How did the Fund perform for the period?

The Fund (Ticker: WBAIX) returned 2.84% for the 6-month period ended September 30, 2025.

Both fixed income and equity holdings contributed positively to performance. Top equity contributors included Oracle, Microsoft, Vulcan Materials, Alphabet, and Martin Marietta Materials Inc., supported by robust operating results and strength among AI infrastructure beneficiaries. Notable equity detractors included Accenture, Gartner, Aon, Roper Technologies, and IDEXX Corp., driven by investors reassessing roles in an AI-driven environment, mixed earnings results, and steadier holdings that had outperformed earlier in the year. Performance for the Institutional Class before inception (3/29/2019) is derived from historical performance of the Investor Class and has not been adjusted for expenses of the Institutional Class, had it, returns would have been different.

The fund's past performance is not a predictor of its future performance. Investment results reflect applicable fees and expenses, assumes all distributions are reinvested, and include fee waivers and/or expense reimbursements, without which results would have been lower; however, they do not reflect the deduction of taxes an investor would pay on distributions or share redemptions.
