any loss arising out of any investments, or for any other act or omission in the performance of its duties as investment adviser under the agreements, except for liability resulting from willful misfeasance, bad faith or gross negligence on the part of the investment adviser in the performance of its duties or from reckless disregard by the investment adviser of its obligations under the agreements. The federal and state securities laws and other laws may impose liability under certain circumstances on persons who act in good faith. Nothing in the investment advisory agreements waives or limits any rights under such laws. Weitz Inc. has contractually retained all rights to use the name "Weitz" by the Funds and the Trust. If the Funds were to contract with another investment adviser, the Funds could be required to change their names.

Administrator

Weitz Inc. also serves as the Trust's administrator. In that role, Weitz Inc. oversees and coordinates the activities of other service providers, and provides administrative services to the Funds pursuant to a Business Administration Agreement, which provides that the Funds will pay Weitz Inc. a monthly fee as set forth below. Services provided under the Business Administration Agreement include, without limitation, supervising all aspects of the management and operation of the Trust, which includes monitoring the Trust's relationships with third-party services providers retained by the Trust, monitoring the Trust's compliance with provisions of, and

regulation under the 1940 Act, coordinating audit examinations by outside auditors, and providing officers of the Trust that are deemed necessary for carrying out the executive functions of the Trust.

Effective July 31, 2024, the Business Administration Agreement provides that Weitz Inc., as the Trust's administrator, is entitled to receive 0.05% of the average daily net assets of each Fund, computed daily and payable monthly. Prior to July 31, 2024, the fee under the Business Administration Agreement payable to Weitz Inc., as the Trust's administrator, was 0.03% of the average daily net assets of each Fund.

For each of the last three years, the total administrative fees paid to Weitz Inc. under the Business Administration Agreement (which are paid at the Fund level) were as follows:

	Fiscal Year Ended March 31,		
Fund	**2026**	**2025**	**2024**
Conservative Allocation[(a)]	$110,029	$103,435	$66,225
Core Plus[(b)]	1,869,172	1,126,564	324,276
Large Cap	395,885	403,267	255,750
Multi Cap	275,790	250,477	161,618
Partners III	192,725	185,146	125,739
Short Duration[(d)]	641,227	423,623	241,246
Ultra Short Government[(e)]	60,682	66,225	42,706

[(a)] After Weitz Inc. waived fees (see **Investment Adviser**), the Conservative Allocation Fund paid administrative fees of $0, $0 and $0 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

[(b)] After Weitz Inc. waived fees (see **Investment Adviser**), the Core Plus Fund paid administrative fees of $318,852, $0 and $0 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

[(d)] After Weitz Inc. waived fees (see **Investment Adviser**), the Short Duration Fund paid administrative fees of $7,769, $0 and $0 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

[(e)] After Weitz Inc. waived fees (see **Investment Adviser**), Ultra Short Government Fund paid administrative fees of $0, $0 and $0 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

Distributor, Distribution and Administrative Servicing Fees

Weitz Securities, Inc., a Nebraska corporation (the "Distributor") wholly owned by Weitz Investment Management, Inc., distributes the shares of the Funds on a continuous basis for all the Funds. For all the Funds, the Distributor provides distribution services without compensation deducted from the net assets of the Funds.

None of the Funds impose sale charges nor make any 12b-1 payments to financial intermediaries. The Funds have adopted an Administrative Services Plan for Investor Class shares (the "Plan") under which the Funds may pay administrative servicing fees to the Adviser and to financial institutions which may include banks, broker-dealers, trust companies and other similar types of financial intermediaries (collectively, "Service Organizations"), for providing various administrative services to shareholders serviced by the financial institutions. The services provided to Investor Class shareholders under the Plan may include, but are not limited to: (i) providing or arranging for the provision of transfer agency services or sub-transfer agency services to shareholders and assisting in establishing and maintaining shareholder accounts and records; (ii) aggregating and processing purchase and redemption orders; (iii) providing shareholders with statements showing their positions in the Funds; (iv) processing dividend payments; (v) providing or arranging for the provision of sub-accounting services in connection with shares of the Funds; (vi) forwarding shareholder communications, such as proxies, shareholder reports, dividend and tax notices, and updating prospectuses to shareholders; (vii) receiving, tabulating and transmitting proxies executed by beneficial owners of the Funds; (viii) answering customer inquiries of a general nature regarding the Funds; (ix) assisting customers in changing account options, account designations, and account addresses; (x) crediting distributions from the Funds to shareholder accounts; and (xi) providing such other non-distribution related administrative services as may be reasonably requested and which are deemed necessary and beneficial to shareholders.

With respect to the Investor Class shares, the fees payable under the Plan are the sum of:

(1) An annual fee, paid monthly, equal to: (a) $25 for each open Investor Class account maintained on the transfer agent system of the Fund's third-party transfer agent, plus (b) 0.04% of the sum of the Fund's daily average net assets of such Investor Class accounts; and

(2) A monthly reimbursement payable to the Adviser for the amount of administrative servicing related fees paid by the Adviser to Service Organizations that have provided administrative services of the type described above to Investor Class shareholders, subject to a limit of: 0.25% of the sum of the Fund's average net assets of Investor Class shares held through such Service Organizations;

Provided, however, that for each Fund, the minimum annual fee payable under the Plan for Investor Class Shares shall be $10,000.

Prior to July 31, 2024, the Institutional Class shares were subject to an Administrative Services Plan for Institutional Class shares which provided for the Institutional Class shares to receive similar types of administrative services as those provided to Investor Class shares pursuant to the terms of the Administrative Services Plan for Investor Class shares. The Administrative Services Plan for Institutional Class shares terminated effective as of July 31, 2024. Subsequent to the termination of the Administrative Services Plan for Institutional Class shares, the Adviser has continued to provide (and/or pay financial intermediaries for providing) from its own resources all of the same types of services for Institutional Class shares that were previously eligible to be compensated in accordance with the terms of the Administrative Services Plan for Institutional Class shares.

The total fees paid by the Funds under each of the Administrative Services Plans for Institutional Class shares and Investor Class shares for each of the last three fiscal years were as follows:

	Fiscal Year Ended March 31,		
Fund	**2026**	**2025**	**2024**
Conservative Allocation			
—Institutional Class[a]	—	$28,696*	$59,611
—Investor Class[a]	$85,101	96,930	94,879
Core Plus			
—Institutional Class[b]	—	601,161*	629,541

* Amounts paid for the fiscal year ended March 31, 2025 for the Administrative Services Plan for Institutional Class shares reflect fees through July 31, 2024.

[a] After Weitz Inc. waived fees (see **Investment Adviser**), the Conservative Allocation Fund—Institutional Class paid administrative servicing fees of $0 and $0 for the fiscal years ended March 31, 2025, and 2024, respectively, and the Conservative Allocation Fund—Investor Class paid administrative servicing fees of $29,962, $41,254 and $35,309 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

[b] After Weitz Inc. waived fees (see **Investment Adviser**), the Core Plus Fund—Institutional Class paid administrative servicing fees of $56,983 and $0 for the fiscal years ended March 31, 2025 and 2024, respectively, and the Core Plus Fund—Investor Class paid administrative servicing fees of $924,392, $593,515 and $110,020 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

[d] After Weitz Inc. waived fees (see **Investment Adviser**), the Short Duration Fund—Institutional Class paid administrative servicing fees of $0 and $0 for the fiscal years ended March 31, 2025 and 2024, respectively, and the Short Duration Fund—Investor Class paid administrative servicing fees of $27,207, $19,856 and $0 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

[e] After Weitz Inc. waived fees (see **Investment Adviser**), the Ultra Short Government Fund paid administrative servicing fees of $0, $0 and $0 for the fiscal years ended March 31, 2026, 2025 and 2024, respectively.

Securities Lending Agent

The Trust, effective April 1, 2026, entered into the Lending Agreement with Mitsubishi whereby Mitsubishi serves as the Funds' securities lending agent and facilitates the Funds' securities lending program. Under the terms of the Lending Agreement, each Fund may lend securities to approved borrowers in exchange for collateral in the amount of at least 100% of the market value of U.S. Government securities loaned, 102% of the market value of domestic securities and foreign securities denominated in the same currency as the collateral loaned, and 105% of the market value of foreign securities not denominated in the same currency as the collateral loaned. Each loan will be secured continuously by collateral in the form of cash or U.S. Government securities. During the term of the loan, the Funds will receive payments from borrowers equivalent to the dividends and interest that would have been earned on securities lent while simultaneously seeking to earn income on the investment of cash collateral in accordance with investment guidelines contained in the Lending Agreement. Realized income from the program, calculated net of rebates paid to borrowers and other charges, is apportioned between the Funds and Mitsubishi in accordance with the Lending Agreement.

Under the Lending Agreement, the Funds pay fees in connection with the securities lending program based on a revenue split of Realized Income between the Funds and Mitsubishi. In its role as securities lending agent, Mitsubishi (1) negotiates rebates and/or lending fees with borrowers, (2) collects from borrowers the cash or securities that will serve as collateral for any securities loaned, (3) enters into and signs, as agent for the Funds, any relevant agreement as required for the investment of collateral, (4) holds in custody, or enters into an agreement with a third party custodian that will hold in custody, any and all collateral delivered by borrowers in respect of any loaned securities, (5) invests, on the Funds' behalf, all cash collateral delivered by borrowers in respect of any loaned securities in accordance with the investment guidelines contained in the Lending Agreement, (6) performs daily "mark-to-market" valuations of loaned securities relative to collateral and requests or returns collateral as required, (7) collects any interest, dividends or other distributions or other payments on any loaned securities, and (8) may terminate any lending transaction in its sole discretion, and shall terminate any lending transaction upon receipt of a valid recall notice from the Funds.

For the fiscal year ended March 31, 2026, the income, fees and compensation related to the Trust's securities lending activities of each Fund are set forth below. This data reflects the period during which Citibank, N.A., served as the Funds' securities lending agent. Prior to April 1, 2026, the Fund was a party to the Global Securities Lending Agency Agreement with Citibank N.A., which served as the Funds' securities lending agent.

	Conservative Allocation	Core Plus	Large Cap	Multi Cap	Partners III	Short Duration	Ultra Short Government
Gross Income from Securities Lending Activity	$1,708	$132,873	$2,903	$4,427	$3,438	$3,398	N/A
Fees Paid to Securities Lending Agent from Revenue Split	$342	$26,334	$581	$885	$574	$665	N/A
Rebate (Paid to Borrower)	$0	$0	$0	$0	$0	$0	N/A
Aggregate Fees and/or Compensation for Securities Lending Activities	$342	$26,334	$581	$885	$574	$665	N/A
Net Income from Securities Lending Activities	$1,366	$106,539	$2,322	$3,542	$2,864	$2,733	N/A

A Fund does not pay any separate cash collateral management services fees, administrative fees, fees for indemnification or other fees not reflected above for securities lending activities. Earnings from the investment of cash collateral received by Citibank as the securities lending agent are included in the revenue split.

Transfer Agent

Ultimus Fund Solutions, LLC, 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246 ("Ultimus") is the transfer agent for Weitz Funds. Pursuant to the Master Services Agreement entered into between the Funds and Ultimus, Ultimus provides customary transfer agency services to the Funds. For providing such transfer agency services, Ultimus receives certain base fees and account-related fees plus reimbursement for out-of-pocket expenses that are incurred.

Custodian

Brown Brothers Harriman & Co., located at 140 Broadway, New York, New York, 10005 ("BBH"), is the custodian for Weitz Funds. Pursuant to the terms of the Global Custodial Services Agreement entered into between the Funds and BBH, BBH provides customary custodial services to the Funds, including maintaining custody of all securities and cash of each of the Funds, delivering and receiving payment for securities sold, receiving and paying for securities purchased, collecting income from investments, and performing other duties as directed by officers of the Trust.

Sub-Administrator

Ultimus Fund Solutions, LLC, 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246 , serves as sub-administrator for the Funds. Pursuant to the terms of the Services Agreement that Weitz Inc. has entered into with Ultimus with respect to the Funds, Ultimus provides customary services related to fund accounting and certain other services. For providing such services, Ultimus receives a monthly fee plus reimbursement for out-of-pocket expenses that are incurred.

Independent Registered Public Accounting Firm

The Funds' independent registered public accounting firm is Deloitte & Touche LLP, 111 S. Wacker Drive, Chicago, Illinois 60606.

Legal Counsel

The Funds' legal counsel is Dechert LLP, 1900 K Street N.W., Washington, DC 20006.

PORTFOLIO TRANSACTIONS AND BROKERAGE ALLOCATION

Weitz Inc. is responsible for recommendations on buying and selling securities for the Funds and for determinations as to which broker is to be used in each specific transaction. Weitz Inc. attempts to obtain from brokers the most favorable price and execution available. In selecting brokers and determining the most favorable price and execution, all factors relevant to the best interest of the Funds are considered, including, for example, price, the size of the transaction taking into account market prices and trends, the reputation, experience and financial stability of the broker involved and the quality of service rendered by the broker in other transactions. Weitz Inc. may decide to engage a single broker-dealer with respect to all or a portion of the Funds' securities transactions, which engagement may avoid costs (such as recordkeeping, staffing and technological costs) that could be incurred with multiple broker-dealer arrangements. Weitz Inc. may also decide to enter into broker-dealer arrangements in which a portion of the commissions (or commission equivalents) are used to pay for research services.

Such research services may include, among other things, information on the economy, industries, individual companies, statistical information, accounting and tax law interpretations, legal developments affecting portfolio securities, technical market action, credit analysis, risk measurement analysis and performance analysis. Such research services are received primarily in the form of written reports, telephone contacts and occasional meetings with securities analysts. Such research services may also be provided in the form of access to various computer-generated data and meetings arranged with corporate and industry spokesmen. Such research services may be generated by third parties, and provided to Weitz Inc. by or through broker-dealers. In addition, such research services are used by Weitz Inc. in servicing all of its accounts and not exclusively with respect to transactions for the Funds.

Because of the factors relevant to the best interest of the Funds, as noted above (most of which are subject to the best judgment of Weitz Inc.) and the research services that may be provided, Weitz Inc. may cause a broker-dealer to be paid a greater commission (or commission equivalent) than another broker-dealer would have charged, provided that Weitz Inc. has determined in good faith that the amount of commissions (or commission equivalents) actually paid is reasonable in relation to the value of the brokerage and research services provided, viewed in terms of either the particular transaction or the broker-dealer's ability to execute difficult transactions in the future. In the case where Weitz Inc. may receive both brokerage and research and other benefits from the services provided by broker-dealers, Weitz Inc. makes a good faith allocation between the brokerage and research services and other benefits and pays for such other benefits in cash.

Weitz Inc. may aggregate orders for the purchase or sale of the same security for the Funds and other advisory clients. Weitz Inc. will only aggregate trades in this manner if all transaction costs are shared equally by the participants on a pro-rata basis. Such aggregate trading may allow Weitz Inc. to execute trades in a more timely and equitable manner and to reduce overall commission charges to clients. Weitz Inc. may include its own proprietary accounts in such aggregate trades. Weitz Inc. will only execute such a trade subject to its duty of obtaining the best execution of the trade from the broker-dealer selected.

During each of the last three fiscal years, the Funds paid the following brokerage commissions for securities transactions:

	Fiscal Year Ended March 31,		
Fund	**2026**	**2025**	**2024**
Conservative Allocation	$11,250	$11,203	$10,359
Core Plus	0	1,251	0
Large Cap	80,018	182,467	139,095
Multi Cap	120,508	153,470	193,275
Partners III	99,427	146,816	72,731
Short Duration	0	0	0
Ultra Short Government	0	0	0

Each of the Funds is required to identify any securities of its "regular brokers and dealers" (as such term is defined in the 1940 Act) which they may hold at the close of their most recent fiscal year. "Regular brokers or dealers" of the Trust are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Trust's portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Trust; or (iii) sold the largest dollar amounts of the Trust's Shares. As of the fiscal year ended March 31, 2026, the Funds listed below held securities issued by their "regular brokers and dealers" in the following amounts:

Fund	**Name of Broker or Dealer**	**Aggregate Value of Securities Owned by the Fund**
Core Plus	Cantor Fitzgerald	$2,535,173
Short Duration	Cantor Fitzgerald	$1,495,819

ORGANIZATION AND CAPITAL STRUCTURE

General

The Trust is a Delaware statutory trust organized on August 4, 2003 and is registered under the 1940 Act as an open-end management investment company, commonly known as a mutual fund. The Trust currently has seven investment series, the Conservative Allocation, Core Plus, Large Cap, Multi Cap, Partners III, Short Duration and Ultra Short Government Funds. The Trustees may from time to time establish additional series or classes of shares without the approval of shareholders. The assets of each series belong only to that series, and the liabilities of each series are borne solely by that series and no other.

The Trust is authorized to issue an indefinite number of shares of beneficial interest. All shares, when issued, are fully paid, non-assessable, redeemable and fully transferable. All shares, which have no preemptive or conversion rights, have equal voting rights and can be issued as full or fractional shares. A fractional share has pro rata the same kind of rights and privileges as a full share.

For each of the Conservative Allocation, Core Plus, Large Cap, Multi Cap, Partners III and Short Duration Funds, two classes of shares (an Institutional Class and an Investor Class) are authorized. The shares of each class of a Fund represent an interest in the same portfolio of investments of the Fund.

On certain issues, such as the election of trustees, all shares of the Trust vote together. The shareholders of a particular Fund, however, would vote separately on issues affecting only that particular Fund, such as the approval of a change in a fundamental investment restriction for that Fund. Also, the shareholders of a particular class may vote separately on issues affecting only that particular class.

Shareholder Meetings

Although the Funds may hold periodic shareholder information meetings, shareholder business meetings will not be held unless required by the 1940 Act or at the direction of the Board of Trustees of the Trust. Among other things, the 1940 Act requires a shareholder vote for amendments to a Fund's fundamental investment policies and investment advisory agreement.

PURCHASING SHARES

See "***Purchasing Shares***" in the Prospectus for information on how to purchase shares of the Funds.

To purchase shares, you should complete a Purchase Application and transfer funds for the purchase either by sending a check, electronic bank transfer or a wire transfer to the Trust. The Trust does not accept cash, money orders, travelers' checks, third-party checks, credit card convenience checks, starter checks, instant loan checks, post-dated checks, checks drawn on banks outside the U.S. or other checks deemed to be high risk checks. The price paid for the shares purchased will be the next determined net asset value after the Trust receives the application and payment for the shares. All purchase orders are subject to acceptance by authorized officers of the Trust and are not binding until so accepted. The net asset value of a Fund's shares is determined once each day generally at the close of the New York Stock Exchange (ordinarily 3:00 p.m. Central time) on days on which the New York Stock Exchange is open for business. If the completed order is received in good order before such time, the order will be effective on that day. If the completed order is received in good order after such time the order will be effective on the following business day.

Shares of the Funds may also be purchased through certain brokers or other financial intermediaries that have entered into selling agreements or related arrangements with Weitz Inc. or its affiliates. If you invest through such entities, you must follow their procedures for buying and selling shares. Please note that such financial intermediaries may charge you fees in connection with the purchases of Fund shares and may require a minimum investment amount different from that required by the Funds. Such brokers or financial intermediaries are authorized to designate other intermediaries to accept purchase and redemption orders on behalf of the Funds. If the broker or financial intermediary submits trades to the Funds, the Funds will use the time of day when such entity or its designee receives the order to determine the time of purchase or redemption, and will process the order at the next closing price computed after acceptance. The broker or financial intermediary generally has the responsibility of sending prospectuses, shareholder reports, statements and tax forms to their clients.

Weitz Inc. may, from time to time, make payments to brokers or other financial intermediaries for certain services to the Funds and/or its shareholders, including sub-administration, sub-transfer agency and shareholder servicing.

You should purchase shares of the Funds only if you intend to be a patient, long-term investor. The Funds are intended for long-term investors and not for those who wish to trade frequently in Fund shares. Frequent trading into and out of a Fund can have adverse consequences for that Fund and for long-term shareholders in the Fund. The Weitz Funds believe that frequent or excessive short-term trading activity by shareholders of a Fund may be detrimental to long-term investors because those activities may, among other things: (a) dilute the value of shares held by long-term shareholders; (b) cause the Funds to maintain larger cash positions than would otherwise be necessary; (c) increase brokerage commissions and related costs and expenses; and (d) incur additional tax liability. The Funds therefore discourage frequent purchase and redemptions by shareholders and it does not make any effort to accommodate this practice. To protect against such activity, the Board of Trustees has adopted policies and procedures that are intended to permit the Funds to curtail frequent or excessive short-term trading by shareholders. At the present time the Funds do not impose limits on the frequency of purchases and redemptions, nor does it limit the number of exchanges into any of the Funds. The Funds reserve the right, however, to impose certain limitations at any time with respect to trading in shares of the Funds, including suspending or terminating trading privileges in Fund shares, for any investor whom it believes has a history of abusive trading or whose trading, in the judgment of the Funds, has been or may be disruptive to the Funds. It may not be feasible for the Funds to prevent or detect every potential instance of abusive or excessive short-term trading.

Important Information about Procedures for Opening an Account

To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions, including the Funds, to obtain, verify and record information that identifies each customer (as defined in the Department of Treasury's Customer Identification Program for Mutual Funds) who opens an account, and to determine whether such person's name appears on government lists of known or suspected terrorists and terrorist organizations.

What this means for you is that the Funds must obtain the following information for each customer prior to opening an account:

- Name;
- Date of birth (for individuals);
- Physical residential address (not post office boxes); and
- Taxpayer Identification Number such as Social Security Number or other identifying number.

Following receipt of your information, the Funds will follow its Customer Identification Program to attempt to verify your identity. You may be asked to provide certain other documentation (such as a driver's license or a passport) in order to verify your identity. If you are opening an account for a legal entity (e.g., partnership, limited liability company, business trust, corporation or other non-natural persons) you must supply the identity or identities of the ultimate beneficial owner(s) of the legal entity. The Funds will also follow its Customer Identification Program to obtain, verify and record the identity of persons authorized to act on accounts for such non-natural persons. Any documents requested in connection with the opening of an account will be utilized solely to establish the identity of customers in accordance with the requirements of law. Federal law prohibits the Funds and other financial institutions from opening accounts unless the minimum identifying information is received. The Funds are also required to verify the identity of the new customer under the Funds' Customer Identification Program and may be required to reject a new account application, close your account or take other steps as they deem reasonable if the Funds are unable to verify your identity. If an account is closed, the shares in that account will be redeemed at the net asset value determined on the redemption date.

PRICING OF SHARES

The net asset value per share of each Fund (and, as applicable, each class) is determined once each day, as more particularly described below, and generally as of the close of trading on the New York Stock Exchange (ordinarily 3:00 p.m., Central Time) on days on which the New York Stock Exchange is open for business. If the NYSE is closed due to weather or other extenuating circumstances on a day it would typically be open for business, or the NYSE has an unscheduled early closing on a day it has opened for business, each Fund reserves the right to treat such day as a business day and accept purchase and redemption orders and calculate its share price as of the normally scheduled close of regular trading on the NYSE for that day. Currently the New York Stock Exchange and the Funds are closed for business on Saturdays and Sundays and on the following holidays (as observed): New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

For the Conservative Allocation, Core Plus, Large Cap, Multi Cap, Partners III and Short Duration Funds: the net asset value of a class of Fund shares is determined by dividing the value of the assets attributable to that class, less liabilities attributable to that class, by the number of shares of the class outstanding. For the Ultra Short Government Fund: the net asset value of Fund shares is determined by dividing the value of assets of the Fund, less liabilities of the Fund, by the number of shares of the Fund outstanding. In calculating the net asset value of a Fund's shares:

1. Securities traded on a national or regional securities exchange are valued at the last sales price; if there were no sales on that day, securities are valued at the mean between the latest available and representative bid and ask prices; securities listed on the NASDAQ exchange are valued using the NASDAQ Official Closing Price ("NOCP"). Generally, the NOCP will be the last sales price unless the reported trade for the security is outside the range of the bid/ask price. In such cases, the NOCP will be normalized to the nearer of the bid or ask price.
2. Short sales traded on a national or regional securities exchange are valued at the last sales price; if there were no sales on that day, short sales are valued at the mean between the latest available and representative bid and ask prices.
3. Securities not listed on an exchange are valued at the mean between the latest available and representative bid and ask prices.
4. The value of certain debt securities for which market quotations are not readily available may be based upon current market prices of securities which are comparable in coupon, rating and maturity or an appropriate matrix utilizing similar factors.
5. The value of a traded option is the last sales price at which such option is traded, or, in the absence of a sale on or about the close of the exchange, the mean of the closing bid and ask prices.
6. Money market funds are valued at the quoted net asset value.
7. For portfolio securities where market quotations are not readily available or are deemed unreliable, the Funds' Valuation Policy (as adopted by the Board of Trustees) and Weitz Inc.'s valuation procedures permit Weitz Inc. to establish securities valuations based on good faith estimations of market values, which valuations may differ from the value actually realized upon the eventual sale of the securities.

REDEMPTION OF SHARES

See "***Redeeming Shares***" in the Prospectus for information about redeeming shares of the Funds.

Redemption of a Fund's shares may be suspended at times (a) when the New York Stock Exchange is closed for other than customary weekend or holiday closings, (b) when trading on the New York Stock Exchange is restricted, (c) when an emergency exists, as a result of which disposal by the Funds of securities owned by them is not reasonably practicable, or it is not reasonably practicable for the Funds to fairly determine the value of their net assets, or (d) during any other period when the SEC, by order, so permits, provided that the applicable rules and regulations of the SEC shall govern as to whether the conditions described in (b) or (c) exist.

The Trust has elected to be governed by Rule 18f-1 under the 1940 Act, which obligates the Trust to redeem shares in cash, with respect to any one shareholder during any 90-day period, up to the lesser of $250,000 or 1% of the assets of a Fund. If Weitz Inc. determines that existing conditions make cash payments undesirable, redemption payments may be made in whole or in part in securities or other financial assets, valued for this purpose as they are valued in computing a Fund's net asset value per share (a "redemption-in-kind"). Shareholders receiving securities or other financial assets in a redemption-in-kind may realize a gain or loss for tax purposes, and will incur any costs of sale, as well as the associated inconveniences.

TAXATION

Set forth below is a discussion of certain U.S. federal income tax issues concerning the Funds and the purchase, ownership, and disposition of a Fund's shares. This discussion does not purport to be complete or to deal with all the aspects of federal income taxation that may be relevant to shareholders in light of their particular circumstances. This discussion is based upon present provisions of the Code, the regulations promulgated thereunder, and judicial and administrative ruling authorities, all of which are subject to change, which change may be retroactive. Prospective investors should consult their own tax advisers with regard to the federal tax consequences of the purchase, ownership, or disposition of a Fund's shares, as well as the tax consequences arising under the laws of any state, foreign country, or other taxing jurisdiction.

Tax Status of the Funds

The Trust intends to qualify each of the Funds as a "regulated investment company" under Subchapter M of the Code, so that the Funds will not have to pay federal income tax on capital gains and net investment income distributed to shareholders. As a regulated investment company, a Fund generally will not be subject to U.S. federal income tax on its investment company taxable income and net capital gains (i.e., any net long-term capital gains in excess of the sum of net short-term capital losses and capital loss carryovers from prior taxable years) reported by the Fund as capital gain dividends, if any, that it distributes as dividends to its shareholders on a timely basis. Each Fund intends to distribute to its shareholders, at least annually, all or substantially all of its investment company taxable income and any net capital gains. In addition, amounts not distributed by a Fund on a timely basis in accordance with a calendar year distribution requirement may be subject to a nondeductible 4% excise tax. In order to avoid this excise tax, a Fund must distribute dividends in respect of each calendar year to its shareholders of an amount at least equal to the sum of (1) 98% of its ordinary income (taking into account certain deferrals and elections) for the calendar year, (2) 98.2% of its capital gains in excess of its capital losses (and adjusted for certain ordinary losses) for the twelve-month period ending on October 31 of such calendar year, and (3) all ordinary income and capital gains for previous years that were not distributed during such years and on which the Fund paid no U.S. federal income tax.

As a regulated investment company, a Fund is not allowed to utilize any net operating loss deduction realized in a taxable year in computing investment company taxable income in any prior or subsequent taxable year. A Fund may, however, subject to certain limitations, carry forward capital losses in excess of capital gains ("net capital losses") from any taxable year to offset capital gains, if any, realized during a subsequent taxable year without any expiration date. Any such loss carryforwards will retain their character as short-term or long-term. Capital gains that are offset by capital loss carryforwards are not subject to Fund-level U.S. federal income taxation, regardless of whether they are distributed to shareholders. In the event that a Fund were to experience an ownership change as defined under the Code, the capital loss carryforwards and other favorable tax attributes of the Fund, if any, may be subject to limitation.

In determining its net capital gain, including also in connection with determining the amount available to support a capital gain dividend, its taxable income and its earnings and profits, a Fund generally may elect to treat part or all of any post-October capital loss (defined as any net capital loss attributable to the portion, if any, of the taxable year after October 31 or, if there is no such loss, the net long-term capital loss or net short-term capital loss attributable to any such portion of the taxable year) or late-year ordinary loss (generally, the sum of its (i) net ordinary loss, if any, from the sale, exchange or other taxable disposition of property, attributable to the portion, if any, of the taxable year after October 31, and its (ii) other net ordinary loss, if any, attributable to the portion, if any, of the taxable year after December 31) as if incurred in the succeeding taxable year.

If a Fund retains any net capital gain, the Fund may designate the retained amount as undistributed capital gains in a notice to its shareholders who (1) if subject to U.S. federal income tax on long-term capital gains, will be required to include in income for federal income tax purposes, as long-term capital gain, their shares of that undistributed amount, and (2) will be entitled to credit their proportionate shares of the tax paid by the Fund against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds those liabilities. For U.S. federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by the amount of any such undistributed net capital gain included in the shareholder's gross income and decreased by the federal income tax paid by the Fund on that amount of net capital gain.

If for any taxable year a Fund does not qualify for the special tax treatment afforded regulated investment companies, all of such Fund's taxable income, including any net capital gains, would be subject to tax at regular corporate rates (without any deduction for distributions to shareholders). As a result, cash available for distribution to shareholders and the value of such Fund's shares may be reduced materially.

As of March 31, 2026, the below Funds had the following capital loss carryforwards for federal income tax purposes, which may be carried forward indefinitely with the retained tax character as set forth in the table below:

	Fiscal Year Ended March 31, 2026		
Fund	**Short-Term Amount**	**Long-Term Amount**	**Total**
Core Plus	$0	$4,148,284	$4,148,284
Short Duration	$175,749	$2,727,550	$2,903,299
Ultra Short Government	$15,357	$3,902	$19,259

To qualify as a regulated investment company, a Fund must, among other things, earn at least 90% of its gross income each taxable year from dividends, interest, gains from the sale or other disposition of securities and certain other types of income including, with certain exceptions, income from options and futures contracts. The Code also requires a regulated investment company to diversify its holdings. This means that with respect to 50% of a Fund's assets, on the last day of each quarter of the Fund's taxable year, no more than 5% of the Fund's total assets can be invested in the securities of any one issuer and the Fund cannot own more than 10% of the outstanding voting securities of such issuer. Additionally, on the last day of each quarter of the Fund's taxable year, the Fund may not invest more than 25% of its total assets in the securities of any one issuer (other than U.S. Government securities and securities of other regulated investment companies) or two or more issuers controlled by the Fund and engaged in the same, similar or related trades or businesses, or in the securities of certain publicly traded partnerships. This diversification test is in contrast to the diversification test under the 1940 Act which, with respect to 75% of a Fund's assets, restricts the Fund from investing more than 5% of its total assets in the securities of any one issuer or owning more than 10% of the voting securities of such issuer. Each of the Funds is diversified under the Code, and each of the Funds (other than the Partners III Fund) is diversified under the 1940 Act. The Internal Revenue Service ("IRS") has not made its position clear regarding the treatment of certain futures contracts and options for purposes of the diversification test, and the extent to which a Fund could buy or sell futures contracts and options may be limited by this requirement.

The Funds may make investments or engage in transactions that affect the character, amount and timing of gains and losses realized by the Funds. The Funds also may make investments that produce income that is not matched by a corresponding cash receipt by the Funds. Such investments may require a Fund to borrow money or dispose of other securities in order to pay a distribution. Additionally, a Fund may make investments that result in the recognition of ordinary income rather than capital gain, or that prevent the Fund from accruing a long-term holding period. Such investments may prevent the Fund from making capital gain distributions.

Distributions in General

Distributions of investment company taxable income are taxable to a U.S. shareholder as ordinary income, whether paid in cash or shares. Dividends paid by the Funds to a corporate shareholder, to the extent such dividends are attributable to dividends received by the Fund from a U.S. corporation, may, subject to limitation, be eligible for the dividends received deduction.

The excess of net long-term capital gains over net short-term capital losses realized, distributed and properly reported by a Fund, whether paid in cash or reinvested in Fund shares, will generally be taxable to shareholders as long-term capital gain, regardless of how long a shareholder has held Fund shares. Capital gains from assets held for one year or less will be taxed as ordinary income.

Shareholders will be notified annually as to the U.S. federal tax status of distributions, and shareholders reinvesting distributions in newly issued shares will receive a statement as to the net asset value of the shares purchased.

If the net asset value of shares is reduced below a shareholder's cost as a result of a distribution by the Funds, such distribution generally will be taxable even though it represents a return of invested capital. Investors should be careful to consider the tax implications of buying shares of the Funds just prior to a distribution. The price of shares purchased at this time will include the amount of the forthcoming distribution, but the distribution will generally be taxable to the shareholder.

A distribution will be treated as paid on December 31 of a calendar year if it is declared by the Funds in October, November or December of that year with a record date in such a month and paid by the Funds during January of the following calendar year. Such a distribution will be taxable to shareholders in the calendar year in which the distribution is declared, rather than the calendar year in which it is received.

Current tax law generally provides for a maximum tax rate for individual taxpayers of either 15% or 20% (depending on whether the individual's income exceeds certain threshold amounts) on long-term capital gains and on certain qualifying dividend income. The rate reductions do not apply to corporate taxpayers. The Funds expect to separately report distributions of any qualifying long-term capital gains or qualifying dividends earned by the Funds that would be eligible for the lower maximum rate. A shareholder would also have to satisfy a 61-day holding period with respect to any distributions of qualifying dividends in order to obtain the benefit of the lower rate. Distributions resulting from income from the Funds' investments in debt securities will not generally qualify for the lower rates. Further, because many companies in which the Funds invest do not pay significant dividends on their stock, the Funds may not generally derive significant amounts of qualifying dividend income that would be eligible for the lower rate. Note that distributions of earnings from dividends paid by "qualified foreign corporations" can also qualify for the lower tax rates on qualifying dividends. Qualified foreign corporations are corporations incorporated in a U.S. possession, corporations whose stock is readily tradable on an established securities market in the U.S., and corporations eligible for the benefits of a comprehensive income tax treaty with the United States which satisfy certain other requirements. Passive foreign investment companies are not treated as "qualified foreign corporations." Foreign tax credits associated with dividends from "qualified foreign corporations" will be limited to reflect the reduced U.S. tax on those dividends. The amount of a Fund's distributions that would otherwise qualify for lower rates or be eligible for dividends received deduction would be reduced to the extent of the Fund's securities lending activities.

Certain distributions reported by a Fund as Section 163(j) interest dividends may be treated as interest income by shareholders for purposes of the tax rules applicable to interest expense limitations under Section 163(j) of the Code. Such treatment by the shareholder is generally subject to holding period requirements and other potential limitations, although the holding period requirements are generally not applicable to dividends declared by money market funds and certain other funds that declare dividends daily and pay such dividends on a monthly or more frequent basis. The amount that a Fund is eligible to report as a Section 163(j) dividend for a tax year is generally limited to the excess of the Fund's business interest income over the sum of the Fund's (i) business interest expense and (ii) other deductions properly allocable to the Fund's business interest income.

If a Fund acquires stock in certain foreign corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, rents, royalties or capital gain) or hold at least 50% of their assets in investments producing such passive income ("passive foreign investment companies"), the Fund could be subject to federal income tax and additional interest charges on "excess distributions" received from such companies or gain from the sale of stock in such companies, even if all income or gain actually received by the Fund is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such a tax. In some cases, elections may be available that will ameliorate these adverse tax consequences, but those elections will require the Fund to include each year certain amounts as income or gain (subject to the distribution requirements described above) without a concurrent receipt of cash. Each Fund may attempt to limit and/or to manage its holdings in passive foreign investment companies to minimize its tax liability or maximize its return from these investments.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Funds and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Dispositions

Upon a redemption, sale or exchange of shares of a Fund, a shareholder will realize a taxable gain or loss depending upon his or her basis in the shares. A gain or loss will be treated as capital gain or loss if the shares are capital assets in the shareholder's hands, and the rate of tax will depend upon the shareholder's holding period for the shares. If the shareholder has held the shares as a capital asset for more than one year, the maximum federal income tax rate is currently generally either 15% or 20% (depending on whether the shareholder's taxable income exceeds certain threshold amounts). Any loss realized on a redemption, sale or exchange will be disallowed to the extent the shares disposed of are replaced (including through reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after the shares are disposed of. In such a case the basis of the shares acquired will need to be adjusted by the shareholder to reflect the disallowed loss. If a shareholder holds Fund shares for six months or less and during that period receives a distribution taxable to the shareholder as long-term capital gain any loss realized on the sale of such shares during such six-month period would be a long-term loss to the extent of such distribution. Certain other limitations apply that restrict the ability to deduct capital losses.

Taxation

Distributions may be subject to additional state, local and foreign taxes, depending on each shareholder's particular situation.

The discussion above relates solely to U.S. federal income tax law as it applies to "U.S. persons" subject to tax under such law.

Except as discussed below, distributions attributable to shareholders who, as to the United States, are not "U.S. persons," (*i.e.*, are nonresident aliens, foreign corporations, fiduciaries of foreign trusts or estates, foreign partnerships or other non-U.S. investors) generally will be subject to U.S. federal withholding tax at the rate of 30% on distributions treated as ordinary income unless such withholding tax is reduced or eliminated pursuant to a tax treaty or the distributions are effectively connected with a U.S. trade or business of the shareholder; but distributions of net capital gain (the excess of any net long-term capital gains over any net short-term capital losses) to such a non-U.S. shareholder will not be subject to U.S. federal income or withholding tax unless the distributions are effectively connected with the shareholder's trade or business in the United States or, in the case of a shareholder who is a nonresident alien individual, the shareholder is present in the United States for 183 days or more during the taxable year and certain other conditions are met.

Any capital gain realized by a non-U.S. shareholder upon a sale or redemption of shares of a Fund will not be subject to U.S. federal income or withholding tax unless the gain is effectively connected with the shareholder's trade or business in the United States, or in the case of a shareholder who is a nonresident alien individual, the shareholder is present in the United States for 183 days or more during the taxable year and certain other conditions are met.

Properly reported dividends received by a nonresident alien or foreign entity are generally exempt from U.S. federal withholding tax when they (a) are paid in respect of a Fund's "qualified net interest income" (generally, the Fund's U.S. source interest income, reduced by expenses that are allocable to such income) or (b) are paid in connection with a Fund's "qualified short-term capital gains" (generally, the excess of the Fund's net short-term capital gain over the Fund's long-term capital loss for such taxable year). However, depending on the circumstances, a Fund may report all, some or none of the Fund's potentially eligible dividends as derived from such qualified net interest income or as qualified short-term capital gains, and any remaining portion of the Fund's distributions (e.g. interest from non-U.S. sources or any foreign currency gains) would be ineligible for this potential exemption from withholding.

Non-U.S. persons who fail to furnish a Fund with the proper IRS Form W-8 (*i.e.*, W-8BEN, W-8BEN-E, W-8ECI, W-8IMY or W-8EXP), or an acceptable substitute, may be subject to backup withholding on dividends (including capital gain distributions) and on the proceeds of redemptions and exchanges.

The Funds are required to withhold U.S. tax at a 30% rate on payments of dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to the Funds to enable the Funds to determine whether withholding is required.

Non-U.S. shareholders may also be subject to U.S. estate tax with respect to their Fund shares.

Each shareholder who is not a U.S. person should consult his or her tax adviser regarding the U.S. and non-U.S. tax consequences of ownership of shares of, and receipt of distributions from, the Funds.

Fund Investments

Market Discount

If a Fund acquires a debt security at a price lower than the lower of the stated redemption price at maturity or adjusted issue price of such debt security, the excess of the stated redemption price or adjusted issue price over the purchase price is "market discount." If the amount of market discount is more than a de minimis amount, a portion of such market discount must be included as ordinary income (not capital gain) by a Fund in each taxable year in which the Fund owns an interest in such security and receives a principal payment on it. In particular, the Fund will be required to allocate that principal payment first to the portion of the market discount on the debt security that has accrued but has not previously been includable in income. In general, the amount of market discount that must be included for each period is equal to the lesser of (i) the amount of the market discount accruing during such period (plus any accrued market discount for prior periods not previously taken into account) or (ii) the amount of the principal payment with respect to such period. Generally, market discount accrues on a daily basis for each day the security is held by a Fund at a constant rate over the time remaining to the security's maturity or, at the election of a Fund, at a constant yield to maturity which takes into account the semi-annual compounding of interest. Gain realized on the disposition of a market discount obligation must be recognized as ordinary interest income (not capital gain) to the extent of the "accrued market discount."

Original Issue Discount

Certain debt securities acquired by a Fund may be treated as securities that were originally issued at a discount. Very generally, original issue discount is defined as the difference between the price at which a security was issued and its stated redemption price at maturity. Although no cash income on account of such discount is actually received by a Fund, original issue discount that accrues on a security in a given year generally is treated for federal income tax purposes as interest and, therefore, such income would be subject to the distribution requirements applicable to regulated investment companies. Some debt securities may be acquired by a Fund at a discount that exceeds the original issue discount on such securities, if any. This additional discount represents market discount for federal income tax purposes (see above).

Below Investment Grade Instruments

A Fund may invest a portion of its net assets in below investment grade instruments. Investments in these types of instruments may present special tax issues for a Fund. U.S. federal income tax rules are not entirely clear about issues such as when a Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by each Fund to the extent necessary in order to seek to ensure that it distributes sufficient income that it does not become subject to U.S. federal income or excise tax.

Options, Futures and Forward Contracts

Any regulated futures contracts and certain options (namely, non-equity options and dealer equity options) in which a Fund may invest may be "section 1256 contracts." Gains (or losses) on these contracts generally are considered to be 60% long-term and 40% short-term capital gains or losses. Also, section 1256 contracts held by a Fund at the end of each taxable year (and on certain other dates prescribed in the Code) are "marked to market" with the result that unrealized gains or losses are treated as though they were realized.

Transactions in options, futures and forward contracts undertaken by a Fund may result in "straddles" for federal income tax purposes. The straddle rules may affect the amount, timing and character of gains (or losses) realized by a Fund and may cause a greater percentage of the Fund's distributions to be ineligible to be reported as qualified dividend income or for the corporate dividends received deduction, and losses realized by a Fund on positions that are part of a straddle may be deferred under the straddle rules rather than being taken into account in calculating the taxable income for the taxable year in which the losses are realized. In addition, certain carrying charges (including interest expense) associated with positions in a straddle may be required to be capitalized rather than deducted currently. Certain elections that a Fund may make with respect to its straddle positions may also affect the amount, character and timing of the recognition of gains or losses from the affected positions. The consequences of such transactions to a Fund are not entirely clear. The straddle rules may increase the amount of short-term capital gain realized by a Fund, which is taxed as ordinary income when distributed to shareholders. Because application of the straddle rules may affect the character of gains or losses, defer losses and/or accelerate the recognition of gains or losses from the affected straddle positions, the amount which must be distributed to shareholders as ordinary income or long-term capital gain may be increased or decreased substantially as compared to what would have occurred if the Fund had not engaged in such transactions.

Constructive Sales

Under certain circumstances, a Fund may recognize gain from a constructive sale of an "appreciated financial position" it holds if it enters into a short sale, forward contract or other transaction that substantially reduces the risk of loss with respect to the appreciated position. In that event, a Fund would be treated as if it had sold and immediately repurchased the property and would be taxed on any gain (but not loss) from the constructive sale. The character of gain from a constructive sale would depend upon the Fund's holding period in the property. Loss from a constructive sale would be recognized when the property was subsequently disposed of, and its character would depend on the Fund's holding period and the application of various loss deferral provisions of the Code. Constructive sale treatment generally does not apply to transactions if such transaction is closed before the end of the 30th day after the close of the Fund's taxable year and the Fund holds the appreciated financial position throughout the 60-day period beginning with the day such transaction was closed.

Foreign Taxes

Income received by the Funds from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax conventions between certain countries and the U.S. may reduce or eliminate such taxes, but there can be no assurance in this regard.

CALCULATION OF PERFORMANCE DATA

A Fund or Class thereof may include its total return in advertisements or reports to shareholders or prospective investors. Total return is the percentage change in the net asset value of a Fund (or Class) share over a given period of time, with dividends and distributions treated as reinvested. Performance of Funds (or Classes) may also be shown by presenting one or more performance measurements, including cumulative total return or average annual total return. Cumulative total return is the actual total return of an investment in the respective Fund (or Class) over a specific period of time and does not reflect how much of the value of the investment may have fluctuated during the period of time indicated. Average annual total return is the annual compound total return of the respective Fund (or Class) over a specific period of time that would have produced the cumulative total return over the same period if the Fund's (or Class's) performance had remained constant throughout the period.

A Fund's average annual total return is computed in accordance with a standardized method prescribed by the SEC. The average annual total return for a specific period is found by first taking a hypothetical investment of $1,000 in a Fund's shares on the first day of the period and computing the redeemable value of that investment at the end of the period. The redeemable value is then divided by the initial investment, and this quotient is raised to a power equal to one divided by the number of years (or fractional portion thereof) covered by the computation and subtracting one from the result. The calculation assumes that all income and capital gains distributions paid by a Fund have been reinvested at net asset value on the reinvestment dates.

Quotations of a Fund's average annual total returns after taxes on distributions and redemption are also computed in accordance with standardized methods prescribed by SEC rules. A Fund computes its average annual total return after taxes on distributions by determining the average annual compounded rates of return during specified periods that equate the initial amount invested to the ending redeemable value of such investment after taxes on fund distributions but not after taxes on redemptions. This is done by dividing the ending redeemable value after taxes on fund distributions of a hypothetical $1,000 initial payment by the initial investment and raising the quotient to a power equal to one divided by the number of years (or fractional portion thereof) covered by the computation and subtracting one from the result.

A Fund computes its average annual total return after taxes on distributions and redemption by determining the average annual compounded rates of return during specified periods that equate the initial amount invested to the ending redeemable value of such investment after taxes on fund distributions and redemptions. This is done by dividing the ending redeemable value after taxes on fund distributions and redemptions of a hypothetical $1,000 initial payment by the initial investment and raising the quotient to a power equal to one divided by the number of years (or fractional portion thereof) covered by the computation and subtracting one from the result.

The Weitz Funds may use comparative performance information compiled by entities that monitor the performance of mutual funds generally such as Lipper Analytical Services, Inc., Morningstar, Inc. and The Value Line Mutual Fund Survey.

For the Conservative Allocation, Core Plus, Short Duration and Ultra Short Government Funds

A Fund or Class thereof may quote yield in advertisements or in reports and other communications to shareholders. For this purpose, yield is calculated by dividing net investment income per share earned during a 30-day period by the net asset value per share on the last day of the period. Net investment income includes interest and dividend income earned on a Fund's securities; it is net of all expenses. The yield calculation assumes that net investment income earned over 30 days is compounded semi-annually and then annualized. Methods used to calculate advertised yields are standardized for all bond mutual funds. However, these methods differ from the accounting methods used by the Funds to maintain books and records, and so the advertised 30-day yield may not fully reflect the income paid to a shareholder's account. A Fund's net investment income changes in response to fluctuations in interest rates and in the expenses of the Fund (including particular expenses of a relevant Class). Consequently, any given quotation should not be considered as representative of what a Fund's (or Class's) yield may be for any specified period in the future. Yield information may be useful in reviewing the performance of a Fund or Class, and for providing a basis for comparison with other investment alternatives. However, the yield of these Funds (or Classes) will fluctuate, unlike other investments which pay a fixed yield for a stated period of time. Current yield should be considered together with fluctuations in the net asset value of the Fund (or Class) over the period for which yield has been calculated, which, when combined, will indicate the total return to shareholders of the Fund (or Class) for that period. In addition, investors should give consideration to the quality and maturity of the securities owned by a Fund when comparing investment alternatives.

A Fund or Class thereof may quote the indices of bond prices and yields prepared by Bloomberg and other leading broker-dealer firms. These indices are not managed for any investment goal. Their composition may, however, be changed from time to time. A Fund or Class thereof may also compare its average annual total return to an unmanaged financial statistic, such as the United States Consumer Price Index (CPI).

The Core Plus, Short Duration and Ultra Short Government Funds (or a Class thereof) may quote the yield or total return of Ginnie Maes, Fannie Maes, Freddie Macs, corporate bonds and Treasury bonds and notes, either as compared to each other or as compared to the performance of the Fund (or Class). In considering such yields or total returns, investors should recognize that the performance of securities in which the Fund may invest does not reflect the Fund's performance (or any Class's performance), and does not take into account either the effects of portfolio management or of management fees or other expenses; and that the issuers of such securities guarantee that interest will be paid when due and that principal will be fully repaid if the securities are held to maturity, while there are no such guarantees with respect to shares of the Fund.

FINANCIAL STATEMENTS

The financial statements of each of the Funds for the fiscal year ended March 31, 2026, appearing in the Funds' report on Form N-CSR, have been audited by Deloitte & Touche, LLP and are incorporated by reference herein.
